

CATHEDRAL CHIMES WILL BE SHOWN HERE

A set of cathedral chimes, with a Maas amplifier, made by the Whittle Music Company of Dallas, will be demonstrated by George Perfect, a representative of the company, here this evening and tomorrow afternoon. The instrument is electrically operated, but has the sound of bells or chimes, according to Dr. E. P. Humbert, Head of the Genetics Department and custodian of Guion Hall's Hammond Electric organ, which was bought from the same company.

PARENTS—

(Continued from page 1)

field for the traditional Mother's Day ceremony at which the mothers and sweethearts of company commanders will pin flowers on the men in the various companies.

Beginning at 10 o'clock there will be a review of the entire corps, and this will be followed by services at Kyle Field honoring mothers and dads. At these services an all-student program will be given at which several of the campus leaders and the A. & M. Glee Club will take part.

At 12:30 a picnic lunch will be served, following which all the dormitories, with the exception of Walton Hall, will be open to visitors.

A musical program will be given in Guion Hall at 2:30, followed by the annual Mother's Day drill of the Ross Volunteers. The day's activities will be brought to a close by a concert of the Band which will begin at 4:30.

The Mechanical Engineering Department has arranged for a two-day model airplane show and contest which will include both rubber and gas-powered models. It is expected that the contests will draw entries from Houston, Dallas, Fort Worth, San Antonio and many other sections of the state. Saturday the contests will be held on the Artillery drill field and on Sunday they will be held at the Basco Airport on the Madisonville highway.

In order to make it possible for visitors to see all of the engineering exhibits, a complete route has been mapped out which will allow the spectators to see the displays in a short time and with little confusion.

It is expected that more than 10,000 persons will visit the A. & M. campus this weekend.

ENGINEERS' DAY—

(Continued from page 1)

W. C. Morris, Jr., a senior electrical engineering student, and chairman of Engineers Day, has worked hard to make this one of the most interesting shows ever given at this school. With the aid of leading men from each branch of engineering—Buddy Mandell, electrical engineering; Hal Moseley, architectural engineering; Tony Polanovich, petroleum engineering, and A. S. Witchell, chemical engineering—a complete and detailed program has been mapped out. Arrangements have been made to indicate the best route for spectators making it possible to avoid confusion and lost time in seeing all the exhibits.

Biggest Longhorn Yet Soon To Be Distributed

Monday will see the beginning of distribution of The Longhorn, A. & M. annual. Seniors will be able to secure their copies at that time, with the other classes to receive theirs in accordance with a schedule to be announced.

This year's Longhorn contains 477 pages, making it the largest annual ever to be published here.

Published by the Student Publications Board, as are The Battalion and The Scientific Review, this year's annual has been edited by Warren D. Barton, with H. F. Bockhorn as sports editor, A. G. Beckmann as business manager and James F. Hollingsworth as associate editor. Junior assistants have been Jimmy Fouts, Sid Gottlieb and George Smith. Smith was recently elected editor of next year's book.

O. D. Butler served as editor of the "Greenhorn" section, the size of which has been cut considerably this year.

In addition to being the largest annual Aggies have ever had, The Longhorn also has more color printing in it than ever before. Metallic green and bronze page borders and section pages are throughout the book.

Bound in green leather with gold print, The Longhorn is filled with photographs by Howard Berry, Ray Trimble and Philip Golman, as well as numerous pages of informal snapshots taken by students not on the staff.

THE HILLEL CLUB WILL

hold its last meeting of the year at 7:45 p. m. Sunday in the Assembly Room of the library. Rabbi A. V. Goodman, Director of the Hillel Foundation at Texas University, will speak on "Jewish Life Insurance". Election of officers for next year will be held immediately after the discussion.

Allegheny College in 1940 will celebrate the 125th anniversary of its founding.

We're Wrong Twice—Landrum Will Speak Here NEXT Week

Lightning may not strike twice in the same place, but two mistakes hit The Battalion in the same place in the last two weeks.

First, the date of Dr. Homer P. Rainey's address here was reported incorrectly. That was enough, the staff decided. In staff meetings, everyone took a deep breath and avowed that no such stuff would happen again.

But it did. Tuesday The Battalion incorrectly reported the date for the speech by Lynn Landrum, Dallas News columnist, before the Economics club. Instead of May 10, (Wednesday), Mr. Landrum's speech was scheduled for May 17—next Wednesday.

A new process which is believed to make possible the production of a new type of synthetic rubber has been discovered by University of Alabama scientists.

Official Notices

All members of the Scholarship Honor Society planning to attend the annual banquet May 22 must have their fee paid (60 cents) by Friday night. See T. D. Harris, 87 Law.

FOR SALE: Gold plated Selmer Saxophone \$95.00. Fine condition. See W. W. Small, 307 Bizzell. Phone College 425.

RESIDENTS OF COLLEGE Station who have a furnished house or apartment for rent to students of the Summer Session are requested to send a description of same to Joe Davis, Commandant's office, College Station, or telephone Mr. Davis at College 81—C. H. WINKLER, Director, Summer Session.

FOUND: Pair of eye-glasses near the AAA Office. See Mable Claire Wren.

BECAUSE OF THE ENGINEERS' Day activities junior and senior engineering students are excused from classes Saturday morning.—F. C. BOLTON, Dean.

THE GENERAL FACULTY has adopted the following rule effective for the current semester: "An undergraduate student who

within the present term has completed all the requirements of a course except the examination may earn an exemption from the examination in that course provided he has a semester grade exclusive of final examination of A or B, and is within the upper 25% of the class as then constituted. A class as used above is defined as including all students registered in a given subject with a single instructor."

Since this regulation is applicable to undergraduate students, including seniors, the faculty has decided that the present senior class will not be affected by the change. This means that candidates for the Baccalaureate Degree on June 2, 1939 will be exempt from final examinations in accordance with paragraph 24, sub. 2 of College Regulations. Beginning next year candidates for the Baccalaureate Degree will take final examinations unless excused on the basis of the exemption as provided in this new change in regulations.—E. J. HOWELL, Secretary of General Faculty.

GIVE YOUR MOTHER A TREAT

OWN A ROYAL AND YOU OWN THE BEST

"AGGIE TELLS AGGIE"

That A. M. Waldrop & Co. Is "Tops" In Military Uniforms and Equipment

For more than forty-three years we have served Aggies and have sold a major part of the military equipment used by them. During these many years we have sold only regulation uniforms and supplies. It has always been our policy to sell quality merchandise at moderate prices.

The men in charge of the Military Department in both of our stores have had years of experience in fitting Aggies with regulation uniforms, and we guarantee satisfaction in both quality and fit.
