Air Corps Board To Visit A. & M.

War Has Affected Schools Of U. S. in Numerous Ways

With international developments definitely the number one news interest of the nation, U. S. colleges and universities are daily feeling the effects of the current European war in many ways.

Here is a quick review of incidents that, though unrelated, clearly point to the fact that higher education is not spared during times of conflict:

- 1. R.O.T.C. courses are more popular than ever before, and institutions throughout the nation are reporting large increases in enrollment in both military and naval reserve training programs. 2. Courses that deal with other peoples and other nations and with political science are enjoying a great increased popularity. 3. Anti-war groups and movements has been started on many campuses. Lectures on the world situation are well attended. Addresses at most college opening convocations featured the attitudes and duties that must be assumed by undergraduates during these trying times. 4. First proof that international propaganda is being directed at collegians was a broadcast from Berlin that was sent "by friends in Germany to friends in Massachusetts with special greetings to Amherst College." The program featured skits and Amherst songs. Said the Amherst student paper of the broadcast: "Saturday's broadcast was of value to Amherst if for no other reason than because it gave concrete evidence of the barrage of propaganda with which every American will be pounded during the war." 5. The American Association of University Women has adopted a new program of international education "to get the most accurate information on the issues involved." 6. The federal government has increased the civilian pilot training program to include 260 U. S. colleges and universities. College R. O. T. C. units are now teaching

the new streamlined drill formations adopted by the other branches of the military service.

7. The effect of another war (Japan vs. China) was felt at Texas State College for Women when students could not get enough Japanese lanterns to make effective the traditional Lantern Parade.

Through these developments collegians are being strongly impressed with the fact that, even though the U. S. is neutral, the effects of war reach over the highest of neutrality walls.

Baylor and T. C. U. Differ in Ideas About Coming Tilt

T. C. U.'S VERSION Fort Worth, Nov. 2.—A big idea hit the Texas Christian University campus!

"Why not beat Baylor?" The idea of a victory over the Bears is always a most acceptable one for the Horned Frogs, players, students and fans. The mere thought of such a sweet morsel is cheering in this year of the great famine at T. C. U.

The victory over Centenary sent Frog spirits up many points. They know now that it can be done. Too, reports indicate that the Frogs made a better showing against A. & M. than did the Bears.

Still badly handicapped by injuries, the Christians are yet more victory-minded than at any time this season.

"We found out a number of things last Saturday that should help the rest of the way," Coach Dutch Meyer reports. "I'm not saying we'll take Baylor, but I am convinced that the boys will play a bang-up ball game. I think we'll be improved on both offense and defense."

Yes, sir; the Frogs have had a taste of victory—and they liked it!

BAYLOR'S VERSION Waco, Tex., No. 2.—The Baylor Bears will be out to hit the comeback trail Saturday when they go up against the T. C. U. Horned Frogs in their annual homecoming tilt in Waco.

Coach Morley Jennings' charges were knocked from the top of the Southwest Conference grid scramble by the fast-stepping Texas A. & M. Aggies last weekend, but should have enough power left to be able to go against the T. C. U. eleven who won their first game of the season last Saturday when they took Centenary 21 to 0.

The Bears played a great brand of ball against the Aggies for the first half last Saturday, but just couldn't withstand the offensive play the Cadets turned loose the last two quarters. Not once did the Bruins get their scoring plays working, and if they encounter the same trouble against the Ft. Worth eleven, Coach Dutch Meyer's grid performers are likely to strike through the air to pick up their first conference win of the season.

Baylor owns a powerful defensive ball club, but so far, it has failed to show enough offensive power to rank as a serious threat in the conference chase. The Baylor coaches have worked hard all week long on this particular phase of the game and Baptist railbirds expect the Bruins to show more offensive strength against the Horned Frogs. If the Bears can get their ground game to clicking again, then you may hear more of the Baylor eleven before the grid season ends.

Staff For Town Hall Is Announced

The members of the Town Hall staff have been announced by Walter Sullivan, manager, and are as follows: Henry Herder, assistant manager, and George Steurer, sales manager.

Junior assistants, Jack Bailey, David Yarbrough, Leroy Johnson, Jack Nelson, Gus Worthington, Bud Hydecamp, Ed Felder, Paul Haines, and Tom Richey.

Sophomore assistants, Lesley McCarthy and Russel Yankee.

The members were picked according to their interest shown in the Town Hall activities for the coming year. The duties of the members are to assist in the Town Hall programs by way of ushering, selling tickets, and advertising.

To Examine Air Corps Applicants

Preliminary Exams Will Be Held In "Y" Chapel Friday

A board of Air Corps Officers of the U. S. Army is scheduled to visit A. & M. on or about November 6 to 10, for the purpose of conducting examinations of applicants for appointment as Flying Cadets in the U. S. Army Air Corps.

The Chief of the Air Corps is particularly desirous of impressing candidates with the fact that it is not intended or desired to enroll candidates as Flying Cadets prior to the completion of their college careers, since college graduates have better prospects for securing permanent commissions in the Regular Army.

Lieutenant G. P. Overing of the Air Corps is now visiting this college for the purpose of making preliminary arrangements for conducting the Flying Cadet examinations. He will be present in the Y. M. C. A. Chapel at 6:30 p. m., this coming Friday, to meet all students who are interested in applying for appointment and to offer information relative to the Army Air Corps training centers.

Applicants for Flying Cadet appointment must submit the following documents to the Flying Cadet board and applications will be filled out at that time:—

- 1. Three letters of recommendation. 2. One letter of recommendation from your R. O. T. C. instructor or National Guard Commander, if the applicant has been a member of either organization. 3. If exemption from the mental examination is claimed, an official transcript of college record (grades and credits) signed by the registrar, if the applicant has completed one-half or more credits required for a four year degree at a recognized college. If the applicant does not have sufficient college credits, he must take a mental examination in the following subjects: a. United States history. b. English grammar and composition. c. General history d. Geography e. Arithmetic f. Algebra, higher g. Geometry, plane and solid. h. Trigonometry, plane and spherical. i. Elementary physics 4. a. A duly authenticated copy of municipal or other official record of birth. b. If no official record can be obtained, an affidavit of the parent or guardian stating the date of birth and a specific statement why an official record cannot be obtained. This affidavit must be accompanied by: (1) A baptismal certificate or the affidavit of the physician or midwife in attendance of the applicant's birth. (2) (Or) The affidavit of at least two persons not related to him, testifying from their own personal knowledge as to the date of his birth.

5. Applicants under twenty-one years of age must have consent of their parents or guardian and their signature (or signatures) under paragraph nine on back of application. Applicants who reach the age of twenty-seven years on or before the date of their appointment are disqualified.

6. After successful completion of the examination, they are placed on a waiting list for appointment as Flying Cadets. Upon appointment, they are enlisted as Flying Cadets for three years and assigned, at the Government's expense, to one of the civilian schools, designated to give flying training to military personnel, normally for a period of three months for primary flying training. While at these schools, they receive \$75.00 per month plus an additional allowance of approximately \$52.50 for food and lodging, and are furnished flying clothing and accessories.

After completion of training at these primary schools, the Flying Cadets continue their training at Randolph and Kelly Fields, San Antonio, Texas, normally serving three months at each school.

7. Those Cadets who for any

Collegiate Majority Say They Would Not Volunteer To Fight For Allies

As the nation debates the way to stay out of a European war, what is American college youth thinking and saying about the situation? Scores of personal interviewers recently completed the first of this year's polls for the Student Opinion Surveys of America on campuses from coast to coast and found:

1. Students opposed changing the neutrality law, mainly because they believe this would involve the U. S.

2. Even if the Allies were in danger of losing to Germany, the U. S. should not send troops to help them.

3. College men—almost 6 out of every 10—say they would not volunteer if England and France were losing and this country went to their aid.

With the cooperation of over a hundred member newspapers, ballots have been gathered for the surveys from typical students the nation over, making up a scientific cross-section on which are based these weekly studies of college thought. Since the methods used are exactly those of famous opinion polls that have shown remarkable accuracy, the surveys represent the sentiments of all the one and a half million American collegians.

While congressional oratory got underway in Washington, interviewers stopped students in halls, libraries, dormitories, asked: "Should the neutrality law be changed so that any country at war could buy war supplies in the United States?"

Yes, answered.....42 per cent No, answered.....58 per cent

This shows that students do not agree with national public opinion, shown by other polls to be in favor of revision. Some persons hold that when the question is worded, "... so that ENGLAND AND FRANCE as well as other nations can buy war supplies..."

... the second wording represents what all actually believe the practical outcome of the change in the law. But Surveys tests show that there is no substantial shift of student opinion when England and France are mentioned. The answer is still "no." The majority remains against even when all qualified "yes" answers are added to the above 42.

Undergraduates against the amendment, which political experts are now saying is a certainty, believe danger of getting this country into war will be increased and the conflict will be prolonged. Those for the move sympathize with the Allies or want to see the end of Hitlerism. A junior at Glenville West Virginia State Teachers College spoke for a large group when he said, "I favor revision because it is the nearest we can get to neutrality."

To the question, "If England and France were in danger of defeat, should the U. S. send troops to help them?" only 36 per cent replied "yes."

Following that query, men students, the majority of whom are of conscription age, were asked: "If England and France were in danger of defeat and the U. S. declared war on their enemies, would you volunteer?" The results: Would volunteer.....42 per cent Would NOT volunteer...58 per cent

Significantly, events in recent months, climaxed by actual combat

reason are found unqualified to continue the training are discharged from the service without delay. Thus the candidate need have no apprehension about being retained in the service if he is found not qualified.

8. Candidates must agree that upon successful completion of the course of instruction as a Flying Cadet, they will, if their services are desired, serve for at least three years on active duty with the Regular Army Air Corps as Reserve Officers, unless sooner relieved by competent authority.

9. Flying Cadets must remain unmarried during the period of training as Cadets.

10. In case an applicant for Flying Cadet appointment has been disqualified (physically) he must obtain permission from the Chief of Air Corps before submitting another application.

11. The Flying Cadet board now visiting selected colleges of the 8th Corps area is acting only on applicants who can present exemptions from mental tests. Limited stays at each college prohibit holding mental examinations at this time.

in Europe, have apparently influenced a good many, for in February, 1939, the surveys found that only 2 out of every 10 would volunteer if this country went to war for other reasons than the defense of the country. These opinions, of course, are not a prediction of what would happen if this nation did declare war. Shifts in sentiment may already be seen since world war has become more a possibility. No one can tell what war fever can do.

This survey was begun about the time when Hitler made his last peace offer, and at that time students, as they have in the past, displayed their lack of confidence in the Fuehrer. Only 13 per cent declared England and France should accept his proposals for the sake of world peace. Sentiment was found to be unusually uniform in all parts of the country in the topics involved.

A. & M. Professor To Make Six-Week Tour For Heating Society

F. E. Giesecke, A. & M. professor and vice-president of the American Society of Heating and Ventilating Engineers, left Sunday on a six week tour to visit several of the chapters of that society. According to a report received Wednesday from G. B. Winstead, director of publicity.

Mr. Giesecke will attend meetings of eight different chapters of the society where he will present a paper "Radiant Heating and Cooling". In this paper he will give a review of literature on that subject and a detailed description of research relating to that subject being carried on by the experiment station at A. & M.

He will also visit officials of the society in New York and spend several days at the Pierce Laboratory at Yale University with Dr. Winslow who is professor of public health at the Yale School of Medicine and chairman of one of the research committees of the society. Dr. Winslow is carrying on research work on the physiological influences of air conditioning on human beings at this laboratory which has made available for this purpose a considerable sum of money to carry on this work.

Postmaster-General Approves Substation

In a letter received this week by Colonel Ike Ashburn, executive assistant to the president, from Luther Johnson, representative to Congress from this district, it was stated that the new substation for the new dormitories has been approved by Postmaster General Farley.

Work on the building will be completed as soon as possible. The substation will be known as College Station substation number one.
