STATISTICS REVIEW

Statistics Review for those taking the Civil Service Examination Thursday, March 28, at 7:30 p. m. in room 412, Agricultural Building.

T. R. HAMILTON

Special Lecture of General Interest

"Soil Erosion and Civilization", a fascinating picture-story of man's battle against soil erosion since before the dawn of history, will be presented in an address in Guion Hall, College Station, Texas, at 7:30 p. m., Friday, March 29, by Dr. W. C. Lowdermilk, Washington, D. C., assistant chief of the Soil Conservation Service. The discussion and the 100 colored slides will be based upon Dr. Lowdermilk's recent survey for the U. S. Department of Agriculture, of land use in Europe, North Africa, and the Near East. He will tell how man's misuse of the land has destroyed civilizations and how, taking a lesson from the tragedies of older civilizations, citizens of the United States are protecting their resources of soil, water, timber, and wildlife. The address, open to the public, will be presented in Guion Hall. Dr. Lowdermilk's appearance will be sponsored by the School of Agriculture, and it is requested that this announcement be repeated to all classes concerned.

SPEAKER FOR PLANT SCIENCE SEMINAR

Dr. Edgar Anderson, professor of botany at Washington University and geneticist for the Missouri Botanical Garden,

will meet with the Plant Science Seminar tonight and will lead an informal discussion on "The Place of Measurement in Biological Problems". The meeting will be held in the Experiment Station conference room at 7:30 p. m.

Dr. Anderson is one of the outstanding botanists of our country and has an international botanical reputation, particularly for his pioneer work in plant genetics. He is a graduate of Michigan State University and received his Sc.D. degree from Harvard University. Later he did post-doctorate research work in genetics, statistics, and cytology at the John Innes Horticultural Institution, Meriton, England. In more recent years he has explored for plants in eastern Europe, especially in the Balkan Peninsula, in addition to collecting plants in all parts of our own country. From 1931 to 1935, Dr. Anderson was arboretor of the Arnold Arboretum, Harvard University. His training, experience, and extensive research in approaching the solution of biological problems from many different angles insure his being an able and authoritative leader for the discussion topic and the seminar fortunate to have Dr. Anderson meet with it.

STUDENT EMPLOYMENT
The Texas State Highway Department has requested the Office of Student Employment to submit the names of 20 students desiring summer employment with the Highway Department as Courtesy Student Attendants. Applicants will be interviewed in this office beginning Friday, March 29. The application list will be closed at 5 p. m., Tuesday, April 2. Freshmen are not eligible for this list. The Highway Department has directed that preference be given to those students who are working all or part of their way through school.

VACCINATION AND INOCULATION
All advanced-course students of the R.O.T.C. due to attend the R.O.T.C. camp this summer are required to take the smallpox vaccination and typhoid-paratyphoid inoculation prior to arrival at camp.

COMPOSITE REGIMENT BALL
In compliance with the request of the committee in charge of the Composite Regiment Ball, approved by the organization commanders concerned, dormitory rooms will be vacated by cadets Friday and Saturday nights, March 29 and 30, in order to make accommodations for visiting girls attending the Composite Regiment Ball and the corps dance on these nights.

COMPOSITE REGIMENT BALL
The Composite Regiment Ball will be held in Sbisia Hall annex Friday, March 29, at 9 o'clock, for an important business session at which election of officers and organization of interest groups will take place. All members are urged to attend wearing name cards.

What Is X?? That's Math Club's Goal
What number if divided by ten leaves a remainder of nine; if divided by nine leaves a remainder of eight; if divided by eight leaves seven; and if divided by five number between one and ten leaves a remainder of one less than the number?
That's what the Math Club will try to find out in its meeting tonight at 7 o'clock in room 212, Academic Building, and it will also hear mathematics instructor J. R. Hillman explain the oddities of magic squares.

What Is X?? That's Math Club's Goal
What number if divided by ten leaves a remainder of nine; if divided by nine leaves a remainder of eight; if divided by eight leaves seven; and if divided by five number between one and ten leaves a remainder of one less than the number?
That's what the Math Club will try to find out in its meeting tonight at 7 o'clock in room 212, Academic Building, and it will also hear mathematics instructor J. R. Hillman explain the oddities of magic squares.

What Is X?? That's Math Club's Goal
What number if divided by ten leaves a remainder of nine; if divided by nine leaves a remainder of eight; if divided by eight leaves seven; and if divided by five number between one and ten leaves a remainder of one less than the number?
That's what the Math Club will try to find out in its meeting tonight at 7 o'clock in room 212, Academic Building, and it will also hear mathematics instructor J. R. Hillman explain the oddities of magic squares.
