# Early Action Asked

Once again The Battalion urges the provision of a student lounge in the Academic Building as soon as possible.

For approximately 25 years now this building has lacked such an accommodation. This condition should not be allowed to prevail any longer.

It is needless to go again over the need for such an accommodation. It has been cited too many times before. It is obvious to every student, every faculty member and official of the college. The Academic Building, center of student classroom and military activities, approximately the geographical center of the campus, a place visited by thousands of people from off the campus during the year, is in dire need of such an accommodation and should be provided with it before the end of this term.

posed and urged this step at its first meet- the singing. ing of this session, back in the fall. The Battalion has editorialized about it a num- assisted in making this a wonderful conference for ber of times. It was brought up before the us. Board of Directors of the college at a recent meeting, and was referred to a building committee to consider and present in more detail at some future meeting.

We ask that no more time than absolutely necessary be allowed to elapse on this question. The officials of the college all are anxious to see it answered, and the directors in the main seemed favorable at the meeting when it finally came up before them. We realize that the Board of Directors is confronted with much pressing business, but this is a comparatively small matter-albeit one of considerable importance to the students—and it involves the expenditure of only a couple of thousand dollars. It seems to us that it is a proposition that could and should be passed on and put through in just a few minutes at the very next meeting of the Board.

So once again we repeat our request that the Board pass this measure at its earliest convenience so that it may be effected before one more term has come to an end. The question has been overlooked too long

## Twelve-Year Schools

Light on the problem of whether or not Texas should shift from the present eleven-year plan for public schools to one of twelve years is expected from the early publication of an abstract of responses of teachers to a questionnaire sent out a month ago by the State Department of Education. This question is one that calls for expert judgment based on educational experience and experiments and should not be considered too hastily.

The Texas eleven-year plan contrasts with those of most states, which require eight years in the grades and four years in high school. In fact, some states and many cities extend this to thirteen years by requiring a year of kindergarten for five-yearolds. The Texas plan saves taxpayers' money, but many here have doubted the ability of this state's schools to impart in eleven years the education for which others take twelve years.

The Texas system is criticized, too, on the ground that its high school graduates are turned out too young either to be sent off to college immediately or to obtain steady jobs. In addition, confusion and irritation often arises in the placing of pupils who move here from states having the twelve-year system. Uniformity would be a big advantage for the many families that necessarily must move from one state to

While in some of the twelve-year states there is talk of trying to speed up the school system, this trend is offset by the desire to keep youngsters from competing with adults for jobs. As long as the country does not have enough jobs to go around, there is little point in hurrying pupils through school. New subjects, such as traffic safety, which are being in-

troduced in the schools, also call for additional time. The trend toward longer schooling is indicated by the fact that about eighty Texas schools already have followed the 1936 Port Arthur example in adopting the twelve-year plan. This problem should be considered from the point of view of the pupil's good, rather than that of teachers or school administrators; but it probably will be found that the twelve-year term has enough set advantages to make its additional cost worth while.

-Dallas Morning News indispensable.

## Why Men Fail

There is a cause for everything. Nothing ever "just happens." If a man is promoted to a better job, there is a reason. If a man loses his job, there is a cause.

There are many causes that lead to failure. Here is a list of the most common ones, as assigned by a noted psychologist. Look them over; if none of them apply to you, then you are to be congratulated, for you are a success.

1. Finding fault with the other fellow, but never seeing our own.

2. Doing as little as possible, and trying to get as much as possible for it.

3. Spending much time showing up the other fellow's weak points and too little time correcting our own.

4. Slandering those we do not like.

5. Procrastination—putting off until tomorrow something that we should have done day before

6. Deceit—talking friendly to the other's face and stabbing him in the back as soon as he turns around

7. False belief that we are smart enough to reap a harvest of pay before sowing a crop of honest

8. Disloyalty to those who have trusted us.

9. Egotism—the belief that we know it all, and no one can tell us anything.

10. Last, but not least, lack of necessary training and education to enable us to stand at the head in our line of work.

### OPEN FORUM

SOCIETY EXTENDS THANKS

Following are extracts from resolutions passed by the Texas Conference Woman's Missionary Society which recently met at College Station:

"We express deep appreciation to the people of College Station and Bryan who kindly furnished hospitality to the delegates.

"We especially thank Professor Joe Woolket and his 'Singing Cadets' for their musical numbers. The harp numbers by Miss Cynthia Lancaster were beautiful. The duet by Mrs. Parker Hanna and Mr. D. T. Killough was most inspirational and delight-

"The organ recitals by Miss Alice Scoates and Mr. John Edge before each evening service were deeply enjoyed.

"The facilities of the college placed at the disposal of the delegates were most generous. We especially thank Dr. Walton and Col. Ike Ashburn for making this possible.

"We thank Mrs. T. R. Freeman, for her services The Student Welfare Committee pro- at the piano, and cadet Anthony Bott for leading

> "Please express our appreciation to others who Sincerely yours,

MRS. VAN HAMILTON, Corresponding Secretary and Chairman of the Resolutions Committee."

## MAN, YOUR MANNERS—

"In the Spring a young man's fancy lightly turns to thoughts of love"-not so lightly for some of the seniors; they will be getting engaged or married in a few weeks.

The diamond is considered the conventional symbol for an engagement ring; it is proper to make a selection of rings without your price range, then let the young lady choose from the selection you

-Mrs. R. M. Sherwood.

## As the World Turns...

By "COUNT" V. K. SUGAREFF

The "two-term" tradition and President Roosevelt's silence on his future plans have evoked spirited discussion in the press of the country. So far only one President, Theodore Roosevelt, has actually challenged the "two-term" tradition. It is true that General Grant's bid for a third term (1880) was

sponsored in and out of the Republican convention, but Garfield was nominated. Theodore Roosevelt headed the ticket of the Progressive Party (a third party) in 1912. To the surprise of a large number of conservatives, he polled 4,126,020 votes and received 88 electoral votes. A third term for President Roosevelt is variously appraised by people in many walks of life. Two ex-New Dealers have argued the question pro and con.

Rexford G. Tugwell holds that Presidents should be re-elected for a third term for the following reasons: (1) Eight years are too short for reform policies. (2) The change would check the "inertia" of the Senate. Since the Senate reflects local interests, it has often blocked the President's policies which usually represent national interests. (3) Times

change, tradition should likewise. Raymond Foley is strongly against the thirdterm re-election of Presidents and lists his arguments as follows: (1) The "two-term" tradition is a check on "thirst for power". "Those who most desire power are . . . those most likely to acquire it." (2) The "two-term" tradition is considered as vital as the Constitution. (3) The third-term re-election of any President presents a danger of personal government

Of course, neither of the two gentlemen argues in favor of or against the present incumbent of the presidential office. They are discussing general principles and trends of our political setup. However, indications point to a strong current movement in favor of the third-term re-election of President Roosevelt. Recent presidential primaries in four states indicate that a large percent of the Democrats favors the nomination of President Roosevelt at the convention of the Democratic Party. However favorable the pre-convention sentiment might be to President Roosevelt, it might be as fruitless as that of General Grant. In a Democracy no individual is
