

Colonel Moore Notified Of Transfer

Anderson Announces Plans At City Commission Meeting

Installation Of Water Meter Boxes Will Begin on May 1

Key Rate of Insurance May Be Reduced Through Completion of Water Main

At a regular meeting of the City Commission last Thursday night, recently-elected Mayor Anderson reported that the setting of the water meter boxes for College Station would begin on May 1. The forms for the boxes have just recently arrived and production will begin immediately. Garland Brown, city marshal, will be in charge of production.

It was also announced at the meeting that the loop between the water main of Oakwood and College Park is now completed. Due to the completion of the loop, City Attorney J. Wheeler Barger will make a strong appeal for the reduction of the city's key rate of fire insurance.

Plans are being laid to extend water and sewer mains into the area north of Grant's Filling Station, within the next few days. This will be quite an improvement and will encourage more people to build homes in that area.

Other business at the meeting consisted of an announcement that a lot in the Boyett Addition has

Uncounted Citizens Asked To Assist In Completing Census

Citizens of College Station who have not as yet been counted by the census takers are reminded that the enumerators will probably complete their first round over the community within the month of April, which ends today. In order to assist the authorities and make the 1940 census as complete as possible, uncounted persons should follow these directions.

If you find that all your close neighbors have been counted and you have been missed, then use the coupon below. If you know of a neighbor who has been out of the city, or for some other reason has been missed, then you should fill out this coupon and mail to the chamber of commerce.

If the enumerators have not been in your immediate vicinity, then do not send in the coupon because it will only entail extra clerical work. The enumerators will cooperate with us fully in giving an opportunity for interested persons to help round up those who have been overlooked before the census figures are finally made official and complete.

COUPON

Fill out and mail it right away. The enumerator has not called on me, or else I was gone. Please have them call again.

STUART BUCKLEY TO ADDRESS P. E. CLUB THURSDAY

Stuart E. Buckley, production research engineer for Humble Oil Company, of Houston, will address the Petroleum Engineering Club at 7:30 Thursday evening.

The subject of his talk will be "Current Research in Petroleum Production".

Mr. Buckley has done considerable work in the oil fields of east Texas. He is known as an interesting speaker, and has many problems of importance to the petroleum industry to present his audience.

The public is invited.

City-County Health Unit Grades College Station Cafes

Improvement of Sanitary Conditions Is Undertaken

The following story was released to The Battalion yesterday from the office of the City Secretary: Customers of College Station restaurants can now know the sanitary condition of the establishments they patronize by noting the grade placards which have recently been posted therein by the City-County Health Unit. The grading was done under the authority of an ordinance recently passed by the City Council of College Station.

The grades given are A, B, and C, with A grade as the highest obtainable. Owners of food establishments are required to display the placards in conspicuous places. The grades are based upon methods of protecting foods from dust, flies, and other vermin; cleanliness of the kitchen, counters, floors, etc.; and the efficiency of washing and disinfecting glasses, dishes, silver and utensils. The ordinance, which was passed December 12, gave the establishments four months in which to make improvements before the first grades were given.

Grade A
Aggieland Pharmacy, Casey's Confectionery, College Inn, College Tavern, Creamland, George's Place, Lipscomb's Pharmacy, Varsity Inn.

Grade B
A. & M. Grill, College Courts Coffee Shop, North Gate Sandwich Shop.

Grade C
Log Cabin Cafeteria.

Dr. Frank Leavell, Prominent Baptist, To Be Here May 10

Dr. Frank H. Leavell, member of the Youth Committee of the Baptist World Alliance and Southwide Baptist Student Secretary, will be guest speaker at the Annual Baptist Student Union Banquet at the College Station Baptist Church on May 10.

Dr. Leavell is one of the leading Christians of the world and director of the Southern Baptists' work among college students. He has been Southwide Baptist Student Secretary since the beginning of this work approximately twenty years ago. His work in international Christian student activities has given him wide experience and wisdom in student problems and in Christian service. He has recently returned from South America where he was invited to help in the organization of Baptist Student Unions in many colleges on that large continent.

With the leaders from other countries he has been instrumental in the planning and promotion of the recent International Baptist Youth Congresses.

Through his powerful personality, his dynamic Christianity and his ability to lead our great student program, Dr. Leavell has endeared himself to the many thousands of Southern Baptist students. Texas A. & M. students are indeed fortunate in having this opportunity to hear this outstanding Christian leader.

Dr. Abbott Recovering From Recent Operation

Dr. John P. Abbott, who recently underwent an appendectomy at the St. Joseph's Hospital in Bryan, is reported to be improving rapidly. He has been taken to his home for further recovery, and is expected to resume his work in the English Department in the near future.

HIGH SCHOOL ROTC MEMBERS TO VISIT HERE

Fort Worth Group First Of Several To See A. & M.

A. & M. will be the host to 150 R. O. T. C. boys from various high schools in Fort Worth who plan to arrive here at 10 a. m., Saturday. The students will come on a special train and will spend the remainder of the morning in touring the campus. They will eat in the mess halls, and will spend the afternoon inspecting the class buildings of the different departments and going through the new dormitories. At 3:30 a special showing of the S. M. U.-A. & M. football game will be shown for them in the Assembly Hall. The boys plan to stay here for supper and then return to Fort Worth.

Twenty high school students will be on the campus Friday for a visit while on their way to the Junior Academy of Science at Nacogdoches. The sponsors of the group have expressed a desire to make the A. & M. Museum the high point of interest during their stay on the campus. The group will have lunch in the mess hall and will spend about two hours going over the points of interest on the campus before leaving for Nacogdoches.

Plans are being made for later groups from Houston and Dallas high schools to come here and visit the college.

Annual Press Dinner Takes Place Tonight

The annual banquet of the A. & M. Press Club takes place tonight at 6:30 in the banquet room of Sbisla Hall.

Given each spring by the Student Publications Board for students who have worked on student publications, the affair is the biggest of the year for the Press Club.

Dean F. C. Bolton will present the awards for the year. Awards consist of bronze, silver, and gold Press Club keys for active members; and eight gold watches for seniors who have held responsible positions on student publications.

Following the banquet a business meeting will be held and officers for next year's Press Club will be elected. Officers this year have been George Smith, president; Larry Wehrle, vice-president; and W. J. (Jeff) Montgomery, secretary-treasurer.

All active members of the staffs of The Battalion newspaper and magazine, the Longhorn, and the Scientific Review are invited to attend. No. 2 uniform will be worn.

Members of the Student Publications Board are Dean Bolton, chairman; E. L. Angell, manager of student publications; Colonel Ike Ashburn, executive assistant to the president; Professor George B. Wilcox; D. B. Varner, Ernie Meynard, George Smith, and Bill Murray, student editors; and Mick Williams and Paul Haines, student representatives.

M. E. Dept. Running Out of Space For Lost Articles-- Let's Help Them Out!

By Bill Clarkson
If any of the mechanical engineers have been wondering who the thief was that made off with his leather jacket or trench coat during the cold weather, or who it was that stole his sliderule just before an exam, the answer may be found in the Mechanical Engineering Office!

Sixty-two lost articles have accumulated in the Mechanical Engineering Office since the beginning of the term, and as the office has begun to overflow with them, a list of them has been submitted to The Battalion in the hope that a few articles may be redeemed.

AUTHORITIES ON LIVESTOCK WORK TO TEACH HERE

Morrison, McKenzie To Lecture During Summer

Two of the country's foremost authorities in the field of animal husbandry will be visiting professors here this summer, both connected with the A. H. Department of the School of Agriculture.

Dr. F. B. Morrison, head of the A. H. Department of Cornell University, and director of the New York State Agricultural Experiment Station, will teach a three-hour advanced course in "Feeding of Farm Animals", for a period lasting from June 10 to 30. Dr. Morrison was formerly director of the Wisconsin Experiment Station, where he was associated with W. A. Henry in the publishing of "Feeds and Feeding", the standard text on animal feeding used in all agricultural colleges in the United States. After the death of Henry, Morrison became the sole author of the text. Dr. Morrison is the most widely recognized authority of livestock feeding in the country, particularly in the compilation of data on feeding experiments. He is a former president of the American Society of Animal Production.

F. F. McKenzie, professor of animal breeding at the University of Missouri, will teach a three-hour course dealing with the physiological aspects of controlled fertility in farm animals. The course will last from July 1 to 20. McKenzie is a leading authority on physiology of reproduction and artificial insemination, and is chairman of the board of investigators on artificial insemination and allied research in the United States and Canada. He was a member of the World Dairy Congress in London in 1928 and in Berlin in 1937.

"Aerosphere", New Aircraft Magazine, Is Aviators' Guide

A new publication, "Aerosphere", an international annual, dealing with all phases of the aircraft industry, may soon become an indispensable companion of students and teachers alike in schools participating in the Civil Aeronautics Authority's Civilian Pilot Training Program.

The "Aerosphere" answers all the types and kinds of questions that have been and are being asked about aviation. It tells in detail the performance and construction of every aero engine produced anywhere in the world from the time of the Wright Brothers down to the present day. It lists firms and organizations, executives, and even foreign persons who are in some way connected with aviation.

There are several sections used to describe and compare our ships with those of other countries, whether the plane is military, commercial, or private.

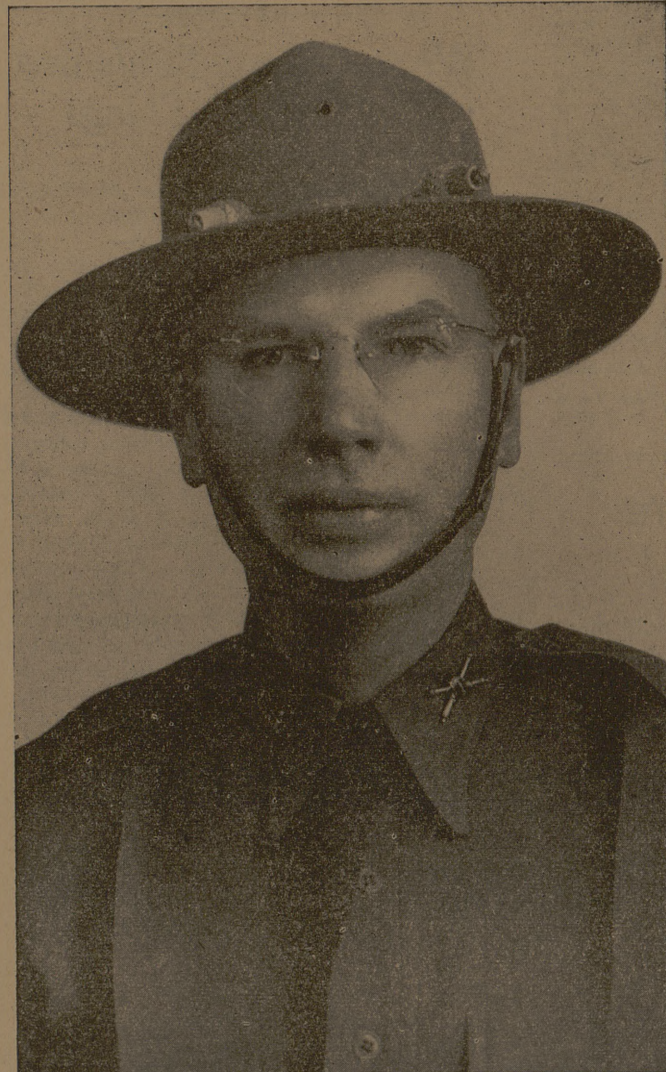

The "Aerosphere" is printed on 1,420 heavy-coated pages with 2,055 illustrations. The book weighs 12 pounds and is twice as thick and four times as heavy as the New York City telephone directory.

W. A. Beasley may clear up his cold by calling at the M. E. Office and obtaining his two-tone sweater. Louis H. Johnson may obtain his suede jacket by doing the same. D. C. Wilson and a student named Park may call for their trench coats at the same address. George Mortan's Bausch & Lomb goggle case is also now available for him.

G. C. Henderson, Richard Downing, Fish Warner, and Fish McGaskill may now catch up in their courses by calling for their notebooks, and W. N. Mohle has a clip board awaiting him.

Charles Ramsel's "Manual of" (Continued on page 4)

Commandant To Leave

Colonel George F. Moore, Commandant and Professor of Military Science and Tactics of Texas A. & M. College, has been advised by the United States Department of War that he is to be transferred at the end of this session to service in Hawaii.

Cattleman's Ball, Colorful Costume Dance, To Be Friday

With Jack Littlejohn swinging the baton and the gaily-dressed members of the Saddle and Sirlain and Kream and Kow clubs swinging the ladies, the annual Cattleman's Ball will get under way next Friday night at nine o'clock in the annex room of Sbisla Hall.

Preceding the ball will be a benefit performance sponsored by the members of the two clubs and put on by 58 girls of the Texas University Glee Club. The girls will come to Aggieland by a chartered bus and will remain for the dance which will last until an hour after midnight.

The Cattleman's Ball is the only ball of the year which requires the members to attend costumed. The regalia will consist of a bright

shirt, white trousers, and a dark sash worn Spanish style. It is expected that there will be around 175 club members and professors of the Animal Husbandry Department and Dairy Department attending the dance.

Before the orchestra strikes up there will be a presentation of medals to the seniors on the International Livestock Judging Team, and probably awards will be made to the Dairy Products team. The presentation of the awards will be made by a guest of the clubs.

The seniors on the livestock team who are to receive awards are Wilson Buster, R. S. Huddle, James Grote, James Gallant, Walton Lehmberg, and Frank Corder.

Government Inspector Praises Work Done by Texas Experiment Stations

Mr. H. P. Barss of the U. S. Office of Experiment Stations arrived at College Station recently to make the annual inspection of federal accounts and of the progress of work at the main station of the Texas Agricultural Experiment Station. Mr. Barss expressed his satisfaction with the consistent development of the research work at this station and the progress being made.

Mr. Barss, accompanied by R. E. Dickson and R. E. Karper, left College Station on April 7 and during the week following visited Substation No. 2, Tyler; the Sweet Potato Investigations Laboratory at Gilmer; the Federal Cotton Field Station at Greenville; Substation No. 6 at Denton; the Grape Investigations Laboratory at Montague; Substation No. 16 at Iowa

Park; Substation No. 12 at Chillocothe; Substation No. 7 at Spur; Substation No. 8 at Lubbock; and the Soil Conservation Station at Bushland near Amarillo before proceeding to the New Mexico station.

Mr. Barss, in a recent letter to Dr. T. O. Walton, has the following comments to make on the character and scope of our work:

"Last week I completed the annual examination of the work and expenditures of the Texas Agricultural Experiment Station under the Federal-grant funds administered by the Office of Experiment Stations representing the Secretary of Agriculture. I had the privilege of visiting the substations at Tyler, Denton, Iowa Park, Chillocothe, Spur, and Lubbock and the recently established Sweet Potato Laboratory at Gilmer and the Grape Laboratory at Montague in addition to the Main Station.

"I am glad to report that the experimental program is progressing in a most satisfactory way and that it represents a high order of scientific and practical attainment. I was greatly impressed by the effectiveness of the research work under the system of administration and organization existing in your experiment station system."

Commandant To Be Sent to Hawaii At End of 1940 Term

Leaves After Three Years at Alma Mater

Colonel George F. Moore, Commandant of A. & M. College, and Professor of Military Science and Tactics, has been informed by the United States War Department, through President T. O. Walton, that he will be transferred from College Station at the end of this school year, in order to take up some other important work away from the college.

What his new work will be has not been definitely assigned as yet, but it is expected that he will be transferred to Hawaii.

Colonel Moore's successor has not been decided upon, and will probably not be announced until late in the summer.

For three years Colonel Moore has served as an able and most efficient Commandant of the college from which he graduated in 1908 as a civil engineer.

Colonel Moore was born in Austin on July 21, 1887, and in 1904 entered A. & M. College. For two years he played as a substitute on the football team. During 1906 and 1907 he made the team and was a regular guard and tackle. He also took part in many other school activities.

In 1908, when he graduated, he intended to start out on a career of civil engineering; however, with his appointment as a second lieutenant in the Army in 1912, he turned to a military life. In 1917 he was appointed captain, in 1920 a major, in 1934 a lieutenant-colonel, and in 1939 was made a full colonel.

J. B. Miller Wins Danforth Award

Freshman A. H. Student Receives Annual Award

J. B. Miller, freshman in C Cavalry, from College Station, has been awarded the Freshman Danforth Fellowship for 1940. He has an exceptional high school record, both in regards to scholastic standing and extra-curricular activities.

Miller's major course is Animal Husbandry, in which he had a grade point average of 2.83 the first semester and placed third in the Freshman Livestock Judging Contest. He has distinguished himself as one of the outstanding freshmen in the School of Agriculture.

This fellowship is awarded by W. H. Danforth, president of the Ralston Purina Mills of St. Louis. The outstanding freshman agriculture student from every major state agricultural college selected. It consists of a two-week trip to a summer camp on the shores of Lake Michigan. Miller will leave for Michigan about August 15.

Coeds Are In Rut, Student Maintains— Witness Late Fads

A student writer at Louisiana State University fears coeds there are getting into a rut because they haven't come up with any new fads recently. To prove his point he cites the following fads that recently blossomed at the following schools:

At Smith College five girls appeared for supper in very short skirts, all exactly alike but in different colors.

California coeds blossomed out in Chinese coolie straw hats and dummies, leading to the suggestion that L. S. U. girls try frayed pick-aniny straw hats.

At Vassar recently the girls went on a hairdressing rampage, cutting bangs and wearing harlequin glasses. At Smith a girl went to a dance with a single sapphire planted in a forehead curl. At Northwestern they have a special speech school bob,—really just another version of the Florentine page boy.
