**LAST FACULTY DANCE**  
The last Faculty Dance for the current season will be held in the Sbis Hall Banquet Room Monday, May 6, from 9 to 12 p. m. The date has been advanced over that previously due to student demand for the Banquet Room.

This dance will be the **SPRING INFORMAL** and it is suggested that very informal sports wear be the dress keynote with sports clothes of any type being worn, and slacks suits for men—cotton dresses for ladies, or any other very cool attire, being quite satisfactory. The wearing of sports clothes is merely a suggestion and if for any reason it is more convenient to attend in other attire by all means do so.  
All staff members of the college are cordially invited to come and bring their friends. It is hoped that a large number of couples will find it possible to be present.

**ENGLISH CONTEST**  
1. Entries for the English Contest will close at 10 a. m. Saturday, May 4. After that time no entries will be accepted, whatever reason may be offered for delay in filing notice. A list of students whose entries have already come to me has been posted on bulletin board 20 near the English Office.  
2. The first part of the examination will be a general vocabulary test—not the form used in the contest a year ago or any test given to students in this college in or before the fall of 1939. No specific preparation for the vocabulary section is possible.  
3. Lists of the material in English 104, 207, 210, and 232 on which the course questions will be based will be posted on bulletin board 20 by May 5.

important contributor of structural innovations in building engineering. Mr. Neutra will spend a week on the campus and in addition to his lectures in connection with the Low-Cost Housing Conference, he will address a general group the latter part of the week.

For the week beginning May 20, the college is extremely fortunate in having as a guest lecturer, Thos. H. MacDonald, Commissioner of Public Roads. Mr. MacDonald is generally conceded to be the ranking highway engineer of the world. For more than twenty-four years he has directed the work of the Bureau of Public Roads and is now Commissioner of Public Roads of the Federal Works Agency. He will deliver three lectures while at A. & M., one of which will be of general interest and to which will be invited members of the engineering profession and builders of public roads. The other two lectures will be in connection with research in highways and modern trends in design and construction.

On May 20 and 21 the First Annual Conference on Surveying and Mapping will be held under the auspices of the Department of Civil Engineering. For a long time a great need has existed for the establishment of a coordinated plan for surveying and mapping in Texas and some time ago the A. & M. College decided to sponsor such a movement. The conference arranged at this time is in connection therewith.

A. & M. College is generally known as an agricultural school and as such, it is unquestionably among the best in the country. Very few people realize that one-half of the students of the college are taking some branch of engineering. The school includes the Department of Architecture, Architectural Engineering, Chemical Engineering, Civil Engineering, Electrical Engineering, Engineering Drawing, Industrial Education, Mechanical Engineering, Municipal and Sanitary Engineering, and Petroleum Engineering. In addition, authorization has recently been given for the creation of Departments of Aeronautical Engineering and Industrial Engineering. The Engineering Experiment Station is a part of the School of Engineering and is co-ordinated with the various branches.

Of 75 students at Sam Houston State Teachers College, Huntsville, Texas, who were asked to name the school song, only six knew, says The Houstonian.

**Organizations**  
**A. & M. GARDEN CLUB**  
The A. & M. Garden Club will make a pilgrimage to several historical spots in nearby communities on Friday, May 3. They will visit Old Washington, Monument Hill at LaGrange, and Llendo Plantation near Hempstead, home of the famous sculptress, Elizabeth Ney. Short talks will be given at each place and lunch will be eaten at Monument Hill and the club business of the year will be concluded.  
The groups are to meet at 8:30 a. m. sharp in front of the Administration Building Friday and expect to return at 5 p. m.

**MARKETING AND FINANCE CLUB**  
The annual Marketing and Finance Club banquet will be held Tuesday, May 7, in the banquet room of Sbis Hall. All club members will be admitted free. However, they must sign up with the secretary of the Agricultural Economics Department before noon Monday, May 6. All members who have not paid their dues for this year will be charged 75 cents.

**COSMOPOLITAN CLUB**  
The Cosmopolitan Club party that was to be held Saturday, May 4, has been postponed. The date it will be held is to be announced later.

**PUERTO RICO CLUB**  
The Puerto Rico Club will have an important meeting tonight at 7:00 in room 110, Academic Building. All members please be present.

**STUDENT WELFARE COMMITTEE**  
The regular monthly meeting of the Student Welfare Committee will be held at 6:15 p. m. Thursday, May 2. All members are asked to be present to take part in important business.

**HILLEL CLUB**  
The A. & M. Hillel Club meeting of Sunday, May 5, will be held at 2:30 in the afternoon in the lounge room of Sbis Hall, instead of at the usual evening hour. Dr. T. F. Mayo will be guest speaker.

**PETROLEUM ENGINEERING CLUB**  
Stuart E. Buckley, production research engineer for Humble Oil Company, who is from Houston, will address the Petroleum Engineering Club Thursday evening 7:30. He will speak on "Current Research in Petroleum Production". The public is invited.

ern woolen mills. The wool co-ops market more than 20 percent of the nation's wool production.

These associations, according to The Story of Wool, have bridged the gap between producers and consumers, solving the problems of marketing, accentuating quality and care in the handling and preparation of wool for the market. The Farm Credit Administration has a first-hand interest in the progress of the wool associations because it is authorized and directed by various acts of Congress to promote cooperative marketing among farmers.

"Since the inception of the movement for cooperative wool marketing in 1909, there has been a gradual improvement in marketing methods," says a statement from the Farm Credit Administration. "Since 1933 the movement has proceeded at a quickened pace and today we see a new pattern in wool marketing, a pattern that is gradually being adopted by all the industry."

**"FASTEST BASE-RUNNER IN BASEBALL"**

OFF THE DIAMOND, George Case (below, right) prefers a slower pace... he likes to fish... smokes Camels a lot. He says: "Slower-burning Camels are more than mild—they're extra mild and extra cool. The more I smoke Camels, the more I like their full, rich flavor." Yes, the more you smoke Camels, the more you'll appreciate their extra mildness, extra coolness, and extra flavor.

**SPEED COUNTS IN BASE-RUNNING—BUT IN A CIGARETTE IT'S SLOW BURNING THAT COUNTS WITH ME. SLOWER-BURNING CAMELS GIVE ME THE BIG 'EXTRAS' IN SMOKING PLEASURE... AND EXTRA SMOKING, TOO**

**HE'S SAFE AT SECOND BY A SPLIT SECOND!** Yes, it's another stolen base for George Case. He stole 51 bases last season... led the major leagues... won wide acclaim as the "fastest man in baseball." It makes your legs ache to watch him, he runs so hard... so fast. But when George lights up a cigarette, speed is out. "No fast burning for me," he says. "I always smoke the slower-burning brand... Camel. Camels give me several big extras in smoking."

**GEORGE CASE, Joe DiMaggio, "Bucky" Walters, Johnny Mize... so many top-fighters in America's favorite sport prefer America's favorite cigarette... Camel. George Case tells his experiences above. Let your own experience convince you how much more pleasure there is in smoking when your cigarette is slower-burning... made from costlier tobaccos. Smoke Camels. Enjoy the extra mildness, extra coolness, and extra flavor that only Camel's matchless blend of costlier tobaccos and slower way of burning can give. Get more pleasure per puff and more puffs per pack (see panel, right).**

In recent laboratory tests, Camels burned 25% slower than the average of the 15 other of the largest-selling brands tested—slower than any of them. That means, on the average, a smoking plus equal to
