Summer Battalion Staff are urged to be present at the first Press Club meeting to be held Tuesday night at 7:30 in room 122 Administration Building or see George Paermann or Phil Levine in The Battalion Office before that time.

The student directory for the first semester of the 1940 summer session will be published next week and all subscribers to The Summer Battalion will receive a free copy with the next issue of the paper.

SUMMER SCHOOL

- The regular rules of gentlemanly conduct, as published in College Regulations will be observed by all students. Particular emphasis is placed on those paragraphs concerning gambling and drinking or possessing intoxicating liquor.
- Rooms will be kept in a neat and orderly condition. Frequent inspections of dormitories will be made by a representative from the Commandant's Office.
- All students will be allowed lights not in excess of 75 watts per person. Cooking in the dormitory is strictly against the regulations and persons who violate this regulation may be required to move out of the dormitory. The use of electrical appliances other than a fan or radio is not permitted.
- Students not residing in the dormitory are cautioned to consult the Bulletin Board in the Rotunda of the Academic Building daily. They will be held responsible for proper observance of all orders and instructions posted thereon. Failure to consult this Bulletin Board will not be accepted as an excuse for non-compliance with such orders or instructions.
- The Battalion carries important announcements and all

STATE FOREST SERVICE IS ONE OF COLLEGE'S MAIN DIVISIONS

This year the Texas Forest Service is twenty-five years old. Originally it was the State Department of Forestry, so designated at the time it was created in 1915 by the Thirty-fourth Texas Legislature. The Service has always been under the jurisdiction of the Board of Directors of the Agricultural and Mechanical College of Texas, and today lines up as one of the four main divisions of the College, taking its place with the Teaching Division, Experiment Station, and Extension Service. In 1925 a Division Office was established at Lufkin to administer the details connected with the forest fire prevention activities.

Texas Forests

Approximately one-fifth of the area of Texas, or 35,000,000 acres, is covered with some kind of forest growth.

What is usually termed as the commercial forest region extends over thirty-four East Texas counties. Traveling westward there is encountered the post oak region, east-cross timbers, west-cross timbers, the cedar brakes and, at high elevation in the Davis and Guadalupe Mountains south of New Mexico, forests typical of the Southern Rock Mountain area. The

students will be held responsible for proper observance of notices and instructions appearing in The Battalion.

6. Regulations governing traffic and the operation of motor vehicles on the Campus in effect during the regular session will be adhered to during summer school. Students who desire to keep a motor vehicle during summer school must register it at the Commandant's Office for that period.

7. Students staying in Law, Puryear, Bissell, and Hart Halls will park their cars in the parking lot between the Petroleum Engineering Building and the Petroleum Engineering Field. Motor vehicles for this parking area will enter and leave the Campus through the gravel street entrance adjacent to the parking area.

8. The parking lot immediately south of Walton Hall will be used for cars belonging to occupants of Walton Hall. Motor vehicles for this parking area will enter and leave the campus through the north gate entrance adjacent to the drug store.

9. Motor vehicles will not be driven on any street on the campus other than the two that are designated in Paragraphs 7 and 8 of this order.

GEO. F. MOORE, Commandant.

forests of East Texas and also the forests of lesser commercial value in Central and West Texas are all involved in the consideration of the general forestry problems within the state. So far, major attention has been accorded the commercial forest area in East Texas.

Forest fire prevention, as in other states, is one of the chief responsibilities of the Texas Forest Service. Education, through two motorized picture units, posting fire warning signs, public contact and other means, has done much to reduce the number of carelessly set forest fires. Where these measures have failed, the more stringent procedure of law enforcement through special deputized enforcement officers has been resorted to.

At the present time the Service operates 71 lookout towers and three camps, and over 1,000 miles of telephone line. Six CCC forestry camps (at one time there were 17) have constructed over 2,000 miles of forest truck trails and helped greatly in erecting the above-mentioned improvements.

Registration—

(Continued From Page 1)

terms. Further than this, the entire facilities and services of the college are available to summer students.

"The summer session enrollment," Dean Winkler said, "as in the regular session, is representative of the entire state and the South." He added that the summer session drew men and women from many other major American colleges and universities.

In addition to the regular courses, four three-week special courses will be made available and will be taught by visiting professors, from various colleges and universities, who are outstanding authorities in their respective fields.

F. B. Morrison, head of the Department of Animal Husbandry at Cornell University, will be in charge of the three-week animal husbandry course which will be held from June 10 to June 20. From the University of Nebraska comes Dr. F. D. Keim, who will teach the course "Fundamentals of Grass Pasture Improvement" which includes study of botany, genetics, and pasture problems. This course will be held from July 22 to August 10. Dr. R. F. Chandler, member of the staff of the Department of Agronomy at Cornell University, will teach a course concerning forest soils. This is a study of the application of basic soil principles to the problems of forest soils and will be taught from June 10 to July 20. "Soil Classification and Mapping" will be instructed by E. A. Norton, head of the soil survey work for the Soil Conservation Service, from August 12 to August 31.

Other visiting professors include W. R. Carmichael, principal of Bryan Junior High School; L. E. Freeman, assistant principal of Austin Senior High School; C. E. Hays, member of Denver Occupational Adjustment Service; C. S. Logsdon, assistant professor of Michigan State College, who will exchange with J. W. Barger as professor of Agricultural Economics; E. T. Robbins, Superintendent of Taylor Public Schools; E. E. Bartlett, ex-Aggie of the class of '39; Frank A. Thornton, College of the City of New York, who will exchange with Dr. F. B. Clark as professor of Economics; and Samuel L. Rodriguez, University of Puerto Rico, who will exchange with Dr. G. W. Schesselman as professor of Agricultural Economics.

As in the past, summer field trips and tours will be made in civil and petroleum engineering, architecture, geology, and agricultural economics.

C.A.A. Course—

(Continued From Page 1)

ter, this summer the course will be without cost to the student if he is accepted. The insurance and physical examination which ordinarily costs the student \$40, are free unless the applicant fails to qualify. In this case he will have to pay \$6 for the physical examination.

The allotment for the summer is 45 students. These students will receive a minimum of 35 and a maximum of 50 hours in the air together with 72 hours of class work. When a student completes the course he will receive his student pilot certificates and 3 hours college credit. The ground course will be taught by Mr. Higgins and Mr. Troetter in the Mechanical Engineering Building. The training field is located just west of Lake Shiloh about two miles from the campus.

Short Courses—

(Continued from page 1)

Course the annual Farm Security Administration Conference will be held with 600 persons in attendance from July 15 to July 20. The Firemen's Short Course will see 600 in attendance and will be held from July 28 until August 2. Following this will be the State Conference of Teachers of Vocational Agriculture, August 7 to 10, with R. A. Manire of Austin, Texas, acting as chairman. Seven hundred teachers from over the entire state are expected.

An Air Conditioning Short Course will be held August 15 and 17 under the direction of Wayne E. Long of the Mechanical Engineering Department and over a hundred are expected to attend. The final course will be the annual Coaching School to be held August 18 to 24. One

Summer Series—

(Continued From Page 1)

Week of July 28—The Cass County Kids will present a program in the Assembly Hall for the benefit of the Firemen attending the short course.

Thursday, August 1—The Marimba Duo, featuring Doris Jean Peterson, Marimba Virtuoso, two charming young women present a concert of marimba music, with selections ranging from classical to popular music. Miss Peterson appeared on the Kraft Music Hall with Bing Crosby some time ago and received such an enthusiastic ovation she was brought back for a return engagement two weeks later. This concert promises to be one of the highlights of the season.

The week of August 8 features the Wells' Dramatic Company in one of their unexcelled productions. The company consists of two couples who have played together for many years.

Still more entertainment is in store for the summer session. A series of dances are to be held in the Banquet Room of Sblsa Hall and are to be called "Juke Box Proms." There is an inexhaustible supply of recordings, including all of RCA's latest releases. Also the Assembly Hall will show movies, and all facilities of the Y. M. C. A. will be made available.

hundred and twenty-five coaches are expected.

The first short course was held at A. & M. in January, 1911. It was a Farmers' Course and only 16 men attended. They were housed in tents near the Agricultural Building. The following year the course was again held in January. In 1913, however, the course was held in July and has been a summer course ever since. The Extension Service took charge of the short course in 1923 and has fostered them since that time.

A \$100,000 cyclotron is being constructed in St. Louis by Washington University.

The University of Minnesota will turn over three blocks of its streets to local police so that parking and traffic may be better controlled.
