

## Registration for Draft to Be Held Wednesday in Registrar's Office

### Failure to Sign-up Could Mean Prison

Special arrangements are being made in order that students of the college may comply with the provisions of the Selective Training and Service Act. The office of the Registrar will be open for this purpose from 7 a. m. to 9 p. m. on Wednesday, October 16. This day has been named as national registration day by proclamation of the President of the United States.

All students registered in the college may register for the conscription act at this office, regardless of where they may reside. These arrangements make it unnecessary for any student to return home to register. Both graduate and undergraduate students over 21 years of age and not otherwise exempted must register on October 16. The terms of the act state: "Except as otherwise provided in this act, it shall be the duty of every male citizen of the United States and of every male alien residing in the United States who, on the day or days fixed for the first or any subsequent registration, is between the ages of twenty-one and thirty-six, to present himself for and submit to registration at such time, and place or places, and in such manner and in such group and groups, as shall be determined by rules and regulations prescribed hereunder."

Those exempted are members of the Federally recognized National Guard, the Officer's Reserve corps, the Regular Army Reserve, the enlisted Reserve Corps, the Naval Reserve Corps, the Naval Reserve, the Marine Corps Reserve, and cadets of the advanced stage, senior division, Reserve Officers Training Corps.

The attention of those registering is called to the fact that the full name must be given as it appears on their birth certificate.

For students in the college hospital and therefore unable to come to the Registrar's office, a special (Continued on Page 6)

## Agriculture Students Hear Olson Wednesday

Oscar W. Olson, educational director of the Chicago Mercantile Exchange, gave an address Wednesday morning at 11 under the auspices of the agronomy department of economics. Students in the agricultural economics classes attended the lecture which was held in room 331 in the Agriculture Building.

Olson's talk was one of a series of three which he has recently delivered in Texas. He has spoken before the Agricultural Club in Houston and the student body at Baylor. Olson is the founder of the Chicago Mercantile Exchange and is widely regarded as an authority in the field of marketing, particularly, in the marketing of dairy products.

## A & M and TSCW Cooperating On Low Cost Housing Project at Denton

A low cost housing project to be on the TSCW campus, with budgets and plans to be drawn up by TSCW home economics and interior decorating classes and the A. & M. fourth-year design class is being planned this year with the Aggie part of the plan under the direction of professors C. J. Finney and John M. Rowlett.

Aggies in this fourth year design class are C. R. Bailey, F. F. Beale, P. M. Bolton, J. F. Bourn, P. H. Brooks, L. V. Brooks, W. R. Laney, S. C. Lord, R. A. Parrish and F. R. Ross.

The plan came about as a result of an appropriation of \$1000 to take care of the TSCW part of the plan. The design class is busy computing the materials that can be purchased under this plan. Budgets for the decoration of the various rooms will be worked out by the classes at TSCW.

A low cost house for the average small town family on average income is being planned from materials and fixtures available in the small town lumberyards and stores. The home economics class of TSCW made a survey of needs of a small family in several towns in North Texas last year. Results

of this survey will be used to determine the requirements for the house.

The design class is working on plans specifications and working drawings to meet the needs of the small town home. The class functions as the architect and will award contract, and supervise construction of the house. The classes in home economics and interior decoration will design and make furniture and fittings.

The architecture class will develop the most efficient plan, the most economical type of construction with the newest materials available in small towns. Every effort will be made to find new uses for materials which the students will have at hand.

This will be an education for the students who will be future home builders and home owners in our state Finney said. The house will be used by all home planning departments at both colleges. During the year the TSCW campus is visited by home demonstration agents, county agents of the U. S. D. A., 4-H clubs, FFA boys and girls, parents, teachers, students and future students from all over the state.

## UCLA Bruins Are Hard-Luck Team; Lose First 2 Games on Bad Breaks

The U. C. L. A. Bruins, who will be opposed by the Texas Aggies next Saturday, can well be listed as the "hard-luck" team of the West Coast. They lost their first two games, one to the S. M. U. Mustangs and the other to the Santa Clara Broncos by the dual score of 9-6. Although they outplayed the Mustangs for three quarters, the Uclans finally wilted before the Texan's great aerial attack. The same can be said about the Broncos. Only a miraculous catch by Mathews of Santa Clara late in the final period set up the field goal which spelled defeat for U.C.L.A.

Spearheads of the Uclan offense are Jackie Robinson, great negro halfback, and Leo Cantor, lanky fullback. Robinson, understudy for the great Kenny Washington last year, is one of the fastest men in U.C.L.A. history. In the S.M.U. game the punters kept their kicks away from Robinson with one exception. That was when he returned a punt 88 yards through the whole Mustang team. Many quarters state that Robinson can outrun anybody on the Aggie team.

Other backs, who will see service, are: Bob Waterfield, brilliant sophomore triple-threat; Captain Ned Mathews, slippery letterman quarterback; Bill Overlin, sturdy fullback; Nick Angles, a triple threat transfer from a junior college; and Merle Campbell, an (Continued on Page 6)

## Cream Quality Program Will Be Held Here Oct. 23

M. E. McMurry, manager of the Texas Dairy Products Association, has announced a Cream Quality Program which will be held here at A. & M. on October 23.

One hundred butter-processors, cream-buyers and dairymen are expected to attend the program which will be held in the main lecture room in the Animal Husbandry Building. It is expected that by increasing attention to the production of better cream, Texas butter that will meet federal requirements will be produced.

The program has been tentatively arranged but will not be issued until next week. Herman Horneman of Sugar Creek Creamery, Danville, Illinois, and C. H. Parsons of the research department of Swift & Company, Chicago, will be the main speakers on the morning program. During the afternoon, A. V. Moore, professor in the dairy husbandry department, will give a survey of Texas butter in regards to mold contents. W. B. Maddox of the Extension Service will explain the work accomplished with dairy products through the Extension.

# Turbulent Sophomore Election Sees Bryant And Miller Win

## Chemistry Majors Have Opportunities

The Department of Chemistry in cooperation and with the approval of the American Chemical Society has recognized its course of study leading to the B. S. Degree in Chemistry in order to meet the demands for well trained men in the field of research in industry and government service. The American Chemical Society has insisted upon a curriculum of high standard in order to obtain well qualified men.

Due to the cooperation of the United States, the department is anticipating a big industrial development for the Pan-American countries when our war conditions have been settled. These men trained in the field of Chemistry are being prepared for research work which is the backbone of all scientific progress, not only in government service but in all industrial development. The research division in industry is known as the "brains of the organization." It is not expected that these men will become routine analysts or plant operation works, except in relation to their research problems.

Students majoring in Chemistry are expected to belong to the Chemical Warfare Service Unit, under which conditions they substitute two courses in the application of Chemistry for Military Science. In addition to the work in the specialized field of Chemistry, training in the biological sciences, English, history, economics, and a modern language is obtained. A speaking knowledge of Spanish is very desirable in order to do research work in industrial chemistry in the Spanish American countries.

The staff of the Chemistry Department consists of twenty-two teachers devoting all of their time to their work, thirteen of whom have their Ph.D. Degrees and others their M. S. Degrees from leading institutions throughout the entire country. Their training has been distributed from California and Washington in the West through the Central States and to the Eastern Universities, in addition to men trained in the Southern Universities. Assisting these full time teachers is a staff of ten graduate assistants, devoting half of their time to departmental service and the other to their work towards the M. S. Degree. Along with these graduate assistants, we have seven men doing their research work in the field of Industrial Chemistry.

Requirements for Majors in Chemistry  
Freshman year—Chemistry 103, 104 (Inorganic)  
Sophomore year—Chemistry 205 and 216 (Qualitative and Quantitative) (Continued on Page 6)

## Here's How Profs Will Be Affected By Conscription

Much has been said about the effect of the recent Selective Training and Service Act of 1940 as regards students, but little has been brought out as to the effects on college instructors.

The Federal Security Agency of Washington, D. C. sent the following letter to President Walton's office explaining these effects:

From many colleges have come expressions of apprehension concerning the consequences likely to follow if and when members of the faculties, who are also members of the Officers Reserve Corps or the National Guard, are called to active service in the Army. From sources believed to be reliable, I have learned of the procedures which are likely to operate. I am giving you this information without in any way committing the War Department to any particular decision with respect to any individual.

Induction—The legislation provides: "That during the period ending June 3, 1942, the President be, and is hereby authorized from time to time to order into the active military service of the United States for a period of twelve consecutive months each, any or all members and units of any or all reserve components of the Army of the United States; and retired personnel of the Regular Army, with or without their consent, to such extent and in such manner as he may deem necessary (Continued on Page 6)

## Wells To Address Students Tomorrow

Charles A. Wells, cartoonist, journalist, world traveler and lecturer, who is well known as a feature writer and artist for over 100 newspapers and periodicals, will speak in Guion Hall tomorrow night at 7:30.

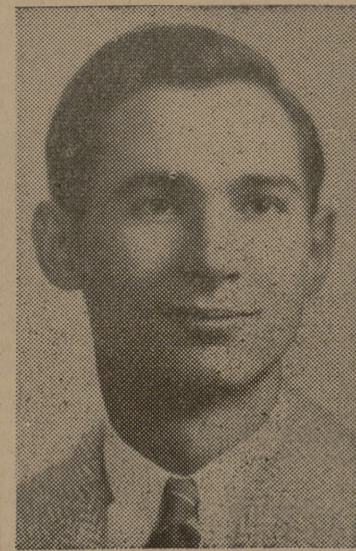

Wells is widely known and a welcome visitor on the college campuses all over the nation. During his brief stay in Texas he has spoken at the North Texas State College, Baylor University, and the College of Marshall.

Wells has ranged far and wide over the world and has penetrated most of the spheres of contemporary life. He has seen Hitler 20 times; knows all of the crowned heads of the world; was in Warsaw when the bombing commenced; has faced execution in China; has been jailed in Russia; and has helped Jewish friends smuggle money out of Germany. He was one of a few in small boats to survive the 1931 typhoon off the Hong Kong coast.

His lecture is free to the public. Each presentation is illustrated by cartoon drawn as Wells speaks.

## Maples Is Secretary-Treasurer; Wilkinson Named Class Historian

### Director

Ed Minnock, senior of Galena Park and recently elected director of A. & M.'s Aggieband Orchestra.

## Faculty Tennis Club Organizes For Current Year

The Faculty Tennis Club invites all employees of the College, including graduate assistants, who are interested in tennis to become members of the club. Dues for the year are \$3 for new members and \$2 for those who have previously been members.

Two clay courts are available for members' use exclusively. An autumn singles and doubles tournament will be held beginning on the afternoon of October 20, the singles matches to be finished on the succeeding week-end, weather permitting.

Dues for membership and entries for the tournament should be submitted promptly to either W. S. Flory, Experiment Station, or G. J. Samuelson, Box 118 Faculty Exchange. Bryan players who wish to enter the tournament will be welcomed on the same basis as of last year—a fifty cent entry fee covering both singles and doubles.

## Quarterback Club Sees Football Pictures

Pictures of the Tulsa-A.&M. and the A.&I.-A.&M. games will be shown tonight to the general public at 8:00 o'clock by the quarterback club.

The Club was organized last year for local football fans and Aggie supporters and has gained popularity rapidly; outgrowing every meeting place until ultimately Guion Hall became the hangout. Women are invited and even urged to attend these meetings. Fans in attendance will be given opportunity to ask questions pertaining to rules, formations, defensive patterns, etc., and members of the coaching staff will be present at each meeting to answer the puzzlers.

### Bryant and Bright Are Welfare Representatives

Bill Bryant, G Infantry, was elected president of the sophomore class Tuesday night in one of the most hotly contested elections in the memory of any one on the campus. The other officers of the Class of '43 are: Jack Miller, C Cavalry, vice-president; Joe Maples, Band, secretary-treasurer; John Wilkinson, historian; and Bob Bryant, C Chemical Warfare, and Bum Bright, D Coast Artillery, student welfare representatives.

The meeting was presided over by Tom Richey, president of the senior class. So noisy was the meeting with cries of protest and in that the assembly did not complete its selection of officers until 8:45.

The first vote in the president's race gave Bryant a majority of only 2 votes over his opponent Jack Nagle, F Field Artillery. The actual count was Bryant 273 and Nagle 271. This close vote was challenged on the grounds that more sophomores had entered the hall since the balloting was begun and that the majority of 2 might be over ruled.

The chairman ruled that since the meeting was called for 7:15 and had not actually begun until 7:30 everyone should have had ample time to get to the hall and the vote would stand.

In the vice-president's race Jack Miller, C Cavalry, nosed out Austin Nance, C Coast Artillery, by a vote of 296 to 255. At this point the president's race was challenged again on the basis that there were some freshmen in the hall. Upon investigation by the chairman, 2 freshmen were found and expelled from the hall. Since these may have been the deciding 2 in the presidential race, the count on the candidates was retaken. In the second count for president, Bryant's election was substantiated by a vote of 277 to 263 for Nagle.

The chairman repeatedly asked for order and then accepted the nominations for secretary-treasurer of the class. Those nominated were C. E. Storm, Hugh Lyle, Joe Maples, Mike Cokinos, Winston Irwin, Wade Kyser, and Bill Bucy. All except Hugh Lyle, A Engineers, and Joe Maples, Band, withdrew in favor of these two candidates. Maples was declared the secretary-treasurer by a vote of 276 to 243.

Before nominations were called for in the race for historian, the chairman's attention was called to the fact that some of the sophomore's had left the hall to round up more members of their organizations, and the chairman ordered the doors closed.

The nominees for the office were John Wilkinson and Bill Crown, A Coast Artillery. Wilkinson won by a count of 273 to 221.

In the student welfare representative race, Bob Bryant, C Chemical Warfare, and Bum Bright D Coast Artillery, were declared elected by a vote of 215 and 155 respectively. Two other nominees for the office were Leonard Parsons, F Infantry, 42 votes, and Cecil Carlyle, E Coast Artillery, 20 votes.

# Trotter Returns From Tour of West Texas As A & M's Pasture Inspection Representative

Dr. Ide P. Trotter, head of the department of agronomy, returned Monday from a West Texas pasture tour where he represented the School of Agriculture of Texas A. & M. The tour, which began at Marfa in Presidia County, covered a total of 2,200 miles, and is expected to result in a close correlation of all the range programs in Texas. Members of the tour conferred with ranchmen and agricultural agencies within typical areas for the purpose of formulating a common understanding of the major problems and opportunities in range improvement work.

The two weeks' tour, which will be completed this week, is very extensive and important. The U. S. Department of Agriculture was represented by Arthur Upson and Dr. W. G. McGinnies, chief of range research. They are both from the Southwestern Forest and

Range Experiment Station, Tucson, Arizona, and are making their first inspection of Texas pastures. J. H. Bell, Regional Range Examiner from Ft. Worth, and many scattered officials represented the Soil Conservation Service of the U. S. Department of Agriculture. The Agricultural Extension Service was represented by the local county agents in the counties visited and by R. R. Lancaster, pasture specialist who originated and conducted the tour. Fred Rendells, in charge of the AAA range program and other state officials were sent by the AAA organization. Vocational teachers in the areas visited were also helpful to the party.

The idea of the tour originated in the department of Agronomy while Dr. McGinnies was serving as a visiting professor here at A. & M. Dr. McGinnies taught a

three weeks' special graduate course in range management and ecology beginning June 10 this past summer.

## Miller to Judge At Arkansas-Oklahoma Fair October 14

J. C. Miller, professor in the animal husbandry department, will judge the beef classes at the Western Arkansas-Eastern Oklahoma Fair which will begin October 14 at Fort Smith, Arkansas. He will leave Wednesday by way of Dallas.

Miller judged the beef classes in La Grange at the Fayette County Fair last Friday and is scheduled to judge the sheep and goat classes at the Brazos Valley Fair in Waco on October 24.

## Annual Fish And Game Club Dance To Be Saturday Night

The Fish and Game club is sponsoring a dance at Maggie Parker's Tea Room in Bryan, Saturday night at 8:30.

In order to reduce the number of stags, a number of unescorted girls will be present.

Proceeds from the dance will be used to defray expenses of delegates to the sixth North American Wildlife Conference and other important meeting of interest to wild life majors, L. H. Lummis announced.

Admission charges for this dance will be 75 cents. All Aggies have been invited to attend.

## Six Aggies Are Now Enlisted In the Royal Canadian Air Force; "We're Fighting for the US" They Say

Six former Aggies are now enlisted in the Royal Canadian Air Force where they are receiving further training before they see active duty. Jack Garner, Houston, '40; Bill Tyler, Corpus Christi, '43; Bill Gibb, Sweetwater, '43; Jerry Jones, Sweetwater, '43; Allen Lindsey, '39; and one other who prefers to remain unknown met by coincidence in a recruiting station two thousand miles from their native Texas.

Strange to relate, ninety per cent of the present class of flying cadets enlisted in the Royal Canadian Air Force are Americans and

practically all have previous flying experience. The group concurs with the Aggies in possessing the same motive for joining the war. They believe that the economic well-being and the actual future of the United States are at stake. By their entrance into the issue, they can aid the cause of the British and her allies.

A letter from Garner states that the Canadians are more patriotic and religious than the majority of the Americans. Blue laws are in effect and have caused some amusing situations to the Americans. Midnight shows are held on Sun-

day nights and the admission is higher in the balcony than for the main floor. Garner commented on the dances that are held, because the boys and girls go to each dance separately and arrange for dates afterward while they are dancing. At present, all of the Aggies are living in the Y.M.C.A. in Windsor, but are expecting to be transferred to Toronto soon.

Garner and Tyler were graduates last year from the C.A.A. flying course offered at A. & M. Bob Peacock, a University of Texas graduate, has joined them to form a Texas squadron.
