

Official Notices

SENIORS Within the next week or two, the Placement Bureau will mail out Senior placement leaflets to the companies that have requested them. These leaflets are put in booklet form in a maroon and silver cover and are grouped by departments. Those seniors who are planning on having the leaflets prepared and have not paid for them should do so at once if they desire their leaflet to be included in these booklets. LUCIAN M. MORGAN, Director Placement Bureau

Waldrop & Co Two Convenient Stores College Station - Bryan

As was understood at the time classes were dismissed early for the Christmas holidays, the extra days missed from class are to be made up as follows: 1. On Saturday afternoon, January 11, an extra Monday morning schedule will be operated; that is, classes scheduled for 8 a.m. Monday will report at 1 p.m. Saturday. Those scheduled for 9 a.m. will report at 2 p.m. etc.

On Saturday afternoon, January 25, an extra Monday afternoon schedule will be operated. 2. The schedule for the first semester examinations will be changed so that instead of the present schedule the examinations will begin at noon Saturday, February 1 and will continue until noon Saturday, February 8. A detailed schedule of the examinations and of the procedure for registration for the second semester will be issued from the Registrar's office.

Notice Application size photographs which accompanied the personal leaflets are ready for the following seniors. Please call for these at Room 133, Administration Building, at your earliest convenience.

AAA Bldg-

(Continued from Page 1) ing and the site was set at \$900,000. The committee investigated methods of financing the building and decided that the best method would be to use the Housing Authority of Bryan. The plans call for an issue of \$250,000 in bonds by the authority. The payroll of the A.A.A. at College Station is \$900,000 annually and moving the offices to another city would make noticeable effect on the welfare of College Station and Bryan as a number of new homes have been built to take care of the personnel employed at the A.A.A. offices. The members of the committee for raising the funds and for financing the building are George Chance, chairman; Ford Munnerlyn; Judge A. S. Ware; O. W. Kelley and J. Webb Howell. Economists (Continued from Page 1) pated in the program were Dr. W. E. Paulson, marketing specialist with the Experiment Station, who served as discussion leader in the session on market price mechanisms and Dr. T. R. Hamilton, professor of accounting and statistics, who discussed the problems connected with estimating Texas citrus production. C. A. Bonnen, farm and ranch economist with the Experiment Station, was the author of a paper on the cotton situation which was read before the Farm Economics Association. Bonnen,

Duties of Newly Created Business Manager Defined

A member of the college staff to be in charge of financial affairs in general is the newly created position of business manager. Created with the issuance of the rules and regulations of the board of directors for the A. & M. college of Texas after a board meeting in April of last year, the new position was filled by the appointment of E. N. Holmgreen on December 31.

The duties of business manager as stated in the rules and regulations give him jurisdiction over the financial affairs of the fiscal office, the building and grounds department, the college utilities, the A. & M. press, Aggeland Inn, the Exchange Store, the college laundry and ice plant, the college architect, the rent properties, the college creamery and the dairy herd. Also under his supervision will be the dormitories and project houses, the dining halls and the campus police, the hospital, and the Y.M.C.A.

The business manager will also assist the heads of each department in making purchases, and he will also supervise the operation of all commercial activities. He will also have authority to require all deans, directors, and heads of departments to submit annual reports of all college property in their charge.

A budget for all departments will be prepared by the business manager in cooperation with the comptroller and the vice president.

Holmgreen, whose appointment becomes effective on February 1, has been administrator for the A. A. A. of the State of Texas.

National Defense-

(Continued from Page 1) basic military training course for the first two years of a cadet's college career. Only those who are physically handicapped are exempt from this training. During the last two years of a student's attendance at A. & M., military training is optional and a student must pass certain physical and scholastic requirements to be eligible for the advanced course.

Upon graduation, cadets who successfully complete the advanced course are commissioned as second lieutenants in the Officers Reserve corps, thus becoming parts of the United States army. Once in the O. R. C., the men have an opportunity to advance in rank in the same manner as officers in the regular army. Further than that, they are eligible to be called for active duty at any time necessary.

Backbone of A. & M's huge military training program are its seven branches of the Reserve Officers corps. These branches include the infantry, cavalry, field artillery, coast artillery, engineer, signal corps and chemical warfare regiments.

Manning these seven branches is a staff of 31 regular army officers and 55 enlisted men whose job it is to train the 6500 Texas Aggies in the various fields of military science and tactics. Heading this group of army officers is Lieut. Col. James A. Watson, commandant and professor of military science and tactics.

Airport Program In addition to the seven regiments mentioned above, a civil aeronautical administration course (basic and advanced training) has been in progress at A. & M. for two years. Plans now under way call for a \$367,000 construction program at the A. & M. airport. Officials of the School of Engineering, headed by Dean Gibb Gilchrist, recently pointed out that within a few months an aviation division of the R. O. T. C. might be added to the college military set-up.

In the present national defense himself, was unable to attend the meeting. This is the first time in several years that these societies have assembled in the South for their annual meetings.

In addition to Dr. Paulson and Dr. Hamilton, others who attended the four day meeting were H. C. Bradshaw and A. C. Magee, economists with the Experiment Station; D. C. Kennedy Jr. and Joe R. Motheral, research assistant with the Experiment Station; Dr. F. B. Clark, head of the economics department; I. G. Adams and Dr. P. L. Gettys, professors of economics; S. I. Sheldrop, instructor in economics; H. A. Duljan, instructor of accounting and statistics; and W. E. Morgan, economist with the Extension Service.

Junior Aggies-

(Continued from Page 1) times. Its members are expected never to double-cross A. & M., but if a member should be a traitor to this club or college he will be kicked out. "There will be a president, vice-

emergency, where units are established and men are inducted into service for training by the army, facilities for housing, feeding, health conservation, recreational services, instruction and training will be required. Together with 10 phases of training along lines of military objectives (discussed below), the college's recreational facilities and modern hospital are the key factors which are rapidly bringing A. & M. into an active and important part in training men for national defense purposes.

10 Training Phases A recent survey made by college and military officials disclosed that A. & M. readily offered 10 fields in which men could be trained in lines of military endeavor. In many cases this training is already under way. The 10 phases of training available at A. & M. include:

1. Construction quartermaster. In the civil engineering, electrical engineering and architectural departments of the college a school of instruction is being developed for men with previous practical experience. If necessary, raw recruits who are college graduates could also be trained in this work.

2. Veterinary corps.—This consists of training in the School of Veterinary Medicine with its hospital and staff on medicine, sanitation and all phases of work assigned to the veterinary corps. Headed by Dr. R. P. Marsteller, A. & M.'s school of veterinary medicine is the largest in North America.

3. Cooks and bakers.—The two large mess halls, which make up the largest single unit eating establishment in the world, and the staffs of these institutions which are well trained in volume buying and mass preparation and service of food, together with instruction in meats and chemistry, could serve as a training ground for this important work.

4. Finance section.—The college's administrative department is equipped to train men in fiscal responsibilities.

5. Signal corps and communications.—The laboratories of the electrical engineering department and its technicians are serving to train men in this field at the present time.

6. Mechanics.—Mechanics and supply men for tanks and other mechanized units are being trained in the agricultural engineering division of the college. This field is not nearly taxed to its capacity and could easily handle a great increase in the number of trainees. Machine Shops.

7. Machinists and aviation mechanics.—Machine shops, sheet metal working and all of the other essentials to the proper training of aviation mechanics are available.

8. Flight training.—Three airports are included in the A. & M. system at which the C. A. A. has authorized training.

9. R. O. T. C. units.—This is the college's principal facility where the creating of officers in concerned.

10. Training in design.—In this field, now being hard-pushed at A. & M., specialists are working to further perfect current designs and machines.

World War Work During the World war the college was staffed by only two regular army officers, had an enrollment of less than 1200 students and had only one regiment of cadet infantry, yet furnished more than 2000 commissioned officers to the army and a greater number of trained personnel to essential industries.

A survey made by the New York Times in 1918 showed that A. & M. furnished a greater proportion of graduates as commissioned officers to the armed forces of the United States than any other college or university.

Thus, with a student enrollment of 11,800 in the main college and its branches (John Tarleton Agricultural College at Stephenville, North Texas Agricultural College at Arlington, and Prairie View State Normal and Industrial College for negroes, at Prairie View), with a plant whose parts are strategically located near the principal centers of population and industry in Texas, with an organized and functioning personnel experienced in working with governmental agencies—military and civil, A. & M. college is striving to do full well its parts in the national defense program.

Board Members-

(Continued from Page 1) funds for the new dormitories. However, he is also a member of the athletic committee, the experimentation station committee, and is on the branch college board. Utay is a Dallas attorney and has held his present position for four years. His vacancy will require an appointment for a four year position.

An appointment for a six year term on the board will be caused by the expiration of Lacy's term. Lacy, president of the Citizens' National Bank at Waco, has been on the Board of Directors for more than ten years and is now its vice-president. He is also chairman of the finance committee and a member of the executive, athletic, and auditing committees.

Probably the last meeting of the present board will be held this coming Saturday. The other members are H. L. Kokernot, Alpine; G. R. White, Brady; Edwin J. Kiest, Dallas; R. W. Briggs, Pharr, and A. H. Demke, Stephenville.

There are six normal meetings of the board each year, but usually many special meetings are called during that time. For example, the board has met three times since December 23. The regular meetings come on the second Saturday of January, March, May, and October and on the day before commencement and Thanksgiving.

We Erred Concerning Size of Vanity Fair Pictures—Here's How

A correction to the statement in Saturday's Battalion concerning Vanity Fair Pictures was made yesterday by Morton Robinson, managing editor of the Longhorn.

The last issue of the paper stated that the size of the required pictures for Vanity Fair was 5 x 7. It should have been—one full length informal 8 x 10 and one bust formal 8 x 10.

One picture is required for the senior favorite section. It should be 5x7, bust, gloss finish.

An entry fee of \$3.00 is charged for Vanity Fair pictures; \$1.50 is the fee set for senior favorites.

All pictures should be given to Joe Jones in room 101, dormitory No. 5 by January 20.

Camp pictures should be turned in to Cecil Grissom, room 201, number 9.

Approximately 385,000 pounds of Texas mohair were graded last spring compared with 200,000 pounds in the fall of 1939 when the grading program began.
