

Watson Gives "No Boots" for Senior Class of '42

Official Notices

SCHEDULE OF EVENTS
 Mar. 28—Engineering Ball—Sbisa Hall—9:00 p. m.
 Mar. 28—Polo Assn. Benefit Show—Assembly Hall
 Mar. 29—Hill Club Dance—Sbisa Hall—9:00 p. m.
 Fellowship Luncheon each Thursday noon at Sbisa Hall.
 Roy L. Donahue, Chairman

FROM THE LONGHORN
 Space has been reserved in the Longhorn for the following clubs and as yet no picture has been made. Club officers must make arrangements with the photographer by March 26th. This date is the absolute deadline.

The clubs are Abilene A. & M. Club, Heart-of-Texas and Mountainers Club, Bell County Club, and Trans-Pecos Club.

Our fresh sea food dinners are delicious!

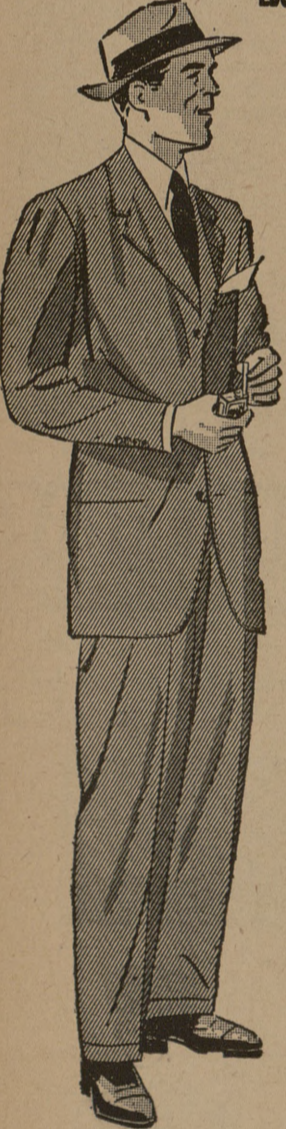

College Courts Coffee Shop

WE SALUTE Varsity-Town's COLOR DISCOVERY

KHAKI

WITH HAND-NEEDED EDGES

Another style stimulant ... another color "first" ... "Khaki" ... a spring shade filled to the brim with the fashion aggressiveness of a Varsity-Town. Come in, see what it's like. ... you'll like Khaki. There's a host of other new Varsity-Town Style ideas you'll want too ... smart lounge and drape models created by Varsity-Town in original spring shades.

\$25 to \$35

Waldrop & Co

"Two Convenient Stores"
 College Station - Bryan

Alphabetical club rosters, with list of officers attached, have not been turned in by the following clubs: Abilene A. & M. Club, Ag. Ed. Society, Economics Club, Eastern Panhandle Club, Geology Club, Newman Club, Poultry Science Club, Scholarship Honor Society, Rio Grande Valley Club, Trans-Pecos Club, Bell County Club, Bell County Mothers Club, and Lutheran Club.
 In order that the Longhorn Staff may facilitate their work it is requested that these rosters be turned in immediately at the Longhorn Office or Room 317, Dorn. 10.

FARM SECURITY INTERVIEWS
 A representative of the Farm Security Administration is on the campus this week to interview senior students majoring in agricultural education, animal husbandry, agronomy, dairy husbandry, poultry husbandry, agricultural engineering, horticulture. Seniors who desire to interview the representative should contact the Placement Bureau at once for an interview permit.
 Placement Bureau
 Association of Former Students

AGRICULTURIST MAGAZINE STAFF
 Pictures will be taken of the Agriculturist Magazine staff tomorrow at 5:00 in front of the Administration building. The staff will be in a group picture with the PRESS CLUB. Please be present. Seniors wear boots and khakis.

PETROLEUM ENGINEERING CLUB
 Mr. Fitzgerald of Dowell, Inc. will speak at the Petroleum Engineering Club at 7:00 p. m. Wednesday, March 26, 1941, on the subject of "Oil Well Acidizing."

AERONAUTICAL ENGINEERS
 United Air Lines Transport Corporation is taking applications for summer apprentice engineering work for the coming summer. Applicants must have but one more year to complete in college work, must have a reasonably high scholastic standing, a good personality, and a strong interest in air transport engineering and maintenance. They should preferably be Aeronautical Engineering students. Anyone interested should see H. H. Barlow, Head of the Department of Aeronautical Engineering, at the earliest possible date.

ACADEMIC COUNCIL
 The regular meeting of the Academic Council will be held at 2:30 p. m. today, March 25, in the Administration building.
 F. C. Bolton,
 DEAN

TRI-STATE A. & M. CLUB
 There will be a meeting of the Tri-State A. & M. Club at 7:00 tonight in the new "Y" ... Cigars will be served.

A. & M. CZECH CLUB
 The A. & M. Czech Club will have a meeting right after supper tonight in the new YMCA building. Members and interested parties please attend as an interesting program and business meeting has been planned.
 R. R. Lyle,
 Sponsor

PHYSICS MEETING
 The regular meeting of the Physics Colloquium will be held March 25, 7:15 p. m., in the Physics Building, Room 33. Professor E. G. Smith will talk on "Transient Heat Flow in Intermittently Heated Buildings." All interested are invited to attend.
 Physics Staff

MATH CLUB
 There will be a Math Club meeting, Tuesday night, at 7:30 in room 212 of the Academic Building. All members and interested parties please attend as an interesting program and business meeting has been planned.
 R. R. Lyle,
 Sponsor

RURAL SOCIOLOGY CLUB
 All officers of the Rural-Sociology Club please meet at 7:30 tonight in room 210 Ag. Bldg. for a short but important business meeting.
 Norris Davis, Sponsor

Classified

LOST—Recently, Stetson Campaign Hat with red cord, name under sweat band. Reward. Duty, Dorn 6, Room 305.

WANTED—Students to sell Chocolate Milk in the various dormitories. Excellent chance for student to make extra expense money. Applicant must have student labor application on file with student labor office. If interested see Jack Calhoun Room 228, Dormitory No. 12.

SENIORS—Be sure you get your correctly engraved personal cards with your commencement invitations. You'll need them not only now but for all time. See the "Jug" at Corps Headquarters Office.

FOR SALE—Four room house, Midway addition. Call E. K. Spahr—2-1459.

Legal Notice

ORDINANCE NO. 58
 AN ORDINANCE PROVIDING THAT IT SHALL BE UNLAWFUL TO ALLOW LIVESTOCK AND POULTRY TO RUN AT LARGE, REQUIRING THE CITY MARSHAL TO IMPOUND LIVESTOCK OR POULTRY FOUND RUNNING AT LARGE AND TO COLLECT A FEE AND REIMBURSEMENT FOR REDEMPTION OF IMPOUNDED LIVESTOCK OR POULTRY, PROVIDING FOR ADVERTISING, SALE, AND USE OF PROCEEDS THEREFROM, OF IMPOUNDED LIVESTOCK AND POULTRY NOT REDEEMED, IMPOSING A FINE FOR ALLOWING LIVESTOCK OR POULTRY TO RUN AT LARGE, AND DEFINING CERTAIN TERMS.
 BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF COLLEGE STATION, TEXAS:

SECTION 1. It shall be unlawful for any livestock or poultry to run at large and for the owner or keeper of any livestock or poultry to allow the same to run at large within the corporate limits of the city.

SECTION 2. It shall be the duty of the city marshal to impound any livestock or poultry running at large.

SECTION 3. The owner or keeper of any livestock or poultry impounded under the terms of this ordinance may redeem or reclaim same by the payment to the city of a fee of two dollars for each head of livestock and five cents for each head of poultry, and in addition thereto by reimbursing the city for the expense incurred in connection with the impoundment of such livestock or poultry.

SECTION 4. It shall be the duty of the city marshal to advertise for sale any livestock or poultry not redeemed or reclaimed by the owner or keeper within five days after such livestock or poultry has been impounded. Such notice of sale shall be published once in the official newspaper of the city and shall give a description of the livestock or poultry to be sold and announce the time for the sale. Such date of sale shall be not less than five days nor more than ten days from the date of such publication.

SECTION 5. It shall be the duty of the city marshal to sell to the highest cash bidder any livestock or poultry advertised for sale as provided in Section 4 hereof.

SECTION 6. Of the proceeds derived from the sale of any livestock or poultry under the terms of this ordinance, there shall be paid into the general funds of the city an amount necessary to cover the fees and reimbursement as provided in Section 3 hereof. The remainder shall be held in a special "Livestock and Poultry Fund," to be paid to the owner or keeper of the livestock or poultry sold, if same makes claim within a period of three

Speaks to Sophomores and Juniors Today at 5

Overseas Caps and Ice Cream Slacks Are Other Changes Suggested

By E. M. Rosenthal

Lieut. Colonel Watson will present his opinions on the changing of the official Aggie uniform to combined meeting of the Junior and Sophomore classes this afternoon at five o'clock in Guion Hall.

In a private interview yesterday afternoon, the commandant specifically stated that he would only suggest that certain changes be made and would allow those present at the meeting to vote on the final action to be taken. However, he pointed out that he hoped he could convince the juniors and seniors to adopt his suggestion that certain changes be made and would allow those present at the meeting to vote on the final action to be taken.

His statement to The Battalion was as follows:

"Under present conditions and the likelihood of all R.O.T.C. students being called to active service immediately upon graduation probably for the next several years, I have thought it opportune and important to advise students regarding certain changes in uniform."

"The young officer entering service is confronted with the expense of equipping himself with the proper uniform, with the expense of many social obligations and unforeseen expenses that arise which cause his paycheck to dwindle rapidly. The next step is the loan shark from whose clutches one emerges with many scars. It is believed that consideration of adopting articles for the junior and senior classes that will be proper for army wear will help the conditions of the young officer."

"Army officers with the exception of those who are not actually mounted on horseback do not wear riding breeches, boots or spurs. The overseas cap has taken the place of the service cap; slacks have taken the place of the breeches; the woolen shirt should be of a color worn by officers of the army."

"I believe that a junior should have service slacks of a light shade without cuffs similar to that worn by army officers; that he should purchase a service hat not of the flat crown type; that boots breeches and spurs be required only for mounted branches. That with the saving thus made he would be able to purchase another pair of cotton slacks and a rain coat."

The specific changes as contemplated are that in the future juniors and seniors will wear "ice cream" slacks without cuffs. This means that boots and breeches would be discontinued and that after the present group of seniors and juniors wear out the style slacks they are now wearing only "ice cream" and cotton slacks without cuffs will be worn.

Overseas caps like those now being worn by officers on duty on the campus, with cords to designate the various branches and gold colored cords to designate seniors will replace the service caps now worn with the No. 1 uniform.

Round-crown campaign hats will be regulation in place of the many flat-crowned hats now being worn. Like the slacks, however, those flat-crowned hats now being used will be regulation until they are worn out.

Lieut. Col. Watson said that if these new regulations are adopted he would be glad to enforce any other regulations that would distinguish the different classes as the cuffs on senior and junior slacks do now.

In event such claim is not established within said time, such remaining proceeds shall then be forfeited to the city and be paid into the general funds.

SECTION 7. Any person who wantonly and willfully allows any livestock or poultry to run at large within the corporate limits of the city shall be fined not to exceed ten dollars (\$10) upon first conviction and not to exceed twenty-five dollars (\$25) upon each conviction thereafter. Each day that the owner or keeper of any livestock or poultry allows same to run at large shall constitute a separate offense.

SECTION 8. Without excluding any other types or classes, the term "livestock" as used in this ordinance shall include horses, mules, shetland ponies, and burros; cattle; sheep and goats; and hogs; and the term "poultry" shall

Boy Scouts—

(Continued from Page 1)

cations of our respective programs, and encourage each to meet needs in the field of all boys as our respective programs and methods permit."

The memorandum was signed on behalf of A. & M. college Extension Service by President T. O. Walton; H. H. Williamson, director of extension; L. L. Johnson, state club leader; and J. W. Potts, assistant state club leader; and on behalf of the Boy Scouts of America by Jas. E. West, chief scout executive, Arthur A. Schuck, director division of operations; J. P. Fitch, regional scout executive; and O. H. Benson, national director rural scouting.

"This memorandum outlines a broad basis of relationship," said Director Williamson. "The Boy Scouts of America are carrying on a real constructive program for the American boy. It is our hope and desire that Extension employees will cooperate in every appropriate way. No doubt the Boy Scout organization can be of help to us in many ways in 4-H club work, and in turn we can be helpful to the Scout movement."

Ag Day—

(Continued from Page 1)

In addition, the Cream and Kow Club is sponsoring the Spring Dairy show on May 3. A full day's activities is planned and will include a cheese display and sale, a milking contest, competition in dairy classes and the presentation of Josephine Emmegrad III, a trained Holstein cow which will provide entertainment and humor. Exhibits have been planned to be displayed in the third floor of the Agricultural Engineering building by the various departments.

Cotton Queen—

(Continued from Page 1)

one of the nicer looking girls on the campus. Mrs. Manning Smith, local director of the Cotton Pageant, was also appointed as a member of the selection committee, but was unable to make the trip to Denton this past weekend. However, she has arranged to go to T. S. C. W. later this week to see the queen and her maids of honor about the arrangements for the affair.

McQuillan—

(Continued from Page 1)

University of Texas Medical School acted as toastmaster at the banquet and among other distinguished guests present were Dr. Homer Rainey, president of the University of Texas; Dean Moursund of the Baylor Medical School; and General J. W. Page.

Students from all medical and pre-medical schools throughout the state attended the affair.

Boston Bees—

(Continued from Page 3)

to 0 lead.

Carnet seemed to have a sure shut out as the game rolled into the eighth. Only four hits had been garnered off him for seven innings and his curve was baffling the cadets. Then, without warning, the Aggies exploded and accounted for six hits and five runs in the eighth to make the game much closer. Carden opened the big inning with his second single to center. Glass followed with a single. Carden followed with a single. Glass hit into center scored Carden, but Peden was out at third. Lindsey binged to center to score Glass and went to second on a balk. Majeski threw Francis' grounder into the dugout with Lindsey scoring and the big center fielder pulling up at second. Pugh then caught one of Carnet's fast ones, and the last seen of the ball it was still sailing toward DeWare Field House. Les Peden struck out but Jeffrey singled to left. He was picked off first to retire the side.

Roy Peden, rosy-cheeked right-hander, replaced Bumpers on the mound in the eighth and but for Rowell's four-bagger, pitched credible ball. The seventeen blows were well divided among the Boston players.

include chickens, geese, ducks, guineas, turkeys, and pigeons.

PASSED AND APPROVED this 20th day of March, A.D. 1941.

Chemistry Makes Large Contributions Toward Preventing Epidemic Spread

By Dr. Fred W. Jensen

Since the dawn of civilization, disease has been the scourge of mankind. The eradication and prevention of disease has been and no doubt always will be a question of absorbing interest. The early alchemist working under tremendous handicaps searched in his test tubes for the elixir of life, and pointed out as one of chemistry's goals the making of medicines to relieve pain and suffering and to restore health. For ages it has been the hope and aim of chemistry and related sciences to find chemical substances that would destroy infectious agents and not do serious harm to the human system. Contrary to common belief, the discoveries that shape the course of human civilization do not come about spontaneously, nor are they accidental findings. Instead they are, as a rule, the result of much tireless, ceaseless, and often disappointing prospecting through the realm of the unknown, that realm which holds such a fascination for human nature.

The fields of medicine into which chemical research delves are as numerous as the ailments known to man. To discuss the progress of chemistry in all these fields would be an impossibility. Few discoveries have been as widely publicized as the recent work on sulfanilamide, sulfapyridine and related compounds, which show remarkable powers in combating certain ailments such as pneumonia, etc. Some have been so bold as to predict that the day will come when all infectious diseases may be brought under control through compounds of the sulfanilamide type. There is a certain fascination in tracing the progress of the work on sulfanilamide, particularly since that progress is entirely typical of the methods of modern research.

As early as 1909 it was known that a certain azo dye showed some protective action against mouse septicemia caused by the hemolytic streptococci. In 1913 and again in 1919 certain other azo dyes were found to have bactericidal properties to some degree. Researches continued along this line for a number of years. Finally in 1935 a careful study and evaluation of results revealed that the dyes which were effective possessed in common one structural unit, which might be resolved in the animal system into sulfanilamide. It was only fair to presume that sulfanilamide itself was the active substance. Tests showed that this presumption was correct. This was the cornerstone in the foundation of the fast developing sulfanilamide therapy. The molecular architecture of sulfanilamide and related compounds was subjected to the minutest scrutiny with the hope of discovering the secret of its effectiveness. Hundreds of compounds built on the basic formula unit, have been synthesized. Of these hundreds only a few possess a high degree of effectiveness. But these few have amply repaid the ceaseless efforts involved in their discovery. Dramatic recoveries have

ers, while Carden and Francis led the cadet attack with two hits apiece.

Score by innings:
 Boston 2 4 0 0 1 1 1 1 0—10
 Aggies 0 0 0 0 0 0 0 5 0—5
 Batteries—Aggies: Bumpers, Peden and Carden.
 Boston: Carnet and Masi, Andrews.

Hort Department To Have Exhibit at Dallas Flower Show

The horticulture department will have an educational exhibit on propagation at the Gardens of America flower show to be held at Dallas from March 29 to April 16.

The exhibit on propagation will be placed with other educational exhibits at the show. The propagation exhibit will consist of actual nursery stock, showing methods of budding and grafting at the time the buds and grafts are put in. Then there will be other stages of growth, showing the grafts as they have grown for one or two years. Along with this, there will be an explanatory legend.

The Gardens of America is a flower show celebrating Dallas' one hundredth anniversary. There is expected to be an attendance of 100,000 persons. One day or several days will be dedicated to university and college attendance. The horticulture department is planning to take students on an inspection trip to the flower show on Saturday, March 29.
