Defense Needs Cause Increase In Dairy Products

Progress in the program to increase dairy and poultry products in the United States in order to provide an adequate supply of these foods for domestic needs and to feed Great Britain during the war crisis, was discussed Monday with the headquarters staff of the Texas Extension Service by two Extension Service officials from Washington on the campus of A. & M.

W. E. Wintermeyer, senior dairyman, and C. A. Sheffield, field agent for the Extension Service, U. S. D. A. in 13 Southern States gave some details of the set up of the British food mission in this country and the response to the request of the Secretary of Agriculture for an increase in dairy and poultry products. Texas has increased her milk production 17 percent over last year, mainly through better feeding. It is estimated that there will be approximately 12 percent more laying hens in the state this fall than at the corresponding time in 1940.

Sheffield said that in normal times Great Britain imported 65,000,000 shipping tons of agricultural products, and the minimum requirement under war conditions would be 22,000,000 tons. Britain had fixed her needs for cheese in the next year at 250,000,000 pounds and powdered milk at 200,000,000

More than one-tenth of all the people in the United States depend directly on cotton for their living.

Student Directory Distributed

The student directory for the second semester of the summer session is being distributed with this issue. The directory includes the list of the faculty and students who are on the campus during this semester.

pounds. The output of cheese in the United States in 1940 was 650,000,000 pounds.

Wintermeyer pointed out that milk production in the United States in 1942 may reach a peak of 120,000,000,000 pounds, but he did not see any surplus in sight. Apart from British needs, he said, domestic consumers could use 140,000,000,000 pounds if the full potentialities of the home market were used. Moreover, Europe will have to be fed after the war, and he added, it is likely seed stock will have to be furnished to dairying countries like Denmark and Holland, whose herds have been greatly depleted during the past year.

The Extension Service officials are making a tour of Southern states.

HUT-SUT SONG—

(Continued from Page 1)

nically in a modest-known sort of way, but McMichael was hitting on all cylinders in the radio world. Now, all three of them are basking in the light of Fame Fortune. Leo has become the "piece de resistance" of the town of Sacramento, where he lives. He's a lawyer of the Sacramento State Legislature, and they're so proud of him they accept his word as law—which helps his political position no end. Not that he needs help. He's a good lawyer.

How the boys got the song published is one of those things. Jack took it to two publishers who turned it down for the very legitimate reason that it was "a silly song." Then Jack took it to Alan Ross, Music contact man in Los Angeles; Alan too it to Walter Schumann, music contact man in Los Angeles. Walter Schumann got bitten by the "Hut Sut" bug and considered going into the music publishing business on the strength of this one song. He did, and has never regretted it.

The boys took the song over to Freddie Martin, who became Hut Sut conscious and introduced the song on his broadcasts from the Coconut Grove. Freddie hasn't regretted it either. Neither has Ted McMichael. About the only people who regret it are those who sard singing it and can't for the life of them get the catchy tun and garbled words out of their minds.

As for the phrases being Swedish, about the only resemblance they have to the Swedish is this—the "rillerah" is a stream that runs through some Swedish colony in a town in the middle west—the boy thinks it's Minnesota. From there on, the gibberish is on its own—and doing right well.

NYA Experience Helps 310,000 Men, Women Obtain Industrial Employment

More than 310,000 young men and young women who got their practical experience on NYA projects will have obtained jobs in private industry during the current fiscal year which ended June 30, according to estimates made public today by Aubrey Williams, Administrator of the National Youth Administration.

Williams said these estimates were based on reports which showed that 151,949 NYA youth got jobs in private industry during the 5 months period December 1, 1940, to May 1, 1941. Many of the placements were in national defense industries.

"The record of the National Youth Administration in placing such a high percentage of young people from its work projects in private employment is a clear indication that our program is geared to provide youth with the kind of practical experience that private industry, especially the defense industries, want. At the same time this record is a testimonial to the efficient functioning of the state employment services through whose cooperation many of the jobs for our NYA youth were obtained," Williams said.

Williams revealed that of the 151,949 young people who are known to have obtained private jobs during the 5 month period

Aggies Now Flying for Uncle Sam

Jayton, Texas

Texas A. & M. continues to add trained personnel to the armed forces of the United States. Pictured above are four more Aggies who have recently received commissions as second lieutenants in the United States Army Air Corps. They are left to right, David L. Silverman, '39, Longview, Texas; Herbert A. Underwood, '40, Amarillo, Texas; Frank M. Wood, Jr., '40, San Angelo, Texas; and Harvey P. Robinson, '42, Jayton, Texas.

LOCAL ALUMNI—NYA Program For National Defense Experience Begins New Operation

(Continued from Page 1)

third vice-president, C. H. McDowell; and each man present voted his choice for ten directors for the club. The results of this election had not been tabulated today, but officers promised an announcement when the count is completed. The directors will write the constitution and by-laws of the organization, and a program will be launched at once to secure membership applications from the entire 500 men who live in Brazos county who either have graduated or attended Texas A. & M. College.

In a spirited election contest Caesar (Dutch) Hohn defeated Herschell Burgess for sergeant-at-arms in a photo-finish. Levity for the occasion was furnished by C. H. McDowell who made pointed reference to actions of Pink Downs in Temple, former home of both men. And Mr. Downs came right back with an exhibit of a prize watermelon grown by Mr. McDowell at the Blacklands experimental station at Temple. The melon was "just what the doctor ordered" except for size.

As soon as the membership of the Board of Directors is ascertained by the vote count, a meeting will be held and plans will be laid for the Brazos County A. & M. Club to assist in entertainment of members of the boards of the former students association and the college directors on the A. & M. campus on August 30 and 31, when a joint meeting is scheduled.

It was the intention of the founders of the club to have the largest and liveliest A. & M. Club in the state—and Monday's organization meeting indicated that the goal soon will be attained.

A California scientist says inexpensive substitutes for novocain, antiseptics, and possibly sulfanilamide and its derivatives may soon be made from corncocks, oat hulls, and other farm waste materials.

United States farmers using electricity doubled during the decade 1930-1940.

A new national defense work experience program of the National Youth Administration, designed to fit young people for jobs in defense industries, was put in operation July 1, NYA Administrator Aubrey Williams, announced. The new defense program for which Congress appropriated nearly \$60,000,000 will be carried out jointly by the National Youth Administration, the State Employment Services, and the Public Vocational School Systems.

This new effort, the "Youth Work Defense Program," for which the Congress appropriated \$60,000,000, will supplement the regular out-of-school work program of the National Youth Administration.

The immediate objective of the Young Work Defense program, which is headed up in the Federal Security Agency by Colonel Frank J. McSherry, is to prepare approximately 368,000 different young people for jobs in vital industries during the fiscal year starting July 1 and ending June 30, 1942.

In addition, under the regular out-of-school work program of the National Youth Administration it is expected that a monthly average employment of 200,000 youth will be maintained during the year. The primary purpose of the regular out-of-school work program will continue to be to provide young people with practical experience which will fit them for jobs in private employment.

Under the new defense program all NYA workers will register with the Bureau of Employment Security, through its state employment services, which will help to determine their qualifications for the work to be done. Youth who make application to the employment service for defense jobs, who are in need of work but who lack the experience and training required for defense industry employment, will be referred to the National Youth Administration.

Work on the regular out-of-school program will also be geared to the needs of national defense but will include a broader category of operations and types of work than will be undertaken under the specialized defense program.

Related training and classroom instruction carried on in connection with both the new defense program and the regular out-of-school work program will be provided by the Public Vocational School Systems. Related training on the regular program will include instruction in subjects such as blueprint reading and shop mathematics which have a direct bearing on the occupation for which the youth is preparing. The related training on the defense program will be more highly specialized, in terms of the specific field involved.

existing in shipbuilding, aviation, and machine tools, by preparing young people to do specific jobs in those industries. In the near future, according to Colonel McSherry, there will be a demand for operatives to do the work in small arms and munitions plants and preparation of workers for jobs in these industries will be included in the new program.

At the present time the National Youth Administration is operating approximately 5,500 workshop production units which contain more than 90,000 work stations. Of these, several thousand workshops, comprising 35,000 work stations, will be devoted to the new defense program. Included in the work stations being made available immediately by the National Youth Administration for use in the new defense program will be more than 9,000 providing experience in machine shop work, more than 8,000 in sheet metal work, more than 4,000 in welding, more than 1,900 in pattern making, 1,100 in electrical work, and 1,000 in radio. Other types of work stations to be used under the new defense program are those in aviation mechanics, forge, foundry, and industrial sewing. The remaining 57,000 work stations and NYA workshops will be utilized in connection with the regular out-of-school work program.

304 Distinguish Second Semester

A total of 304 students of Texas A. & M. College earned the rating of Distinguished Students during the second semester of the past school year by having no grade below a C and making a grade point ratio of 2.25. Acting Registrar H. L. Heaton announced this week.

A total of 14 of that select group came through with perfect records of 3.00 by making A grades in all their work. Included in the straight A group were: Joe W. Autry, Stephenville, junior in agricultural education; Robert L. Freeland, San Antonio, sophomore, in liberal arts; Don Gabriel, Fort Worth, junior in liberal arts; W. J. Galloway, Thorockmorton, sophomore in mechanical engineering; Sam R. Gammon, College Station, freshman in liberal arts; Thomas S. Gillis, Fort Worth, junior in liberal arts; Herbert S. Jacobson, San Antonio, freshman in chemical engineering; Robert F. Keller, Bryan, junior in agriculture; Angus McSwain, Bryan, freshman in civil engineering; William J. Montgomery, Mason, senior in petroleum engineering; George S. Sumner, Fort Worth, junior in electrical engineering; George R. Thenn, Jr., Dallas, sophomore in civil engineering; R. M. Warren, Frisco, junior in agricultural administration; and Robert B. White, Ennis, junior in science.

DR. WALTON—

(Continued from Page 1)

investigations in the utilization and marketing of cotton and cotton by-products. The committee agreed that it is essential to employ the best man that can be found for the important post and indicated that extreme caution would be observed in the selection of such an individual. It was made clear that the position would seek the man who finally is appointed.

SURVEY OF FACILITIES

After the selection is made, the cotton expert will be designated as director of the project and will be charged with the responsibilities of making a thorough survey of all existing facilities in the institutions of higher learning in Texas, as well as the personnel; and that these facilities and personnel will be utilized to the fullest possible degree in carrying on research projects under provisions of the bill. The bill was introduced into the Texas Senate by George Mofatt of Chillicothe and passed by the legislature.

ADVISORY COMMITTEE PLANNED

The committee agreed to coordinate projects set up by it with those now under way or in immediate contemplation at the several state institutions and other agencies engaged in research work in the field.

An advisory committee will be organized at the earliest practicable time, it was decided, and the committee of college presidents will confer with representatives of the State-Wide Cotton Committee of Texas in selecting the personnel of this advisory group. Dr. Walton was instructed to begin a search immediately for the specialist who will direct the program, and to organize the advisory committee at the earliest practicable time.

Complete List Of Texas Newspapers Published by WPA

Publication of the most complete list of Texas newspapers ever compiled was announced today by Mrs. M. K. Taylor, state director of community service programs for WPA in Texas.

Names, dates and location of publication, and current filing location of every newspaper published in Texas between 1813 and 1939 are included in the 293-page volume which was published under the sponsorship of the San Jacinto Museum of History Association. Copies of the book have been deposited in 300 of the nation's outstanding libraries and a limited number of copies are available for further distribution to public institutions by Ike Moore, director of the San Jacinto Museum, who represented the sponsoring agency in arranging for publication of the volume.

SENIOR RINGS—

(Continued from Page 1)

n before August 1 and also August 15 will be received in time for delivery on the night of registration day.

A representative of the manufacturer of the rings will be in the registrar's office every morning to help select the rings and make his orders. Senior rings will be available in three types of finishes—light Russian, dark Russian, and antique green. The rings come in a complete selection of weights ranging from 12 to 18 pennyweight. Prices for the rings according to weights are: 12, \$18.50; 13, \$19.35; 14, \$20.20; 15, \$21.05; 16, \$21.90; 17, \$22.75; 18, \$23.60. A three dollar deposit is required to make the order.

REGISTRANTS—

(Continued from Page 1)

tively low order numbers would be classified sooner than those who had received the higher numbers.

"I'd like to stress the fact again," General Page said, "that there isn't any difference between the treatment of the new registrants and the old registrants in any respect whatsoever. They are treated exactly alike. The same rules of deferment apply to both. Both have the same right of appeal. The interests of both are protected by the government in the same manner. And each case is considered individually when the registrant's order number comes up, regardless of whether he registered July 1 or previously."
