Deferred Draft Registrants Urged To Assist in State and Local Defense

All Selective Service registrants in Texas who have been deferred from military service were urged by General J. Watt Page, State Director, to offer their full assistance to State and local civilian defense agencies.

Many young men have been granted deferments because of their occupations, because they have dependents, or because they are not physically capable of undergoing service in the armed forces, General Page said. Nevertheless, he added, they are qualified to perform some work in connection with civilian defense activities and should offer their services to existing agencies or those which are being organized.

Aid in Emergencies

By granting certain men deferment, Congress, when it adopted the Selective Training and Service Act of 1940, gave no indication that it intended to excuse these men from the obligation which rests upon every young man—that of helping his country in times of emergency, General Page pointed out. Every man is expected to do his share, in one way or another, when a crisis threatens the national security, he said.

"Many of our young men have entered the armed forces, leaving at home others who for one reason or another have had their military training deferred. Those who remain owe it to those who have been called and owe it to their

Aviation Cadet Takes Last Ride Before Advanced Course

Winging high above the Texas plains, an Aviation Cadet takes a last ride in his low wing training plane before moving on to an advanced flying school for the final ten weeks of the Air Corps student pilot training course. Graduating from an elementary flying school ten weeks ago after mastering the rugged primary training airplane, this future officer pilot has since logged 70 hours aloft in the powerful plane he now flies and is ready for the single and multi-engine advanced training.

Randolph Field's eighth Aviation Cadet Class for 1941, 315 strong, graduates from this famed basic flying school on August 16, and late in October these student pilots will be ready to take their places as flying officers of the Army Air Forces.

Every five weeks finds new classes of American youths between the ages of 20 and 26 entering the 30-week course, destined to become military pilots. High school and college graduates are eligible for this training if they are unmarried and have normal good health. Two years of college excuses the applicant from the educational ex-

King Cotton Comes to Rescue In Silk Shortage

College Station Women Attention! Maybe the Japanese boycott isn't so bad after all. The Bureau of Home Economics of the Department of Agriculture announces that more than 150 different cotton stockings designs now are available. This is a result of investigation by the bureau at this Beltsville, Maryland research center. Three years ago Congress appropriated funds for the investigation of the use of cotton for women's hosiery.

According to Dora R. Barnes, specialist in clothing for the A. & M. College Extension Service, the designs vary from cotton web mesh for evening wear to plain knits in various weights for sports wear, and for around the house and garden. Several are in production and more will be soon. They are produced on a modern full-fashioned knitting machine and undergo severe laboratory and "field" tests for wearability, washability and appearance.

Surveys made in 1940 showed that 89 percent of the 16,200 full-fashioned knitting machines in the United States are suitable for knitting cotton as well as silk, while only 47 percent can handle nylon yarns. Last year, American women bought more than 43,000,000 dozen pairs of full-fashioned stockings. If these had been made from cotton, it is estimated that nearly 300,000 bales of long-staple fibre would have been required.

CUSTODIANS

Public Schools; L. B. Abbey, business manager of schools, Port Arthur; Capt. George Schauer, state department of public safety, Austin; V. M. Ehlers, director of division of sanitary engineering, State Board of Health, Austin; Gus Herzik, first assistant to chief engineer (Sanitary Engineer Division) State Board of Health, Austin; Walter Gutzeit, sanitary engineer, Crane Company, San Antonio.

Jobs Everywhere! Government Needs Trained Engineers for Defense Work

Business is booming! Evidence of this statement is found in the announcement that the United States Government through the medium of the Civil Service Commission is preparing to hire more trained engineers. Vacancies now exist for the position of Junior Inspector, Signal Corps Equipment, \$2,000 a year; Engineers \$3,800 a year; Associate Engineers, \$3,200 a year; and Assistant Engineers, \$2,600 a year.

Applicants for the position of Inspector of Signal Corps Equipment must have completed a full four-year course in Electrical or Radio Engineering at a practical experience in inspectional and/or testing work in connection with Signal Corps Equipment, Radio, Telephone, Telegraph, and power units, assemblies, sub-assemblies and component parts to determine compliance with specifications.

Applicants for the positions of Engineer mentioned must have completed a full four-year course leading to a bachelor degree in engineering and in addition must have had five years, three years and two years respectively of professional engineering experience. Persons who have not completed a full four-year course at a college or university of recognized standing may substitute experience year for year for the education which is lacking, which substitution must be in addition to the five years,

3 years or 2 years experience mentioned. Persons who have had experience on irrigation projects are particularly desired at this time by the various departments of the Federal Government.

Appointments to these positions are being made from day to day and immediate appointments will be made until the needs of the service are met. An excellent opportunity is afforded qualified persons to be of assistance to the Federal Government in connection with the National Defense Program in connection with these positions. Qualified persons are urged to see the Secretary of the Board of U. S. Civil Service Examiners at the Post Office immediately and secure the necessary application blanks and forms. Detailed information regarding these positions may also be secured from the Secretary at the Post Office.
