Fires Seriously Threaten Defense Production-Hall

AUSTIN, Feb. 11—Reports of fires during January to Texas Fire Insurance Department, described as revealing a serious increase in the number of fires, prompted Marvin Hall, State Fire Insurance Commissioner to issue an appeal for greater individual effort in fire prevention.

"Fires constitute one of our most serious threats to nations defense and our nation's all-out war production," he asserted. "As an individual contribution to our own welfare, as well as the welfare of our country, it behooves each of us to assume more personal responsibility in fire prevention now.

"At a time when all material resources are so vital to our nations industrial production, we can ill afford to allow any of it to be destroyed by fire because of carelessness. Any destruction of our resources, whether it be food, clothing, raw or manufactured materials, homes or other property, places an additional handicap on wartime effort. We must curb the economic toll exacted by fire."

Opinion is the queen of the world.—Pascal

Question of the Week: Would you rather go back on the old schedule under Central War Time than continue on the "late" schedule adopted last Monday?

"Chuck" Chalmers, G Field Artillery—Personally, I wouldn't. As things stand we still get as much sleep as we normally did before. If we started getting up at 6:15 War Time, it would mean a cut of one hour in the amount of sleep that I'm accustomed to getting, and, man, I enjoy my sleep. An hour cut from my sleeping schedule would probably mean that I would make it up in class.

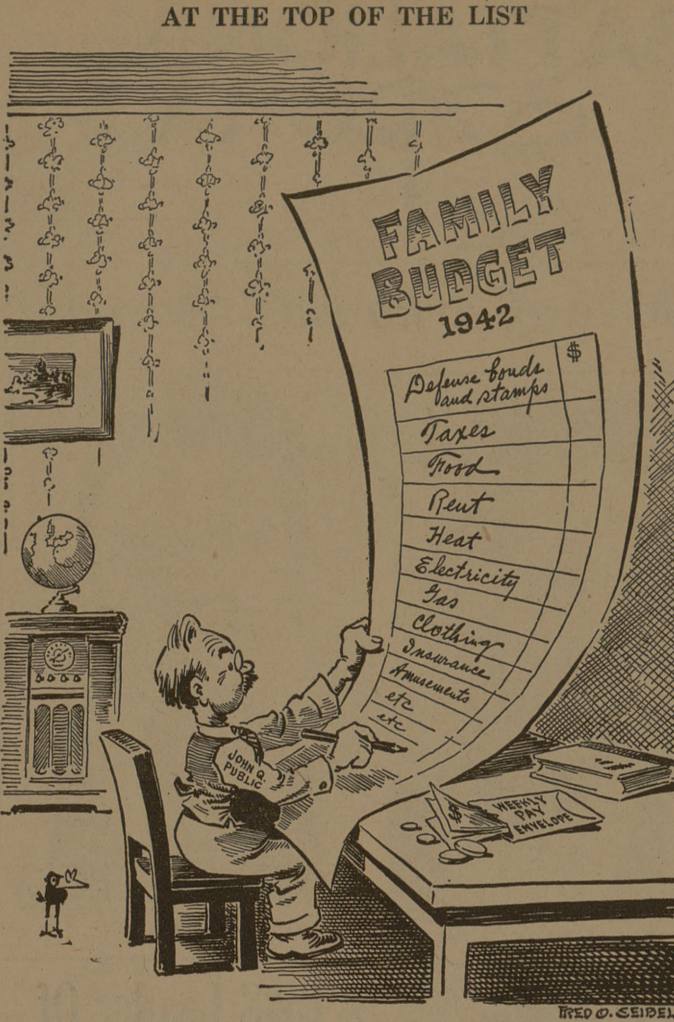

R. W. Ruisinger, A Infantry—Yes. I would rather go back on the old time schedule, because those who wish to hitch-hike somewhere are forced to start an hour later under the new schedule.

W. A. Phillips, B Cavalry—I would rather go back to the old time schedule because there would be less confusion with the surrounding environment.

You are invited to witness the Most Amazing TRACTOR DEMONSTRATION

Ever Held In This Locality!

A Revolutionary New Principle in Modern Tractor Farming

Your eyes will pop wide open when you see the FORD TRACTOR with FERGUSON SYSTEM in action. You won't believe that any one tractor can do all the things this tractor actually does until you see it perform. It puts to shame and out-maneuvers old-style tractors half again as big—brings a new era of profitable farming, at surprisingly low cost.

Profit By Seeing These Free Demonstrations:
Main Agricultural Experiment Station Farm, 1/2 Mile West of Campus. Arranged especially for A. & M. Students and Faculty

Four Big Days - - - Monday, Tuesday, Wednesday, Thursday

Demonstrations beginning 10 A.M. and 2 P.M. Come and see this surprising Tractor at work

In the interest of increasing war-time farm production these demonstrations are being conducted under the auspices of The Agricultural Engineering Department
