the statement that Texas A. & M. College is the only school in the United States having all nine branches of the service represent-

ed in its Reserve Officer program. Directing administrator since 1925 of the Lone Star State's oldest institution of higher education is 58-year-old Texas-born Thomas Otto Walton, educator in the rural schools of deep East Texas at the age of 16. A free thinker on matters educational throughout a lifetime devoted to increasing helpful knowledge of fellow Texans this determined philosopher still takes his place in the classroom despite Ninety days after Pearl Harbor pressure of manifold duties. Dr. the Agricultural and Mechanical Walton's class in Administration

Up from the ranks of rural school—is operating under a sys-school teaching, through vocationtem of significant streamlined re- al agriculture work, a pioneer extension disciple of Dr. Seaman J. "The Government needs officers, industry needs technicians and agexperts. It is our duty to provide them. A. & M. is at war, and will

"This war has changed our ideas about many of the so-called 'basic theories'. A battleship cannot survive without aerial protection. Infantry troops cannot stand against

"It is my belief that peace will

not bring a resumption of the 'old order'. We never again shall operate under the rules of the game as we knew them before this war. doubt whether education ever will be the same. Educational programs will have to be kept flexible enough to meet the demands of the future, and it is a blessing. Some ideas and practices needed a thorough stream-lining. This modernization is being brought about by the war. Higher educational institutions in the peace to come, must prove their value or perish. The changes we have made only indicate the progress to come."

The chronological list of events marking A. & M.'s active support of the Government in the present crisis reveals what long-distance planning and a clear-cut understanding of the problems at hand have accomplished.

War Time Log of A&M

1. May, 1939-Board of Directors authorize President T. O. Walton to offer entire college personnel and facilities to the Government in any needed capacity.

2. June, 1939—Campaign launched urging Texas high school boys to enter institution where military training and high scholastic standards would better equip them for civil life in peace or

3. September, 1939—Civilian Pilot Training program launched for A. & M. students with overflow enrollment.

4. June, 1940—Second campaign urging Texas boys to enter college resulted in record-breaking enrollment in September, 1940. 5. July, 1940—Facilities for National Defense Cooperation of A. & M. and its branch colleges set forth in brochure and presented to Government and State officials and libraries.

6. July and August, 1940—College Directors appropriate \$10,000 for improvement of Easterwood Airport, and in February, 1941, appropriate \$14,000 more. In the meantime Civil Aeronautics Administration contributed \$150,000 in grants of December, 1940, and August, 1941. Coupled with Works Progress Administration grant of \$131,000 in January, 1941, the College now has a \$305,000 airport nearing completion and in use at present time.

7. September, 1940—School of Aeronautical Engineering inaugurated under direction of Dr. Howard W. Barlow. (School instantly popular and equipment, enrollment and accomplishments to date place it among the finest in the United States in shortest time).

8. May, 1941—At request of War Department graduation of seniors holding Reserve Officers Training Corps contracts moved up two weeks, and 535 commissioned officers went into active service. (This brought the total number of commissioned officers graduated from Texas A. & M. to more than 5000 since establishment of the Officers Reserve Corps in 1920.)

9. February, 1941—To remedy acute shortage of trained men in National Lefense Industries, special courses in camp sanitation, civil engineering, materials testing and inspection and engineering drawing were launched at the College, cooperating with U.S. Office of Education. To date 3000 men have been trained in 65 courses, all over state.

10. March, 1941—Continued demand of industry for trained men puts A. & M. shops and laboratories on a 24-hour-a-day basis for training machinists, welders, tool and die workers and specialty engineers. Twenty-five new courses soon will start for an estimated enrollment of 1000 additional specially trained industrial experts in several Texas cities.

1. January, 1942—College goes on year-round basis of three 16-week semesters, cutting to two years and eight months elapsed time necessary to complete four-year course for degree, without lowaring academic standards.

12. January, 1942-Special courses added to college curriculum to fill war needs.—Examples—Chemistry of powder and explosives, camouflage, and subsistence management for prospective 13. Chemical Warfare Service school inaugurated by War

Department at A. & M. to train selected OCD leaders in handling all phases of civilian defense in emergencies. (A. & M. school one of several which will serve entire United States.) 14. February, 1942-A. & M. designated as Key Center of

Information and Training for wartime duty of keeping one million Texas inhabitants informed on war policies and to promote civilian morale.

15. February, 1942—A. & M. requested by War Department to install senior R.O.T.C. Quartermaster Corps and Ordnance Units to train minimum of 200 officers for army service in addition to the 1064 already holding R.O.T.C. contracts in Infantry, Field Artillery, Coast Artillery, Cavalry, Signal Corps, Chemical Warfare and Corps of Engineers. (A. & M. only college having all eight branches of armed forces in officer-training program.)

16. February, 1942-A. & M. Association of Former Students pledge aid in establishing major aeronautical engineering research center at College Station comparable to facilities at Langley Field, Va., and Sunnyvale, Calif. Movement launched to provide initial funds before State and Federal appropriations are sought to expand facilities for aeronautical research.
