## Announcement Is Made for Defense Training Course

The program for the new series of National Defense courses being offered in Houston by the A. & M. College has been issued by J. T. L. McNew, institutional representative for A. & M. The first series of courses have been favorably received in Houston and these new courses are expected to be even more successful.

This new series will consist of some twelve courses, including subjects in mechanics, structural designing, materials, drafting, and aeronautical and marine engineering. All these courses are of college grade and have been selected primarily to meet the demand for technically trained personnel.

Prerequisites for these courses vary from high school graduation to two years of college training. In some cases practical experience will be accepted. Some of the courses are refresher courses for men who have had the work, and who wish to bring their training up to date, while others are elementary courses to be used as prerequisites or as primary training.

qualify as a National Marksman with the military rifle; and among the many records she holds she has the distinction of shooting at 2,000 regulation trap targets and hitting 1952 of them. This is a world's record for both score and number of targets shot in one day by either man or woman with a shotgun.

Mr. and Mrs. Topperwein are friends of long standing with Lieut. Col. Boles, infantry. Lieut. Col. Boles says that Mr. Topperwein can shoot at a target with his automatic rifle and then turn and hit the ejected shell before it strikes the ground, and this is just one of the unbelievable feats that Mr. Topperwein can perform with his rifle.

This great shooting team is giving this exhibition Saturday evening beginning at 2:30, the public is invited.
