Rehabilitation Planned for All Physical Rejects

Steps are being taken toward the physical rehabilitation of all Selective Service registrants in Texas who have been rejected for military services because of active or inactive tuberculosis.

"To the Nueces County Tuberculosis Association, with headquarters and principal clinic at Corpus Christi, goes the credit for taking the lead in a proposed state wide program for providing free medical attention for all registrants who have been rejected by their local boards or by the Army Examining Boards because of tuberculosis.

General Page said that the Nueces County Tuberculosis Association, which is staffed by volunteer physicians and has one full-time nurse for home calls, will work with the local Selective Service boards of that county and with the State Health Officer in its rehabilitation program.

"Registrants, on their part, should realize their obligation for duty to their country and should avail themselves of every possible means to make themselves fit to serve. It is recognized that some of these men cannot be cured to the extent of qualifying for military service, but certainly they owe it to themselves and to their families, as well as to the betterment of the general health of this state, to apply for medical treatment," the director declared.

It will be required that all information furnished by the local boards to bona fide tuberculosis associations or clinics cooperating in the program shall be held in strictest confidence, General Page added.

Musical Meanderings

By Murray Evans

I'm doing this piece about Bing Crosby mainly because he's such a national favorite and because most any out-landishly nice thing I might say about him will go unchallenged.

But when Crosby did it the listening public sort of gulped and wanted to know whoever started calling it hill-billy in the first place. And then big bands began arranging it and playing it to death—a fate to which all popular tunes are susceptible.

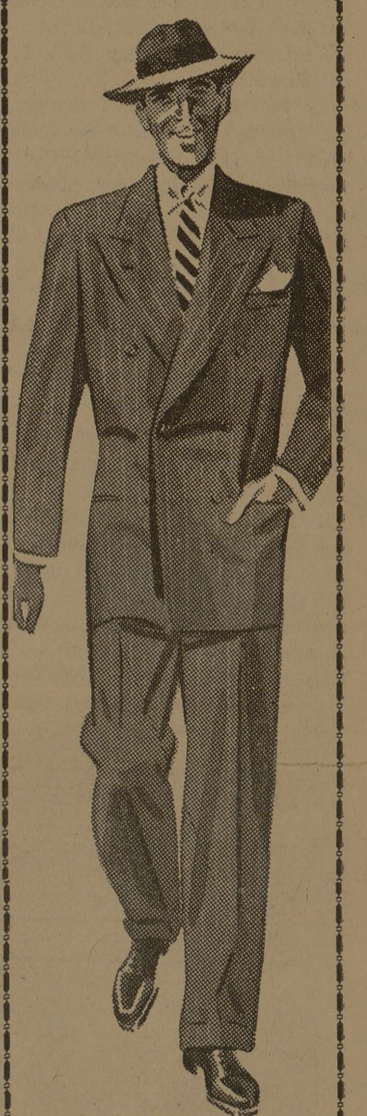

Two months ago he did an old stand-by, "Melancholy Baby," long since shoved back into the discontinued library. And he sang it with only two violins, a guitar, and a bass back of him. But it was so good that he has had to do it twice since, with the same set-up as the first time. It's strictly first-rate.

But most of all, Bing is capable. Probably no other popular singer has ever possessed a wider voice range. Remember how he took the difficult "Sunrise Serenade" in stride? Then there is "Serenade In Blue", on most singers taboo list because of its extremities in the high and low. Bing does it without batting an eye—even better than you think you do mornings in the bath-tub.

When Crosby does a tune, then it's made. He bars nothing, hill-billy, lullabies, folk tunes, or what have you. Just last week he did "Deep In The Heart of Texas." That particular number doesn't even have a bridge, consists of one repetitious tune, and got itself branded as hill-billy from the start.
