school, joined the U. S. armed forces recently . . . Traveling with the Fish baseball squad is more fun than a midnight joy ride . . . Singing, dancing—yes dancing, shimmy, fighting and every other thing on the face of this earth took place in the to-and-fro journey from Baytown and College . . . For their good behavior, the freshmen enjoyed a good track meet yesterday in which each Fish ran some five laps as prescribed by Coach Bill Buchanan . . . Incidentally, Bill stopped off at Houston and received assurance from the Navy Department that he will not be called into service if he quits school this summer to play professional ball . . . Buchanan is in the Naval Reserve . . .

## NEW FISH SAVE MONEY BY LOUPOT PLAN

J. E. Loupot, '32, made a statement yesterday which should be of extreme importance to all of next semester's freshmen as well as all present undergraduates.

Loupot presented a plan which will save money for all of the incoming students to a great extent; this plan has already been introduced to the present student body and has proved to be a great success and should be greatly appreciated by the incoming freshmen.

The new freshmen should not be forced to spend all of their hard earned money on new books and materials and uniforms," Loupot said. "However, in the past they have been forced to do this because they didn't know the ropes. This needn't be the case from now on.

"Freshmen should be sure before they buy. They want to know that they have the right books. By the time they go to class, though, and get back to my store, the second hand books which were available at a greatly reduced price are gone."

"My suggestion, a suggestion which the upperclassmen should take back to their friends who are planning to enter A. & M. in June, is simply this: Instruct the new fish to buy their books and other equipment BEFORE they go to class the first time. If it so happens that these books aren't what are called for by the profs they can exchange them at my store without any loss. I'll give them exactly what they paid for them at the time of purchase providing they bought the books from me."

"Remember: Trade with Lou, He's Right With You."

# Library Acquires Prized Editions of Raymond Earl

The Cushing Library at A&M has acquired 676 volumes of Pearl Reprints, a collection made during a long period by the late Dr. Raymond Pearl, and covering many aspects of biology and genetics.

The large collection, which is considered by scientists as one of the outstanding scientific collections in the world, was purchased by the Agricultural Experiment Station, a division of A&M, from the executors of Dr. Pearl's estate.

Dr. Pearl was a world-renowned authority on many subjects but is best known for his works in genetics, population, economic statistics, eugenics anthropology, human inheritance and public health, sanitation and hygiene.

Formerly head of the poultry division of the Main Agricultural Experiment Station, Orono, Maine, he was on the staff of Johns Hopkins University, Baltimore, Md., at the time of his death.

Dr. E. P. Humbert, head of the genetics department, worked with Dr. Pearl at the Maine Experiment Station in 1912-13 and he was instrumental in having Dr. Humbert's master of science thesis printed abroad where it received widespread circulation.

Dr. B. L. Warwick, geneticist in range animal industry, Agricultural Experiment Station, and Dr. Humbert both were highly pleased that the college has acquired the Pearl collection.

"Such an addition to our reference books in the library will make it an exceptional source of information for scientists of the Southwest. A&M was indeed fortunate in being able to acquire the collection and much thanks is due Dr. Warwick for his work in consummating the purchase of the books," Dr. Humbert said. "It is invaluable and could not be duplicated. There is nothing like it anywhere," he added.

The collection covers many subjects with the number of volumes as follows: Anatomy, 12 v; Author index, 45 v; Animal genetics, 39v; Biology of death, duration of life, 11v; Cytology, 17v; Economic statistics, 47v; Eugenics anthropology, human inheritance, 61v; Evolution 41v; Experimental zoology, entwicklungmechanik, surgery, growth, 40v; Financial, 11v; Hair,

2v; History of science, 41v; Marriage and divorce, 1v.

Morbidity statistics and general epidemiology, 27v; Mortality statistics and pathology, 32v; Natal-ity statistics and child welfare, 4v; Physiology, 34v; Plant genetics, 41v; Population, 33v; Psychology, 13v; Public health, sanitation and hygiene in general, 23v; Rodent and related literature, 25v; Rodent literature index, 2v; Seedlings, 1v; Sex, 13v; Other statistics, 7v; and miscellaneous, 61v.

## Dispatch from Island Tells of "Bull" Moore's Activities Under Fire

The first dispatch to come from the fortress of Corregidor since the fall of Bataan had news of Aggicland's former commandant, Maj. Gen. George F. Moore, who is in command of the island fortress.

During a lull in activity on Corregidor, Dean Schedler, who is the Associated Press representative on the island, made an inspection trip with General Moore and his aide, Maj. Robert Brown of Erie, Pa. Schedler had this to say about General Moore: "He has gained the highest respect as a leader. Since the start of the raids he has been one of the first to tour the bombed areas, passing word to men in gun positions and other vital jobs."

# Model Airplane Week Set For June 22-27

The week of June 22-27 will be Model Airplane Week, Dean Gibb Gilchrist of the School of Engineering announced today. During this week instruction periods will be arranged, conferences will be held, and various model plane contests will be held at College Station and at other points in the State co-operating in the movement.

Dr. Howard W. Barlow, head of department of Aeronautical Engineering, will be the director. The department of industrial education will be in charge of instruction.

"The present war will be won in the air," Dean Gilchrist said. "Model airplane builders the nation over are co-operating with our army and navy in constructing models and in designs. Model Airplane Week is just another important step in A. & M.'s participation in the war effort."

The department of aeronautical engineering, completing only its second year, has more than 500 students enrolled. Its progress has been so rapid that college authorities, backed by the association of former students, have given considerable impetus to the aeronautical research center which has been created at College Station, and for which plans of great expansion are under way.

Details of the week's activities centering at College Station, with others scheduled for many points in Texas, will be announced later, after co-operating agencies have been brought in, Dean Gilchrist said.

# Doc Lipscomb '07 Has Played A Prominent Role in Aggie Life

Owning and operating Lipscomb's Pharmacy, which has recently been remodeled, is S. A. "Doc" Lipscomb, '07, an Aggie-Ex who has been an ardent worker and supporter among Aggies since he was first associated with A. & M. in 1903.

"Doc" Lipscomb was born in Franklin, which is in a neighboring county, and has lived in and around College Station most of his life. He came to A. & M. in 1903 and started, like every other Aggie, as a fish. Back in those days there were four dormitories, Ross, Foster, Pfeuffer, and Austin, and life was entwined among some 500 Aggies, all in the Infantry. Remembering, "Doc" remembered that there was only one Bull, Captain Avery, and that he couldn't see everything.

A real baseball player, "Doc" played baseball here and lettered three years. He played in the Gulf Coast, Southern, and International Leagues and held both infield and outfield positions.

An avid sports fan he has attended all but one Thanksgiving game since his college days. He was too far away to come to the game he missed, which was some 23 years ago. Annually Lipscomb's

Pharmacy presents the captain and the most valuable player of each of the four major sports with awards. This custom is one of the ways in which "Doc" places himself affectionately in and among Aggies of all classes.

Truly "Doc" Lipscomb is a real Aggie and has endeared himself in the eyes of Aggies through his deeds of many years of close connections with them.

# "Let'er ride!"

**RODEO OR RANGE—TOP-HANDS AGREE: "THERE'S NOTHING LIKE A CAMEL"**

"AFTER A REAL TOUGH RIDE, believe me, nothing hits the spot like a Camel," says Steer-Riding Champion Gene Rambo (below). "That full, rich flavor is great—and no matter how much I smoke, Camels always taste swell. What's more, the extra smoking in Camels is mighty welcome economy."

**GRAND CHAMPION ALL-ROUND COWBOY FRITZ TRUAN** also has a Saddle Bronc title to his credit. Wherever the riding is the roughest . . . you'll find Fritz in action—and, if not riding, he'll probably be enjoying a Camel (above). "Camels are extra mild. I've smoked 'em for 10 years," says Fritz.

"LESS NICOTINE in the smoke makes good horse sense to me," explains Bareback Bronc ace Hank Mills (left). "Camels have the mildness that counts. They've got the flavor, too." Everywhere you go, it's the same—for extra mildness, coolness, and flavor, there's nothing like a Camel—America's favorite.

The smoke of slower-burning Camels contains **28% LESS NICOTINE** than the average of the 4 other largest-selling cigarettes tested—less than any of them—according to independent scientific tests of the smoke itself!
