Defense Course In Surveying, Mapping To Be Offered Soon

Only Cost to Students Will Be for Lodging And Books; Cost to Be \$100

The Civil Engineering Department, in cooperation with the U. S. Department of Education, is offering a twelve weeks full-time defense course in surveying and mapping to start Monday, June 8.

The course will be of college level, and will give a thorough training in: Construction surveying, the principles of land surveying, the plotting of field notes, and the construction of topographical maps. Any person with a high school education or its approximate equivalent in experience is eligible for registration in this course.

There is no tuition charge and the only cost to the student is for room and board plus a small sum for textbooks and a few other minor items. The total cost to the student for the twelve weeks should not exceed \$100.00.

Those completing the course are eligible for employment as rodmen instrumentmen, or chief's of party. Salaries for these positions have ranged from \$100 to \$175 per month.

Application blanks and additional information concerning the course may be obtained from J. A. Orr, associate professor of civil engineering.

Health Officer Lists Precautions For Water Sports

Some timely advice to vacationists concerning the proper precautions to be used in water sports was released from the State Health Department today by Dr. Geo. W. Cox, state health officer.

It was pointed out that, in view of wartime restrictions, vacation pleasures are apt to be limited to excursions and picnics at nearby lakes, rivers, and ponds of unfamiliar depths and currents, and without the usual lifeguard supervision associated with beaches and commercial swimming pools.

"Swimming and water sports are beneficial to good health provided one's physical condition justifies this type of exercise," Dr. Cox asserted; "nevertheless, they possess dangerous possibilities if the rules of safety, through carelessness or thoughtlessness, are disregarded."

The state health officer outlined the following simple rules for bathing and swimming in safety:

1. At least one hour should elapse after a meal before entering the water.
 2. Upon the first indication of fatigue, come ashore and call it a day. Don't re-enter the water.
 3. If becoming chilled, leave the water immediately.
 4. Do not enter the water when overheated.
 5. Learn to float. This is most important.
 6. Never attempt to rock a boat in a spirit of fun.
 7. Never swim in water that may be polluted. Swimming close to or even a few miles below a sewage outlet is inviting the possibility of acquiring disease.
- "Excursions, picnics, and swimming parties contribute much to a healthy, happy, normal life, which is especially desirable at this particular time when the whole nation is tense and under a strain," Dr. Cox said. "It is by no means advisable to eliminate these excursions from our summer program, but it is important that they prove beneficial and not disastrous."

(Continued from page 1)
eral prominent speakers, and some sound films on interesting engineering topics.

Officers yet to be elected are vice-president, secretary, treasurer, reporter, and the secretary-treasurer for the society, which office belongs to the A. & M. Chapter this year. Denney was elected president at the annual banquet last year, and John Ball was elected junior representative on the Engineers Council; Dan R. Sutherland has been appointed senior representative. Other officers will be elected at the meeting Thursday night which will be held in the Civil Engineering lecture room at 7 o'clock.

To conserve fuel, Wellesley college will have a six weeks vacation next winter.

Ag Ed Department Training Men For Farm Reclamation

Reclamation of discarded farm machinery in fence corners and junk heaps of Texas farms soon will occupy attention of vocational agriculture teachers and their boys. Sixteen teachers have completed the first week of intensive training course learning how easily useful farm implements can be salvaged from the scrap iron pile.

Fred R. Jones, head of the Agricultural Engineering Department, and E. R. Alexander, head of the Agricultural Educational Department, of A. & M. College, are heading up the short course, with actual instruction in charge of E. K. Rambo, A. & M. graduate, now Arkansas Extension Agricultural Engineer.

The men who are working 44 hours each week actually repairing, painting and putting farm machinery back in service are: G. F. Keath, of Boyd; William T. Lawler, Lockhart; J. D. Franklin, Jr., Killeen; Glen Sybert, Frost; J. C. Parkes, Frisco; G. H. Bailey, Richland; W. H. Ratcliff, Sylvestor; W. T. Arthur, Itasca; John W. Thomas, Naples; H. S. Stanley, Jr., Midlothian; John O. Simpson, Moulton; M. S. Hammock, Blooming Grove; S. M. Ford, Honey Grove and W. E. Berry, Aldine.

J. E. Nelson and Gordon E. Burks, A. & M. graduates, are taking the course and are available for employment by schools having lost their vocational agriculture teachers, Mr. Jones announced.

Already it has been decided to hold a second farm machinery and tractor repair course to train more vocational agriculture teachers.

Lamberson, Dotson On Duty at Keesler

Two ex-Aggies who were commissioned as second lieutenants the day following graduation have reported for duty at Keesler Field, Mississippi, the nation's greatest Air Corps Technical School.

The men, Lieutenants Herbert F. Dotson, son of Mr. and Mrs. H. F. Dotson, 1436 Highland Boulevard, San Antonio, and Jack L. Lamberson, Jr., son of Mr. and Mrs. J. L. Lamberson, Nome, Texas, both were ROTC cadet majors here last year. They came to Keesler from Ellington Field, Texas.

Lieutenant Lamberson was associate editor of the college engineering magazine and a member of the American Institute of Mining Engineers (student chapter). Lieutenant Dotson was a member of the Ross Volunteers.

Married Men To Become Deck Officers at Present

The Navy has lifted the ban on married men becoming deck and engineer officers, it was announced today by Eighth Naval District Headquarters.

The Navy Department this week authorized the enlistment of married college graduates for the V-7 deck and engineering Naval Reserve Midshipmen courses leading to commissioning as Ensigns in the Reserve. Each married candidate for the V-7 course must, however, furnish a statement signed by himself and his wife attesting that his dependents will be adequately provided for during the period of his training.

College juniors and seniors who are married will not be considered qualified for the course under the new revision. Unmarried candidates for the Reserve Midshipmen's school must remain unmarried for the duration of their training. Currently the candidate enlists as an apprentice seaman and becomes a midshipman after one month's training.

Enlistments for the V-7 course are being taken at the Navy Recruiting Office, Room 304, Customhouse Building, and at the Office of Naval Officer Procurement, 217 Camp Street, New Orleans, La.

Gasoline Should Not Be Stored At Home, Hall Warns

AUSTIN, May 8.—With indications pointing to a possible nationwide system of gasoline rationing, Marvin Hall, State Fire Insurance Commissioner, warns against storage of gasoline at home.

"The storage of any quantity of gasoline at home," he said, "promotes extreme fire hazards. Gasoline, when stored and handled through the regular facilities of the oil industry and kept in standard tanks, is relatively safe and as a result safeguards incorporated in the design of equipment and the training of personnel over a long period of years. However, gasoline is a dangerous explosive if kept in all sorts of cans and make-shift containers, stored in basements and garages, and poured from open containers."

Hall explained that gasoline vapor, produced when the fluid is exposed to air, is highly explosive and can be set off by electric sparks or careless smokers. The vapor, heavier than air, may flow along the ground under buildings or into basements, to be ignited and flash back from a considerable distance.

"Fire insurance can be voided under the Texas standard fire policies," Hall asserted, "if gasoline is stored on the premises without a permit of consent from the insurance company. Thus, if stored gasoline contributes to a fire destroying the property insured, policies could not be collected if the insurance company had not granted permission for storage of the gasoline."

Students are in poorer physical condition when they leave the University of Minnesota than when they enter, says Wesley E. Peik, dean of the college of education. More than \$700,000,000 has been appropriated or allocated by the federal government for expenditures related to education during the year ending June 30, 1942.

So Long Ole Army ARMY LOU IS LEAVING YOU

The Great White Uncle says "The Army needs you, Lou," and ole Loupot is ready.

I'm ready 'cause all you boys have given me your business these past 3 years and have taken care of ole Lou in fine style. To me your friendship has meant more than your business; and I'm really going to miss all you army boys and I hope you miss me.

Drop in and see Mrs. Lou, and Fish Lou at the Trading Post. . . They will be glad to see you.

Be seeing you when the job is done!

J. E. Loupot '32
