A RESOLUTION DECLARING A NUISANCE EXISTS UPON THE PREMISES DESCRIBED IN THE INSTRUMENT HERETO ATTACHED AND MADE A PART HEREOF

BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF COLLEGE STATION, TEXAS: Section 1. That there is a nuisance existing upon the premises and each part thereof described in the instrument hereto attached and made a part hereof. Said nuisance being of such a nature as calculated to unduly cause a fire hazard or a hazard from a health standpoint or both, injurious to the City of College Station or a large part of the said City and owners of said premises are hereby notified to appear at the next meeting of this City Council to be held on the _____ day of _____ at _____ o'clock p.m. in the City Office, to show cause why said nuisance should not be abated and show cause why, in the event said nuisance is not abated by said owner within five days after the _____ day of _____ the same should not be abated by the order of the City Council and the costs thereof assessed against said owner.

Passed and approved this 25th day of June A. D., 1942.

APPROVED: ERNEST LANGFORD, Mayor
ATTEST: S. A. LIPSCOMB, City Secretary

AN ORDINANCE REQUIRING WEEDS AND GRASS TO BE CUT UPON PREMISES AND THAT RUBBISH AND TRASH BE REMOVED THEREFROM: AND FIXING A PENALTY FOR FAILURE TO COMPLY WITH SUCH ORDINANCE, AND PROVIDING THAT SAME SHALL BE DONE BY THE CITY IN THE EVENT OF SUCH FAILURE AND PROVIDING FOR THE FIXING OF A LIEN UPON THE PROPERTY FOR THE EXPENSE INCURRED IN REMOVING AND DECLARING THAT ALLOWING WEEDS TO GROW AND TRASH AND RUBBISH TO ACCUMULATE TO BE A NUISANCE.

BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF COLLEGE STATION: Section 1. It shall be unlawful for any owner, lessee, occupant or any person in charge of any premises in the City of College Station to allow weeds to grow upon the premises, or trash or rubbish to accumulate upon said premises to such an extent as is reasonably calculated to create a fire hazard or calculated to be injurious to the health of the citizens of College Station, and either act is hereby declared to constitute a public nuisance.

Section 2. Whenever weeds are allowed to grow, or trash or rubbish allowed to accumulate upon any premises of the City of College Station as prohibited by this ordinance the City Council shall hear evidence and determine whether or not such accumulation of rubbish and trash or the

Uncle Sam's Aerial Might on Display

High over the single-engine pursuit school at Brooks Field, Texas, six advanced training planes (AT-6a's), piloted by graduating Aviation Cadets, stage a "peel-off." Streaking along at 200 miles per hour, the planes, in model formation arrive at a designated point, then one by one swoop to the left and plunge downward. This impressive aerial display, put the punch in the Cadets' flight for wings.

CCC Completes Over Nine Years of Work On Texas Forests and Natural Resources

When the Civilian Conservation Corps closed its books on June 30, it had completed 9 1/4 years of service in conserving the natural and human resources of America. During that period, CCC camps under the supervision of the U. S. Forest Service and the State Forester advanced the cause of forest conservation in Texas by at least a generation, both on the four national forests and on State and privately owned lands. A total of about 3,900,000 man-days of work was done, of which 60 percent was on State and private lands.

High lights of the work accomplished in Texas include the following items:

The CCC boys, in improving the physical facilities of the forests, built 3,330 miles of roads and over 7,000 bridges. They constructed 190 buildings and 8 large dams, 7,000 miles of telephone lines, and 226 miles of fences. To check erosion, they seeded or sodded more than 200,000 square yards of gullies.

Roads and telephone lines are important in fire protection. In addition, 101 lookout towers were erected, 459 miles of firebreaks cleared, and fire hazards reduced along 25,000 miles of roads. En-

forcement of laws, or both, are sufficient to constitute a nuisance as defined, and if they so find, they shall pass a resolution declaring that the growth of weeds or accumulation of trash and rubbish upon such premises, or both, constitutes a public nuisance, and shall order same removed by the owner, occupant, lessee or person in charge of the premises, within five days from the date such notice is given.

Section 3. In the event the owner of the premises upon which is located a nuisance as prohibited by this ordinance can not be found or served with a notice, and there does not appear to be any person in charge of such premises or occupancy, or in the event the nuisance is not abated by cutting the weeds and removing the trash and rubbish or either of them, as the case may be, then said nuisance shall be abated by the City of College Station at the expense incurred, which shall include salaries and wages of all employees, and reasonable charge for machinery and tools, vehicles, etc., used in abating said nuisance shall be a personal charge against owner of said premises and shall be assessed as a lien against the property on which said nuisance is located and removed therefrom, and shall be due and payable to the City Tax collector on the following tax paying period, that is, the first day of March following the date at which such nuisance is abated and failure to pay when so shall cause a ten per cent penalty to be added and same shall bear interest from the date the same is due at the rate of six per cent per annum.

Section 4. Failure to cut weeds and remove trash and rubbish or to do either of them when notified to do so, as set out in this ordinance by any party obligated to do so by this ordinance, shall be punished by a fine in any amount not exceeding fifty dollars (\$50.00) and each day that such nuisance shall continue after the time for abatement as herein set out shall constitute a separate offense.

Passed and approved this 25th day of June, A. D., 1942.

APPROVED: ERNEST LANGFORD, Mayor
ATTEST: S. A. LIPSCOMB, City Secretary

AN ORDINANCE LEVYING AN ASSESSMENT AGAINST CERTAIN PROPERTIES AND MAKING THE SAME A LIEN AGAINST SAID PROPERTIES AND PROVIDING FOR FORECLOSURE OF SAID LIEN IN THE EVENT THE SAME IS NOT PAID, AND ADDING A PENALTY FOR THE FAILURE TO PAY SAME.

BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF COLLEGE STATION: Section 1. That whereas, heretofore on the _____ day of _____, 19____, a hearing was had after due notice of the intention to take up consideration of the necessity for having a nuisance abated upon the premises hereinafter described at the cost and expense of the owner of said property as a lien, and whereas, at the time of said hearing no one appeared to contest same and said hearing was closed and it was determined that a nuisance existed upon each piece of said property and same should be removed and the costs thereof assessed as a lien against said property and as a personal charge against the owners thereof.

Section 2. Therefore, there is assessed against each of said pieces of property the amount set opposite thereof, and the same is made a personal charge against the owner of said property, whether the name in this ordinance is the name of the owner or not, and a lien is hereby fixed against each piece of said property for the amount assessed against same.

Section 3. In the event the amount so assessed against such property is not paid on or before the _____ day of _____, A. D., 19____, then per cent (10%) shall be added as a penalty and a suit to foreclose said lien shall be instituted, and said lien shall be foreclosed in any court having jurisdiction thereof.

Passed and approved this 25th day of June, A. D., 1942.

APPROVED: ERNEST LANGFORD, Mayor
ATTEST: S. A. LIPSCOMB, City Secretary

Scientists Needed By Government For Civil Service

The United States Civil Service Commission modified today the requirements of 4 types of scientific positions, in an effort to secure additional qualified persons for civilian work in Federal war agencies, both in the United States and abroad.

Appointments are to be made immediately in the fields of metallurgy, physics, meteorology, and chemistry. Appointees will work with specific problems in one of these fields. Most of these problems will be connected with some phase of the war program. Salaries for the positions range from \$2,600 to \$5,600 a year.

College teaching in metallurgy, chemistry, and meteorology is allowed as professional experience for any of the positions, provided that all other requirements for the grade under consideration have been met and that the teaching was carried on with the minimum rank of instructor. For physicist positions, the teaching of physics in colleges, high schools, preparatory schools, and trade schools will be considered as professional experience, with the same provision in effect. Completion of a 4-year course in the optional subject at a recognized college, with a minimum of 2 years of professional experience in the field of the option; or appropriate graduate study, is required.

No written test will be given. Applicants will be judged from their experience, education, and training. Applications will be accepted until the needs of the service have been met, and must be filed with the Civil Service Commission, Washington, D. C.

A notice was issued closing the acceptance of applications by the Commission's central office in Washington after June 29 for positions of Airport Traffic Control Examiner, Airport Traffic Controller, Airway Traffic Controller, and Trainee, Traffic Controller (Airway and Airport). Applications for these positions will be accepted after June 29 at the Commission's district offices in New York, Atlanta, Chicago, New Orleans, St. Louis, Seattle, and San Francisco. Announcements and forms for applying may be obtained from these offices.

For the scientific positions, announcements and forms for applying may be obtained from the post office at College Station, or from the Secretary of the Board of the U. S. Civil Service Examiners,

New Baptist Church Dedicated Sunday With Three Services

Organ Recital Feature Of Afternoon Program; Six Special Speakers Featured

Dedication services for the new First Baptist Church were held Sunday beginning with Sunday School services at 9:45 o'clock and continued through the afternoon services at 2:30 and the evening services at 7 o'clock.

Dr. W. W. Melton, executive secretary of the Baptist Board, was the principal speaker of the morning services, while R. A. Springer, A. D. Foreman, Dr. F. M. Law and Dr. T. O. Walton were the main speakers for the afternoon services. At the evening services, Rev. J. W. Marshall, State Baptist Student Secretary, was the principal speaker.

Albert Wiggins of Houston was the organist for the day and presented an organ recital at 2:30 o'clock on the church's new Hammond electric organ which is being purchased through the sponsorship of students, ex-students and friends of the church.

HILGER-GAY

(Continued from Page 1)
found in a tough spot as he was forced to play a two-faced role of loyalty between navy and army, but he came through with flying colors as both groups joined in the fun.

Seriously, both men challenged the future fighters to which they talked. Each emphasized the fact that to win all branches of the armed forces must pull together to achieve that end.

Ranchers Started Extensive Steps For Saving in 1941

Texas ranchmen have been getting ready for just such an emergency as 1942 presents.

With ranchmen and farmers engaged in the biggest food and feed production job in history as their part in total war, grassland which has been restored to former grazing capacity will pay off in livestock production this year, declares Howard Kingsbery, state AAA committeeman and ranchman from Santa Anna.

Practices carried out most extensively under the 1941 range conservation program, as in former years, include contour furrowing, deferred grazing, and eradication of noxious plants.

Cooperating under last year's program, 7,304 Texas ranchmen cleared 1,671,155 acres of prickly pear, cedar, mesquite and lechugilla. Of the total acreage from which noxious plants were cleared, 1,147,590 represented prickly pear while 381,548 represented cedar.

Approximately 282,583,971 feet of furrows, and spreader terraces were constructed. Object of these practices is to control water and keep it out of creeks and gullies, catch grass seed which otherwise would be lost, and help prevent erosion.

More than 4,689,638 acres were devoted to natural and artificial reseeding while approximately 11,470,224 cubic yards of dirt were used in construction of spreader ditches and earthen tanks on 3,378 ranches.

Resume of 1941 range program indicates 13,895 Texas ranchmen signed 62,462,200 acres under the program. Approximately \$3,695,366 were paid cooperators to offset heavy investments made in rebuilding grassland, Kingsbery said.

Humphrey Transferred For Flight Training Now at Pensacola, Fla

Joseph Roy Humphrey, who received his BS degree from A. & M. in 1941, was recently appointed Naval Aviation Cadet and was transferred to the Naval Air Station, Pensacola, Fla., for flight training, according to an announcement made by the public relations office of that station.

Humphrey, son of Allen A. Humphrey of Point, Texas, was sent to the Naval Reserve Aviation Base in Anacostia, D. C., the last of March. There he successfully passed the elimination training course the last of June.

Upon completion of the intensive seven-month course at "The Annapolis of the Air," Humphrey will receive his designation as a Naval Aviator with a commission as Ensign in the Naval Reserve or as second lieutenant in the Marine Corps Reserve and will go on active duty.

Architecture Department Wins Award

A&M Second School In Texas to Get ACSA Membership

Ernest Langford, head of the department of Architecture disclosed today that the department has been recently honored by being admitted to full membership in the Association of Collegiate Schools of Architecture. There are, at the present, only some 30 schools having membership. The only other school in Texas so honored is the University of Texas.

The time at which the membership was awarded to A. & M. was at the annual convention of the Association which was held in Detroit, Michigan, June 20-21.

"This honor places A. & M. on a par with such schools as Columbia, Illinois, Michigan, M.I.T., Pennsylvania, and others," Langford said. He continued, "Membership in the Association is not to be had for the mere asking. To be eligible, schools must have a high standing, a progressive program, as well as meeting requirements set up by the association."

The organization was founded in 1912 and has come to be recognized nationally by accrediting agencies: The American Institute of Architects, and other professional organizations. Recently the Department was honored by the American Institute of Architects by the Institute's approving the Department as being eligible to award its annual School Medal.

The Association of Collegiate Schools of Architecture is national in scope and is the organization which represents the profession of architecture so far as the colleges are concerned and it is significant honor that this college has been elected to membership in the Association.

Summer Is Time To Take Care Of Unclean Conditions

The season of the year when the most complaints are received on account of diarrhea and dysentery or "Summer Complaint" is here and Dr. Geo. W. Cox, State Health Officer has issued a warning to parents in regard to this, and offers the following suggestions to prevent its occurrence among babies. The chief causes of diarrhea include impure milk, water and contaminated foods, overheating, fever from any cause, too much sugar or cream in the diet, overfeeding and underfeeding.

Mother's milk is the safest food. However, if other milk must be used, the supply should be clean and pure. The water should be clean, pure and boiled. Any other articles of food should be fresh and clean and no unsuitable articles of food such as cake and candy should be given.

If a feeding formula is used, it should be one prescribed by a physician and it must be prepared with extreme attention to cleanliness and kept cold until used. The baby should be fed at regular intervals and should not be forced to eat when he is not hungry. The baby should be kept cool and comfortable in hot weather, should not be overclothed and should be given plenty of clean water to drink. Any infections which develop in the nose, throat, ears or other organs should receive prompt attention from a physician.

If diarrhea develops, feeding should be stopped or greatly diminished and an abundance of water should be given. Cathartics should not be given except on the advice of a physician. If the diarrhea does not improve within a short time, a physician should be called and a complete examination should be made.

The three F's, flies, fingers, and food are the three sources of danger to the baby. Flies carry disease germs to the baby and to its food. Fingers and hands that are not thoroughly washed before preparing the baby's food are likely to be germ carriers also. All milk and water that is intended for the baby should be boiled for five minutes, then carefully covered and kept in a cool place until used.

Hugh L. Riordan, a Marquette university professor whose birthday is December 25, proposes a Society for the Protection of the Birthday Gift Interests of Those Born on Christmas Day.
