**LOST**—One Bulova watch at the tennis courts or about there; gold and expanding band. Reward. Thomas Taylor, No. 5, R. 412, Box 4174.

## Commandant's Office

### CIRCULAR NO. 17:

1. For the information of all students the COMMANDANT'S OFFICE in the future will not accept letters or telegrams addressed to students as authority for leave of absence. The letter or telegram must be addressed directly to the COMMANDANT or the COMMANDANT'S OFFICE before it will be accepted.

2. Organization commanders and house-masters are directed to see that this information is conveyed to every student under their command.  
By order of Colonel WELTY:  
JOE E. DAVIS,  
Captain, Infantry,  
Assistant Commandant

### NAVY

(Continued From Page 1)

does not require the physical fitness necessary for general service.

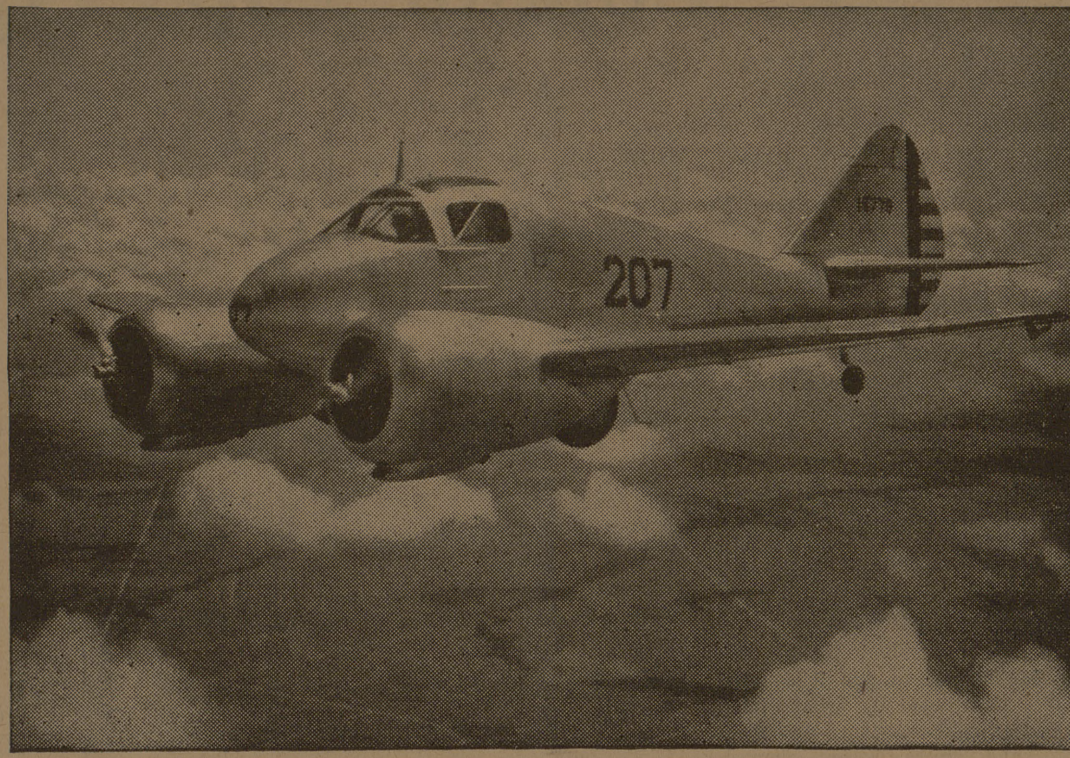

To qualify for enrollment in V-1, an applicant must be unmarried, between the age of seventeen thru nineteen inclusive, a U. S. citizen, of good character and possess potential officer-like qualities. He must be enrolled as a freshman or sophomore in an accredited college pursuing courses required under the program, and must meet the physical requirements for a commission in the Naval Reserve in a general or special classification. However, all students in accredited schools who were sophomores or freshmen during the academic year 1941-42 and who were eligible for V-1 can enlist in the V-1 program at any time prior to November 1, 1942. Freshman and Sophomore students within the eligible age brackets who may be interested in the Navy's V-1 program, may secure all information concerning this program from the V-1 Section, Office of Naval Officer Procurement, New Orleans, or from the branch offices of Naval Officer Procurement in Houston, Dallas, Oklahoma City, Nashville and Birmingham.

## BURKHALTER FOR COMMISSIONER, PRECINCT 1

If elected, I pledge my time to the building and upkeep of the roads as well as the administration of the office duties thereby eliminating the expense of a foreman, fewer car registrations create a need for economy. I will be grateful for your vote and consideration in behalf of my candidacy. Thank you very kindly.

## Selective Service Releases List Of Occupations Necessary to War Effort

Stressing the urgent need in our war program for skilled manpower behind as well as on the battle lines, General J. Watt Page, State Selective Service Director, has advised local boards of twenty-four "critical occupations" in scientific and specialized fields to guide them in the classification of registrants in those professions.

These "critical occupations" are listed in a bulletin sent to all State Directors by National Headquarters, Selective Service System, which also specifically outlines the conditions under which students in such fields may be classified or deferred from military service as "necessary men." The list includes:

Accountants; Chemists, Economists; Engineers — Aeronautical, Automotive, Chemical, Civil, Electrical, Heating, Ventilating, Refrigerating and Air Conditioning, Marine, Mechanical, Mining and Metallurgical (including Mineral Technologists), Radio, Safety, and Transportation — Air, Highway, Railroad, Water; Geophysicists; Industrial Managers; Mathematicians; Meteorologists; Naval Architects; Personnel Administrators; Physicists (including Astronomers); Psychologists, and Statisticians.

The National Headquarters Bulletin pointed out that all of these critical occupations require highly specialized periods of training of

two years or more; that all these occupations are needed in activities, according to the National Roster of Scientific and Specialized Personnel, which are necessary to war production and essential to support of the Nation's war effort, and that there are serious shortages of persons "trained, qualified or skilled" to engage in them.

Specifying that a student who is in training and preparation for one of these scientific and special fields may not be considered by his local board for occupational deferment "until the close, or approximately the close, of his second or sophomore year in a recognized college or university," the bulletin stated:

"There are many registrants who are in training and preparation to acquire the qualification or skill to engage in these critical occupations. Normally, the period of training and preparation to acquire the necessary qualification or skill in these scientific and specialized fields extends over a period of four academic years in a recognized academic, professional, or technical college or university. In many instances, however, it is necessary for persons to have additional study in a recognized academic, professional, or technical college or university in order to acquire the more highly specialized qualification or skill necessary for the performance of particular services in activities necessary to war production or essential to the support of the war effort. Persons engaging in further studies in addition to the four academic years normally required are referred to as graduate or postgraduate students."

The National Headquarters Bulletin then reads:

"A registrant who is in training and preparation for one of these scientific and specialized fields may be considered for occupational deferment at the close, or approximately at the close, of his second or sophomore year in a recognized college or university if he is pursuing a course of study upon the successful completion of which he will have acquired the necessary training, qualification, or skill, and if he gives promise of continuing and will be acceptable for continuing such course of study and will undertake actual further classroom work within a period of not to exceed four months from the close of his second year.

"A registrant who is in training and preparation for one of these scientific and specialized fields shall be considered for occupational classification during his third and fourth years in a recognized college or university, provided that he gives promise of the successful completion of such course of study and the acquiring of the necessary degree of training, qualification, or skill.

"A graduate or postgraduate student who is undertaking further studies for these scientific and specialized fields, following the completion of the normal four academic years, may be considered for occupational classification if, in addition to pursuing the additional studies, he is also acting as "graduate assistant" in a recognized college or university or is engaged in scientific research related to the war effort and which is supervised by a recognized Federal agency. A graduate assistant is a student in postgraduate studies who, in addition, is engaged in the teaching and instruction of undergraduate students in these scientific and specialized fields."

Furthermore, the National Headquarters Bulletin pointed out, registrants who have completed train-

ing and preparation for any of these "critical occupations" necessary in the war program, should then be given reasonable time to become engaged in the practice of his profession. This period is defined as "not to exceed 60 days" after graduation, the bulletin stating:

"When a registrant has completed his training and preparation in a recognized college or university and has acquired a high degree of training, qualification, or skill in one of these scientific and specialized fields, such registrant should then be given the opportunity to become engaged in the practice of his profession in an activity necessary to war production or essential to the support of the war effort. In many instances following graduation from a recognized college or university, a certain period of time will be required in the placing of trained, qualified, or skilled personnel in an essential activity.

When a registrant has been deferred as a necessary man in order to complete his training and preparation, it is only logical that his deferment should continue until he has an opportunity to use his scientific and specialized training to the best interest of the nation. Accordingly, following graduation from a recognized college or university in any of these scientific and specialized fields, a registrant should be considered for further occupational classification for a period of not to exceed sixty days in order that he may have an op-

## Broilers, Fryers Featured on Food Special This Week

Broilers and fryers will be featured as a Victory Food Special from July 16 through July 25 by retailers in Texas and throughout the nation. According to H. H. Weatherby, assistant poultry husbandman of the A. and M. College Extension Service, supplies of broilers and fryers, beginning in mid-July, will set an all time high, due to a national increase of 19 percent over 1941 in the number of chicks hatched.

The merchandising campaign is designed to encourage increased consumption of this poultry meat at a time of year when its availability for marketing is at its peak, he explained. The large supply this year results from the great expansion which has occurred in poultry production to meet wartime egg requirements. During the first four months of this year the number of chicks hatched exceeded the output of 1940 by 37 percent.

"Increased consumption of this poultry meat at a time when supplies are in seasonal abundance will help conserve pork and other meats urgently needed for the nation's armed forces, as well as for Lend-Lease shipments to the united nations and other wartime purposes," Weatherby said.

### DOWELL

(Continued From Page 3)

Dowell says his co-workers in the department make up the most congenial group of men with whom he has ever worked.

Badminton is a sport of which most people have the wrong conception, states Dowell. He goes on to say that not many people are familiar with true badminton; that it is one of the most strenuous games known and requires more stamina than basketball. As soon as the equipment arrives Dowell will be ready to teach the sport of badminton (as it should be played) to any and all Aggies interested in the sport.

Sale of waste paper is providing funds that will purchase uniforms for elevator men at Hunter college.

portunity to engage in a critical occupation in an activity necessary to war production or essential to the support of the war effort, provided that during such period the registrant is making an honest and diligent effort to become so engaged."

### COMMENTS

(Continued From Page 2)

same size as before 1939. The Scandinavian countries, Denmark, Sweden and Norway, are in one confederation and Switzerland has been done away with as an independent country.

To the layman this is all extremely weird and almost revolting but in defense of his plan, Professor Renner claims that "My map of Europe would meet all the valid arguments advanced by the Axis countries, and thereby deprive them of propaganda weapons, without yielding them anything which would render them materially stronger than they were in 1939."

I wonder how true this all is—could a subdued and insulted group of the calibre and pride of the Germans be satiated with only a little power? That's beyond the fondest dreams of a dreamer. To my way of reasoning Germany should be allowed either unlimited power, to appease her desire for world domination, or have every vestige of influence wrested from her and compulsory democracy levied so others might live in peace. And I want to live in peace!
