College Station Bryan "Two Convenient Stores"

### PEN REPAIR MATERIALS GETTING SCARCE... MAY SOON BE IMPOSSIBLE TO OBTAIN!

## NEW PROTECTIVE INK! GUARDS YOUR PEN AGAINST WARTIME FAILURE

NEW PARKER QUINK is the only ink containing solv-x. Eliminates the cause of most pen failures:

1. The solv-x in new Parker Quink dissolves sediment and gummy deposits left by inferior inks. Cleans your pen as it writes!
2. Quink with solv-x prevents the rubber rot and corrosion caused by strongly acid writing fluids.

15¢, 25¢, and up. Made by the makers of famous Parker Pens. 7 PERMANENT COLORS: Black, Blue-black, Royal Blue, Green, Violet, Brown, Red. 2 WASHABLE COLORS: Black, Blue.

# Parker Quink

CONTAINS SOLV-X

# Texas Drops to No 12 Spot; Ags No 37

Two of the leading Southwest Clubs let the System down the past week as Texas fell 3-0 before Northwestern and S. M. U. was upset by a bunch of hustling Pittsburg Panthers by a score of 20-7. Predictions that carried true to form were the T. C. U. victory over Arkansas and the A. & M. strong comeback at the hands of Texas Tech. The Systems two major upsets of the week were Nebraska 26-Iowa State 0 and Duquesne 26-Holly Cross 0. However, the correct "shocker" predictions include Tennessee's slaughter of Fordham, Georgia Tech's close win over Notre Dame, Tulsa's upset over what was believed a strong Oklahoma team, Santa Clara's win over Stanford, and Alabama's strong showing in beating Mississippi State. The System said the Iowa Preflights-Minnesota game would be close and picked Minnesota as the Golden Gophers fell before the team of their former mentor—Bernie Bierman. However the Gophers missed winning the game by one yard. All in all, on the basis of 168 games reported the System

was 85.1 per cent correct in its win-or-lose predictions for the third week of the 1942 season.

### WILLIAMSON'S FOOTBALL RATING TABLE

Perfect Team	100
1. Alabama	98.5

## It Takes Lots of Plain Mathematics To Be a Straight-Shooting Bombardier

"College students who will make the best bombardiers are those who study math and lots of it," Lt. Col. William M. Garland, director of training at Uncle Sam's newest bombardier university, opening here this week, tells those who ask him what to study in order to realize the thrill of emptying bomb bays over Hitler's Europe.

"As far as bombing is concerned, this is a war of mathematicians," Col. Garland says.

But for those who consider math a grind he adds this note of hope. "You don't have to like math to be a top-flight bombardier—you merely must know how to use figures."

According to Col. Garland, simple grammar school arithmetic is a major stumbling block of many aviation cadets who hope to make the grade on the tough examinations which all of the air forces bombardiers now must pass in order to become a member of the hand-picked group which will enter this Advanced Flying School or one of the great Army Air Force's bombardier schools.

"When a bombardier in a Fly-

ing Fortress misses a target the mission is a complete loss," the director of training says. "Under combat conditions the bombardier has less than a minute and often no more than thirty seconds in which to recalculate his data and get his bombs away at a target that may be ten or twenty thousand feet below. Minor miscalculations multiply tragically with higher altitudes. At 10,000 feet an error in calculation of airplane speed of only ten miles an hour results in a miss of 364 feet. Bombs that miss the target don't even annoy the enemy."

Algebra, geometry, trigonometry and physics are invaluable to a bombardier according to Col. Garland. Of major importance also is knowing how to read aerial photos, charts and maps. Every bombardier thoroughly studies maps and charts of his target and surrounding territory before starting a mission. Often landmarks must be memorized. Slide rules and other rapid mathematical computers are used constantly.

"A quick figuring bombardier can give Hitler a headache every night."

## Americans Urged To Contribute To Russian Relief

A plea to Americans to supplement lend-lease aid to Russia with generous and "immediate" gifts to Russian War Relief was delivered recently by Secretary of Agriculture Claude Wickard over radio station WINX in Washington. Wickard particularly urged an enthusiastic public support of the Russian War Relief campaign for American needs with which to replant the Soviet Union's scorched earth.

Contributions for Russian aid from individual Americans, the Secretary said, achieve results in international unity which cannot be matched by the lend-lease program.

"The lend-lease program cannot supply the heart-warming qualities of direct contributions from individual American citizens to citizens of an ally making an heroic stand for the common cause of freedom," Wickard said.

Mentioning some of the relief supplies that Russian War Relief has shipped to Russia—seeds, clothing, surgical instruments, sulfa drugs and other medicines—Wickard said he wishes to stress the value of the seed shipments.

Seeds already shipped to the Soviet Union, he said included new disease-resistant varieties contributed by universities and agricultural experiment stations throughout the United States and Canada.

They included the familiar grain and vegetables of Russia—wheat, oats, barley, tomatoes, carrots, beets, cucumbers, cabbage and corn, and a few vegetables hitherto little cultivated there—spinach, collards, celery, pease, squash and eggplant.

Wickard emphasized that the shipments of seed, like the national advantages of cooperation between the two countries, "are not all one way to Russia."

"The officials of the Lenin All-Union Academy of Agricultural Sciences in Moscow," he reported, "were instrumental in forwarding to America the seeds of the rubber-bearing dandelion which provides a material part of the natural rubber produced in Russia. Our own officials are now studying the possibilities of the rubber-bearing dandelion as a partial solution of the rubber shortage in this country."

Gifts to the Russian people thru Russian War Relief, the Secretary concluded, are evidences to the Russian people of good faith and good will toward them in America. "We do not delude ourselves into thinking that feelings of faith and good-will, however strong they may be, are the sole attributes necessary for the winning of a war," he said, "but when these are weighed in the same scale together with essential materials and vital necessities so that both sides are evenly matched, they will assuredly be found to tip the balance in the favor of the right—for victory.

"Therefore, every American should feel a personal incentive to give to a cause which is devoted to the purpose of providing such humanitarian assistance. Russian War Relief is the worthy organization through which this aid may be transmitted, and such aid must be immediate."

## Veneral Disease More Prevalent Says Dr Geo Cox

Because of the fact that veneral disease is no respecter of persons, people of every class and color, rich and poor, educated and ignorant are numbered among the victims, asserts Dr. Geo. W. Cox, State Health Officer.

"Veneral diseases, of which syphilis and gonorrhoea are the more common, are among the most vital health problems in the State of Texas today," Dr. Cox said.

## Corpus Christi Naval Air Station Is Still Enlarging

The U. S. Naval Air Station at Corpus Christi, Texas was not named the "University of the Air" without reason. There, upon its sprawling fields and in the blue Texas skies above the fields' young men are learning arts foreign to the campuses of most universities but with the same precision, thoroughness, and intensity as more peaceful subjects are taught in collegiate realms.

The primary mission of this great Naval air training center is to teach young men to fight war in and from the sky. Although the focus of the station's attention is upon aviation cadets, that is not all which is done at the "University."

In addition to pilots, the station trains radiomen, gunners, parachute riggers, cooks and bakers, and advance men through experience in almost all of the enlisted rates in the Navy. And the pilots themselves don't stop just with learning how to "drive an airplane," but must be acquainted with many of the sidelights of aerial flight in which enlisted men specialize—such as navigation, radio, bombing.

This station is a young one measured by the history of many naval establishments. Dedicated March 12, 1941, by Secretary of the Navy Frank Knox, the now training center was then regarded as a miracle of construction. It grew literally from swampy lagoons and barren sand flats. Sand was dredged from the Bay to make much of the ground on which the buildings arose. After eight months of construction the size of the station at its commissioning was of staggering proportions.

Construction did not stop there. Now, more than a year and half after it started operation, the station is still expanding. Not only have new hangars and new buildings appeared on the Main Station but four nearby fields, complete units in themselves, are operating.

"This state has been chosen as the location for dozens of army camps, training fields, naval bases, shipbuilding yards, airplane construction plants, and other major defense industries. The resulting influx of workers and armed forces has emphasized the need for exerting every known means in the control of venereal diseases."

The State Health Officer pointed out that self-diagnosis and self-treatment are extremely dangerous and advised consulting a physician for determining definitely whether or not a venereal disease is present.

"Only a reputable physician can properly diagnose such a disease. The presence of gonorrhoea is not disclosed by a routine blood test, and the diagnosis of syphilis requires more than a blood examination," declared Dr. Cox. "Both syphilis and gonorrhoea are almost 100% curable if discovered and treated in their very earliest stages. Thousands of deaths annually could be prevented," Dr. Cox said, "if sufficient attention were given to the early diagnosis and thorough treatment of syphilis. Delay reduces the chance of cure and in many cases is the direct cause of death."

## Parents Congress To Be In Houston

The annual call to convention has just gone out from State headquarters of the Texas Congress of Parents and Teachers to send delegates to the thirty-fourth convention, meeting in Houston November 18 and 19.

The theme this year is "Our Concern, Every Youth." Outstanding features will be two-round conferences, participated in by representative students from leading colleges and universities over the State and from the armed forces. "Youth Morale—What Is Morale?" and "What Resources Are Available to Youth Both within Themselves and within the Community?" Response to the latter discussion will be made by presidents of the institutions, from which the students come, in a round-table entitled, "Do Our Universities and Colleges Prepare Youth for Life?"

The convention has been "streamlined" to a two-day session in keeping with requests made by the federal government and the president of the National Congress of Parents and Teachers. It is being held in the middle of the week to relieve traffic and hotel congestion. Headquarters will be the Rice hotel. There will be few social affairs and only one dinner session. Every talk, report, conference, general session and business session is to be "streamlined" also, according to Mrs. Jack M. Little of Dallas, president of the congress.

Among those assisting Mrs. Little are Mrs. E. H. Becker of Houston, first vice-president and convention consultant; Mrs. C. R. Larimer of Houston, president of eleventh district; Mrs. P. J. Dulin, president of the Houston city council of parents and teachers.

Mrs. William Hastings of Wisconsin, a national vice-president, will represent the National Congress of Parents and Teachers.

area supervisor for the Agricultural Marketing Administration, said today that all schools in Brazos County are eligible for the program.

All children in participating schools are eligible for all the milk they want each day, the official explained. Milk used is purchased locally with the Agricultural Marketing Administration paying the farmers' price and schools or other sponsoring agencies such as PTA's assuming responsibility for processing, bottling and delivery. Children who are able to pay may be charged up to a penny a half pint to help pay handling costs.

"As a part of the nation wide nutrition campaign, the program is helping to build a stronger America," Mr. Seale said.

## RE McAlpine Enlists In Naval Air Training

Ross Eddie McAlpine, Jr., son of Mrs. John H. Caldwell of Velasco, Texas has been selected for training as a Naval Aviation cadet and will be ordered to active duty shortly.

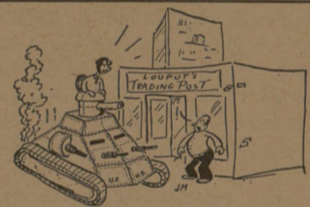

He graduated from Stephen F. Austin, Houston, Texas in June, 1940. He attended Texas A. & M. for two years.

When ordered to active duty, he will report to the U. S. Navy Pre-flight School, Uni. of Georgia, Athens, Georgia, for three months of physical conditioning, instruction in naval essentials, military drill and ground subjects. After completing this course, he will be sent to one of the Navy's numerous reserve bases for primary flight training.

## KYLE FIELD

(Continued From Page 3)

Kimbrough, running hard with head bowed down. He showed plenty of speed too especially on the reverse end sweeps. Bobby Williams, the jack-of-all trades in that Aggie backfield, played 52 minutes Saturday. Jake Webster, the starting fullback, was on the sidelines with an injured shoulder and knee so Bobby was given the full-back spot. Lt. Jack Kimbrough, brother of John and himself a star end of the '39 era, is now an Infantry instructor at A. & M.
