

Physical Training Program Required For All

Schedule Shows One Hour Intramural, 2 2-Hour Labs

Special Physical Training Will Include Commando Course, Football, Calisthenics

W. L. Penberthy, head of the Physical Education Department, has disclosed tentative plans for the most extensive physical fitness program ever to be developed in the history of A. & M. The program, which will have its initial inauguration as soon as the semester gets under way, is designed to give intensive physical training to every member of the corps.

The training for each Aggie will consist of two, two-hour periods each week and a participation in at least one intramural game per week. There will be three two-hour classes each day all through the week including Saturday. The hours for these classes will be from 8-10 a.m., from 10 a.m.-12 noon, and from 1-3 p.m. Each student will sign up for one of the classes in the fore part of the week (Monday, Tuesday, or Wednesday), and one in the latter part of the week (Thursday, Friday, or Saturday). "Every student must sign up in these classes," Mr. Penberthy said, "There will be no exceptions."

Members of each class will report not later than 15 minutes after the hour in old play clothes and tennis shoes, if possible. That will give them time enough to go from the previous class to the dormitory and change. Upon reporting the class will be given about 20 minutes of mass calisthenics under one instructor.

Following the mass calisthenics in which everyone will take part, the class will be divided. Those who cannot swim or cannot pass the swimming requirements will

be sent to swimming class until they can pass. Upon their passing of the swimming requirements they will join the rest of the class.

Those of the class that are left after the swimming group has been taken out will then engage in some form of intensive exercise. The class will be divided into four or five groups and the forms of exercise will be rotated. Some of the things that will be engaged in are cross country, commando course running, gymnastics, mass boxing, swimming, tumbling, and speed ball. This will take up over a quarter of hour of class time.

Following that, the classes will taper off with about 30 minutes of some vigorous game. Foremost of these will probably be volleyball, basketball, badminton, etc.

Students will be dismissed at least twenty or thirty minutes before the next class in time to return to their respective dorms, bathe, and dress themselves in time.

A sample class session might run something like this—twenty minutes of calisthenics to start, followed by a couple of miles of cross country and some running of the commando course; then a quick vigorous game of volleyball before time to go in.

Mr. Penberthy stated that this sort of intensive physical program would continue until the class was in pretty good shape; then the

'Mural Program Remains the Same For Coming Season

Class B Intramurals May Be Discontinued; Nothing Sure As Yet, Says Penberthy

Despite the installment of the new physical fitness program in the school for this semester, Mr. W. L. Penberthy, head of intramurals, stated that the intramural program would remain basically the same. There is a possibility that Class B intramurals may be cut out, but nothing definite has been decided on that issue.

Penberthy said, "This semester, more than ever before in the history of this school, we need a good all-round intramural program". That is exactly what is being planned. In spite of the fact that physical education classes are to be emphasized to a greater extent, nothing will be cut out of intramurals. All efforts are being made to make this semester's program even bigger and better than ever before.

Intramurals will have a far more important place in the activities of the student this term than previously, due to the intensified scholastic strain the corps will be under. Penberthy also states that the Intramural Department would attempt to do everything in its power to provide wholesome recreation for the student body.

Even though the possibility remains that Class B leagues may be discontinued, sports are being planned for both Classes A & B. Class A sports will be horseshoes, volleyball, table tennis, boxing, wrestling, softball, and track. Those sports tentatively scheduled for Class B are horseshoes, tennis, handball, boxing, wrestling, softball, and track. The Intramural Department will also try to sponsor several tournaments which will be campus-wide for both Classes A & B.

For the intramural race this semester the Class A defending champion will be A Company Chem Warfare, managed by J. H. Barrett. The Class A runner-up is C Infantry managed by W. V. Crozier.

The race for Class B honors last semester ended in a tie with K Infantry and F Field Artillery each having 305 points. However, the Intramural crown was awarded to the Infantry team due to their superiority in number of extra points gathered. The K Infantry squad was managed by Claude Lovett. His Junior assistant, who was really in charge of the Class B squad, was John Robinson. The Field Artillery team had Max Rotholz as Senior manager with Jack Kuhn as Junior assistant. I Battery Coast came in third in this race with a total of 300 points.

Even if the Class B leagues are disbanded there will still be a race for the flag and the intramural championship. However, there will be no night intramural play whatsoever due to the strict enforcement of C Q on the cadet corps.

procedure will be changed. Plans for that will be worked out later, however.

Swimming Team Has Big Hopes For 1943 SW Conference Crown

With the opening of the new spring semester, the 1943 edition of Coach Art Adamson's Texas Aggie swimming team will launch their bid for the Southwest Conference crown. They open their season with a dual meet with Texas University sometime early in February. This year the Aggie tankers boast a strong team, especially in dual meets, led by Captain Jimmy Keil and Bob Cowling, ace breaststroke.

Despite the loss of Bobby Taylor, who won the conference in the 100, 220, and 400-yard dashes last spring, by an early graduation due to the speed-up program, the Aggies will still have on hand a number of experienced swimmers. Besides Keil and Cowling, the returning lettermen include Dick Winters, Herb Evans, Herb Deyer, Ben Looney, and "Shrimp" Lapham. Also present are several new freshman stars and squadmen.

Backbone of the squad will probably be Bob Cowling who was a mainstay of the team last year. He is definitely conference champion in the breaststroke and the individual medley. Last summer he added to his great record the breaststroke championships of Gulf, Southwestern and Southern A.A.U.'s.

Captain Jimmy Kiel and Dick Winters also carried off quite a few places in the conference meet themselves.

Another boy who is returning is "Shrimp" Lapham, a little guy who is plenty good when it comes to either swimming or water polo. This will be his last year with the varsity, and he should make a valuable man. He was on the undefeated State Champion Aggie water polo team of last season.

New additions to the squad since last year are a couple of star freshmen who may easily become the sensations of the conference. They are Danny Green from Dallas and George Heaney of El Paso. These two fish carried off enough swimming honors for half a dozen men, when they made nearly a clean sweep of their events in summer meets.

Green, who was a star for the Dallas Athletic Club before coming to Aggieland, took top honors in almost every race in which he participated. He was 220 and 440 champion in the Southwest A.A.U. meet in Dallas, and 440 champ in both the Gulf A.A.U. and Southern A.A.U. meets. In addition he won the 220 yard dash in the Southern meet. To top off all his past performances he came in third in the National A.A.U. meet in the 880 and the mile. He has really made a sensational record so far this year and is expected to continue to be a star in conference competition this spring.

George Heaney, the other half of this great freshman combination, was state backstroke champion back in his high school days in Austin High School of El Paso. He won his specialty—the backstroke—in the three meets last Summer and is favored to carry

off the backstroke crown in the conference meet late in March.

Two other freshmen who have made fine records are Phil Griffin and Everett Brown. Brown is Junior Southwest A.A.U. backstroke champion, while Griffin is Junior National A.A.U. breaststroke king.

The team this year is potentially stronger than the one that finished close behind Texas for the title last season. They have not lost a single dual meet this year. However, according to Coach Adamson, most of the competition this spring will have to be confined to teams in the near vicinity. The only meets that are scheduled besides the conference meet are three with T.U. Usually the squad makes a trip to the Midwest or the Southeast, but this year transportation difficulties will make that impossible. Coach Adamson does plan, however, to take a few of his best

boys to the Intercollegiate meet held at Ohio State late in March.

The presence of several champions on the squad this season makes the Aggies exceptionally strong in dual meets, where only the first two places are counted; but due to the shortage of men to take the second and third places, the team may be weaker in conference competition where all five places count. Adamson issued a call to the corps for boys who are interested in swimming to come out for the squad. Unless men are found to get points the Aggies will have a hard time beating out Texas for the crown.

A complete list of the squad includes swimmers Cowling, Keil, Lapham, Griffin, Winters, Heaney, Green, Meyer, Evans, Looney, Klein, Schofield, Everett Brown, L. D. Brown, Barrois, Scott, Blake-lock, and Haraldson; and divers Puls and Tips.

Iron Men Stay Intact; Cokinos Returns A&M

The Aggie Cagers, known to some as the "iron men", will still be intact for the remaining basketball race, with the announcement of fire-ball hustler, Mike Cokinos, returning to school.

Conflicting some earlier reports, Mike will continue in school and finish his pre-med work in June and then go to a medical college. Mike resigned his contract, and then turned to the draft board who put him in 2-A.

The remaining "iron men," Les Peden, Pete Watkins, Lee Huffman, and Jamie Dawson, are still in school and have much to do with the outcome of the conference, it is believed. Last night the team got some practice in preparation for the Baylor game Monday night.

Idle Parts Made Into Machine for G E

An old hydraulic horizontal broach that had been idle for years and some steel pedestals resurrected from a scrapped gear hobber provided the major parts for a machine to spline keyways in 35-ton reduction gears at one of General Electric's New England plants. The job was done previously with a vertical slotting machine which was not giving the required accuracies.

The improvised machine was designed by one of the plant's veteran planning engineers, Tom Wry, who defied conventional practice by using concrete instead of steel for the bases in order to save time in getting the machine into production. Another ingenious dodge to save space was a "dog-house" addition to the building to house the back of the broach. The machine meets the required accuracies and is easier to operate than its predecessor.

If you help now you won't be helpless later. The Army needs your scrap metal.
