Oct. 30	Arkansas	Fayetteville, Ark.
Nov. 6	S. M. U.	College Station
Nov. 13	Rice	Houston
Nov. 25	Texas	College Station

Coach Homer Norton stated that "Football is rather uncertain for all colleges in this conference. However, it was decided to continue college football." A. & M. College will use the material at hand in organizing the 1943 team. Who the men will be is unknown at the present time, but Texas A. & M. will have a team that will measure up to the standards set in former years. We are certain that A. & M. College can stand equal with any other team in the Southwest Conference.

Intramurals To Lead Athletics For Summer

Texas A. & M. College prides itself on having one of the countries' most extensive programs of intramural sports. Every effort will be made during this semester to promote a very extensive program for the students, and all students are urged to participate in the sports of their choice.

The Military organization will be the unit of competition and these units will compete against other such units on the campus in a variety of sports. Members of championship teams in each of the sports offered will receive the official intramural medal properly engraved.

Within each unit an athletic officer will be appointed whose duty it will be to promote intramural activities within the unit, and to organize the different teams for competition.

This semester softball, volleyball, and tennis will be offered as the team sports, and in addition there will be tournaments in such sports as handball, golf, badminton, and any other sports where there is sufficient interest. In addition to these it is planned to have at least one swimming meet and one track meet. Our plans also call for the "Aggie Singaroo", a competitive sing which last summer created a lot of interest.

The Department of Physical Education, through its intramural program is very anxious to sponsor any one worth while activity that will give wholesome recreation and competition to students on the campus, whether they be army, navy, marine, or air corps.

Health Officer Urges Precautions Against Typhoid

If you have not been vaccinated against typhoid fever within the last two or three years, go to your doctor and secure this protection at once," Dr. Geo. W. Cox, State Health Officer, advises prospective campers, Boy and Girl Scouts, and other summer vacationists as the out-of-door season approaches.

"Typhoid fever," he continued, "is unnecessary and preventable. Every case is due either to community negligence or to the ignorance or carelessness of some individual. There would be no deaths from typhoid if every person were protected by typhoid "shots."

Some of the most serious and far reaching outbreaks of the disease have been caused by drinking milk or eating foods that have been handled by carriers. A typhoid carrier is a person who has

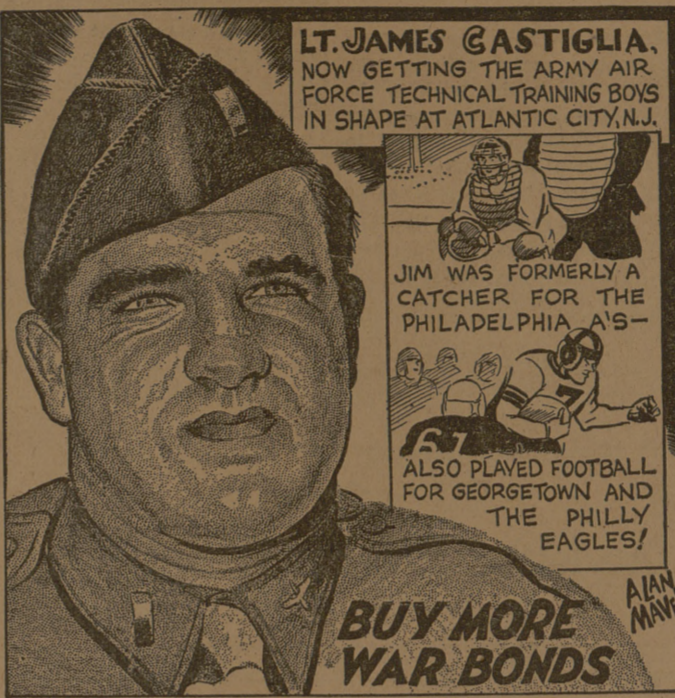

had typhoid at some time and who even after recovery carries the germs of the disease in the urine and the discharges from the intestinal tract. Carriers who are careless in their personal habits are likely to infect any food they handle with unwashed hands.

Dr. Cox explained the typhoid germs are picked up and spread from person to person by water, milk, flies, fingers, food. Every case of typhoid is contracted by the way of the mouth and the digestive system. "The only way to be absolutely sure of typhoid prevention is by immunization," he declared.

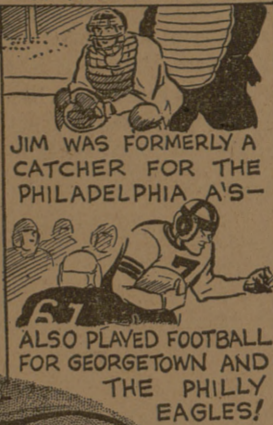

American war expenditures for the first quarter of 1943 were about a billion dollars more than for the entire war year 1918.

Most German bookshops have been stripped clean of all well-known classical literature, though they continue to receive large stocks of Hitler's "Mein Kampf" and books by other Nazi party leaders.

Civil Service Seeks Specialists In Agricultural Field

Persons who have had agricultural experience or education are being sought for Federal Civilian War Service.

Agricultural Specialists in extension, research, program planning, and conservation are paid from \$2,600 to \$6,500 a year (plus overtime pay); however, appointments to positions paying over \$4,600 will be few.

Applicants must have had experience, education or a combination of the two involving some scientific or technical aspect of agricultural production or distribution, or some other scientific or professional phase of agriculture such as rural planning, farm finance, and rural education. Experience may have been gained in such agriculture activities as extension, research, college teaching, program planning, conservation, and vocational agriculture teaching. Some positions require farming experience.

Agricultural Aids are needed to assist in semi-technical laboratory or field work. Two to four years of technical experience in agriculture or the equivalent in agricultural study in college is required. The positions pay from \$1,970 to \$2,433.

Applications should be filed with the Civil Service Commission, Washington, D. C. There are no age limits and no written examinations. Further information and application forms may be obtained at first- and second-class post offices, or from the Commission's Regional or Washington offices.

Federal appointments are made in accordance with War Manpower Commission policies and employment stabilization plans. All farm workers must obtain releases from the U. S. Employment Service, Agriculture State or County War Boards, or from the employer before being accepted for Government employment. However, such releases are not required at the time of filing applications. Persons selected for appointment will be notified of any steps necessary for compliance with these provisions.

Army and Navy Search For Men In Specialized Fields

The task of scoring papers of the 300,000 young men who took the first joint Army and Navy qualifying pre-induction tests, marking their eligibility for the Army and Navy Specialized Training Programs, has been completed and "congratulatory" letters have gone out to those with highest qualifying marks.

The Army expected to have mailed, by the middle of May, 75,000 letters to the men who will be given special consideration for the Army Specialized Training Programs. The Navy is sending official notices to men who qualified for the Navy training programs, but the number has not been determined.

The examinations were given in early April to men who have had high school education or its equivalent. About 200,000 of those taking the tests expressed a preference for the Army. Scoring of the papers was supervised by 10 regional directors.

All men who qualified will receive cards ear-marking them for consideration. The Army men will soon receive additional explicit information, in the form of a book-

let of 50 questions and answers, designed to give the future soldier a full understanding of ASTP. Careful consideration will be given to the individual choice made by the successful candidate, but the type of service to which he will

finally be assigned, and the course in college to be prescribed for him, will depend on his aptitudes.

Recognition For The Nation's Dairymen

By providing the United Nations with a tremendous quantity of high quality dairy products, men in the dairy industry are doing essential work for this fighting country. Recognizing this vital contribution being made by the nation's dairymen, The American Guernsey Cattle Club has instigated and is sponsoring a plan for paying tribute to this deserving group.

Attractive pins are available for every person engaged in milking or feeding Guernsey cattle. These pins identify the wearers as essential producers of Food for Victory and will be a source of justifiable pride in recognition of the important contribution American dairy workers are making to the war effort through food production.

Farms that maintain or increase dairy production this year will be eligible to receive an Award of Merit, Victory Certificate. The owner of a Guernsey herd, or some person in charge of the herd whom he may designate, can apply for one of these certificates. The record of shipments will determine eligibility. Any increase in production and the total production

of the unit will be noted on the certificate. These attractive awards will have considerable historic value as evidence of the farms' contribution to America during the war.

Minnesota game wardens are attempting to scatter a large flock of pheasants threatening the huge victory garden at the College of St. Catherine.
