## A Free Press . . .

These modern dictators who have now thrown the world into this bath of blood all began in much the same way. Once they had seized power, they lost no time getting control over the newspapers. In so doing, they proved that they American Veterinary Medical Asin the dormitory there. Those expectors are the newspapers. In so doing, they proved that they are the newspapers. In so doing, they proved that they are the newspapers. In so doing, they proved that they are the newspapers. In so doing, they proved that they are the newspapers. In so doing, they proved that they are the newspapers. In so doing, they proved that they are the newspapers. In so doing, they proved that they are the newspapers. In so doing, they proved that they are the newspapers. In so doing, they proved that they are the newspapers are the newspapers. In so doing, they proved that they are the newspapers are the newspapers. In so doing, they proved that they are the newspapers are the newspapers. In so doing, they proved that they are the newspapers are the newspapers. In so doing, they proved that they are the newspapers are the newspapers are the newspapers are the newspapers are the newspapers. In so doing, they proved that they are the newspapers are the new newspapers are the newspapers are the new newspapers are the new newspapers are the new newspapers are the knew their business. They also paid the press the greatest sociation will have its second meet- Aggies seem to do alreet from N. set of statistics and he is quite Bidu Sayao is making an appearcompliment that lay within their power. They acknowledged ing of the new semester in the that a modern dictatorship cannot exist when the press is free. The opposite is also true. Modern democracy pital. Highlights of the meeting shire had the R. A. because they cannot exist without a free press.

Americans take this for granted because the whole color film on The Anemias, and H. with thankfulness in their hearts ral Hershey's annual Selective Serlist of individual freedoms that circulate around freedom the ever-welcome refreshments. All after finding us fat and well cared vice report published recently. Dr. of the press have been a part of our political thinking since the foundation of the Republic. Thomas Jefferson saw the dents are urged to attend and to the Republic throughout the national dents are urged to attend and to the Republic throughout the national dents are urged to attend and to the Republic throughout the national dents are urged to attend and to the Republic throughout the national dents are urged to attend and to the Republic throughout the national dents are urged to attend and to the Republic throughout the national dents are urged to attend and to the Republic throughout the national dents are urged to attend and to the Republic throughout the national dents are urged to attend and to the Republic throughout the national dents are urged to attend and to the Republic throughout the national dents are urged to attend and to the national dents are urged to attend and to the national dents are urged to attend and to the national dents are urged to attend and to the national dents are urged to attend and to the national dents are urged to attend and to the national dents are urged to attend and to the national dents are urged to attend and to the national dents are urged to attend and to the national dents are urged to attend and to the national dents are urged to attend and the na place of the newspaper in democracy most clear of all. He bring their ideas concerning the on? How about coming around and tion. said, "Were it left for me to decide whether we should have furtherment of the organization telling us, but in the meantime a government without newspapers or newspapers without government, I should not hesitate to choose the latter." He before the group so that they will be funtioning as active rather than meant that a people with newspapers would soon find their passive members. Bring your room-

The American press is a people's press. Individual newspapers and individual editors may err or abuse their trust. But the free press remains the vehicle of democratic thought and democratic action. It makes democracy possible. makes dictatorship impossible.

Scores of millions of people over the globe are learning offered sacrifices while we stood two of the most important ones this truth now the hard way. Americans do not need to at attention, but it scared them are: Do we still get up at six and cent, while New Mexico's average Room 205, Founder's Hall, USNTS, learn it because they have never forgotton that a free press so badly they wouldn't stay for will we be able to get awawy on is 9.2 per cent. and a free people are inseparable.

## Camera Of The Future . . .

With all this talk of the new inventions of the post-war world going on, it is only natural that newspaper photographers should discuss their camera of the future. The September 18, 1943, issue of Editor and Published carried an interestarousing article for editors and photographers on just what graphy were among hypo-stained members of the profession.

Those who participated in the discussion were a last three discussion were a last three discussions and the discussion were a last three discussions and the discussion were a last three discussions and the discussion were last three discussions are last three discussions and three discussions are last three discussions are last three discussions.

We recommended the article to any of you who are apples in the afternoons. How do spection trips for credit. interested in the graphic side of news reporting, but here's the highlights of what veteran newsphotos hope for and H. are as plentiful as the apples among the armed forces that the expect in the camera work of the day-after-tomorrow.

The discussion proved definitely that news cameramen in Texas, so the report goes. are individualists and not easily stampeded by rumors or frantastic claims by producers of super-gadgets. These men from Texas Tech where a bunch despondent moods. have their feet on the ground and know what they want.

In discussing what camera size is most desirable, Noel Harris and Camerano voted to retain the 4 x 5. Nessensohn for a 31/4 x 41/4.

All four of the above wanted a more practical range finder that would serve as both a view and range finder, but they were not in accord on the type. Harris stated that the present type range finders are mere peep sights and are not practical for general news coverage. All agreed that present range finders are excellent for amateurs who are not pressed for time.

There was general agreement on the need for a builtin flash sypchronizer that would be an integral part of the shutter arrangement.

According to these gentlemen, the camera-of-tomorrow should be an all light-weight metal affair with a telescoping metal bellows. They left the details of how that was to be accomplished to the manufacturer. They also asked for an automatic film transport which would do away with removing films in a changing bag or darkroom.

In connection with shutters, they agreed on the need for better device than the present between-the-lens-shutter. And they also wated a coupling arrangement between the shutter and the focal plane curtain that would prevent any mishap when using one or the other. Regardless of long experience, there comes a time in every photographer's life when he forgets to open the front shutter when using the focal plane or closing that shutter when rewinding the cur-

All the men wanted automatic, fool-proof synchronization. And, in connection with bulbs, they hoped that smaller bulbs could be made with equal light intensity to those now employed.

Frank Noel expressed the thoughts of all photographers when he covered the argument that the future cameras may be operated automatically by an inexperienced person. He said, "Regardless of the mechanical simplicity of operation of the camera of the future, it will take brains and experience to make a good news photo and cover an assignment with intelligence.'

# AMERICAN HEROES

Scouting on foot in Tunisia, Pfc. Charles H. Evans was captured by 30 Italian infantrymen and marched to the rear. A bayonet at his back, Evans whirled, disarmed his guard, and escaped. Although wounded by rifle fire, he hid in a eactus patch till nightfall, slipped back to our forces with valuable information picked up as a prisoner. For this he wears the Purple Heart and the Silver Star. Celebrate Evans' escape with another War Bond.
