to open windows?

### Editorial . . .

Farewell . . . Beaverettes New Like an end to a trip, so must we say farewell to Capt. Hill. He brought us many enjoyable hours and has made it easier for the Schedule Effective rien in his detachment. It was through his foresight and his effort that we were able to have the Wing Ball, the organization for the wives of Beavers, now calling themselves The Beaverettes. Capt. Hill has always had his men in mind whenever considering some form of recreation. He knew that the students were a continual grind day in and day out. To become the World's Best Pilots—from the 308th's ings at 6:00 p. m. and at 8:00 p. C.T.D.—is the wish of Capt. Hill. He has done his best to enable the men to reach their goal as far as possible. Although the grind and the path is still long, we must never forget that through him we have

gotten an ideal to pattern our course for the future success in Cadetry.

Not one man can say that he is glad to see him go. As big as the men may be there will be some tightening of the muscles around our heart when this man goes on to another destiny. We know that deep in our own hearts we are wondering what the future will bring us.

We have been able to got along fairly and the future will bring us. We have been able to get along fairly well. But after today, what is there for us to expect? To show emotional feeling, we cannot. To show outward feeling, we cannot. All we can do for the time being is carefully select our pattern and remember the wise words that were voiced for our benefit at the detachment meetings.

We hope to remember . . . we will remember . . . we shall never forget that here is a man that has inspired us to maintain and better ourselves, if possible, along the way of life. The better students we arethe better citizens we will be when this war is won.

Bidding Capt. Hill FAREWELL on behalf of the men, students, officers and the personnel, God Speed and a safe return home.

BRYAN, TEXAS
