

Consolidated High Girls Take Course

Thirty girls from the A. & M. Consolidated School are taking summer projects which will enable them to earn a half a credit in home economics. Each girl has chosen an experiment according to her needs with suggestions and help from her mother and teacher.

Titles of some of the proposed experiments are home management helping with family food supply—gardens—canning; good grooming and summer clothing; non-fat-tening diet study and preparation; meal planning, marketing, preparation, and serving; wardrobe planning and construction and child care. Each girl keeps a record of work done as she goes along and she will be assisted individually at home by her mother and the home economics teacher, Mrs. Carl W. Landiss.

Group meetings will be held in the home economics laboratory at school where the girls will work together to continue the improvement of the department. They are beginning work on a crocheted rug to be made of scraps left from their dresses and which will be used in the living-dining room in the department. The Girls met at the school Thursday morning at ten o'clock for their first group meeting since school closed. They are to bring scraps of material to make into strips for the rug. They will bring a sandwich and cokes will be served at noon. At this meeting a social committee for the summer will be selected.

Girls who are taking summer projects are: Agnes Kosh, Millie Dean Jones, Nan Ingram, Charlene Pearson, Annie Papchinski, Louise Crenshaw, Janice Bruecher, Macel Burkhalter, Mary Munnerlyn, Lillian Klipple, Louise Jones, Mildred Jones, LaVera Parsons, Jean Rosprim, Mary Jane Carroll, Martha Jane Bonnen, Shirley Hampton, Barbara McMullan, Patsy Hensel, Evelyn Dowling, Gladys Holick, Virginia Prewit, Lois Wilson, Frances Kapchinski, Margaret Kosh, Bertha Redman, and Emma Mae Frierberger.

Status of Foreign Students Defined

Many foreign students are engaged in academic work at A. & M. in the various fields of agriculture, engineering, veterinary medicine, and liberal arts and many of these students have expressed concern and puzzlement regarding their draft status. The Secretary of State and Selective Service Headquarters have prepared a statement defining their status, the gist of which is herein presented.

Alien students admitted into this country for purposes of study are not specifically exempted from the requirements of the Selective Service Act of 1940. However, there is a well defined procedure under which they may establish such exemption, by showing that they are not "residing in the United States" within the meaning of the Act. It has been the experience of this Department as well as of local Selective Service boards who are empowered under the Act to define the Selective Service status of all persons that many alien students are unaware that they must apply for and obtain an Alien's Certificate of Non-Residence within the ninety day period following their admission to the United States, in order to establish an exempt status under the Act. A student is likewise required on reaching his eighteenth birthday to apply within three months thereafter for a Certificate of Non-Residence. Application is made on Form 302 (Application for Determination of Residence). A companion Form 304 (Alien Personal History and Statement) is filed at the time of application. Local boards are empowered to issue Alien's Certificate of Non-Residence (Form 303) to all bona fide, full-time, nondeclarant, alien students who have been admitted to the United States for the sole purpose of study and have maintained their student status continuously. This Certificate when issued is (See STATUS, Page 8)

Plans Made For Air Service Here

Hearings before the Civil Aeronautics Board on Southwest Airways' application to establish feeder airlines in Texas and Oklahoma, which would put College Station on the nation's air map, will be held in approximately 90 days, the Battalion was advised today by company officials.

The Board already has set June 7 as the date for a pre-hearing conference on its application, the company reported, and this is expected to be followed by formal hearings within three months.

Extension of air transportation to the Southwest's smaller cities and towns thus is moving with

unexpected speed, and this becomes one of the very first areas in the entire nation to be considered for feeder routes.

Southwest officials were reported to view this as "a strong indication that the Board attaches great need to expanding the Southwest's air transportation system at the earliest possible time."

Establishment of the routes is expected to be of considerable benefit to College Station, as they would provide fast, frequent air service to numerous other cities in this area, as well as to Houston and Dallas. Passengers are to be carried on Southwest's planes in addition to air mail and air express, the latter two services to be rendered where landing facilities are not available.

The American Creed was written by William Tyler Page.

Second Cotton School Under Way

Second session of the 1944 Summer Cotton School conducted by the Texas A. & M. College under the direction of Dr. Ide P. Trotter, head of the Department of Agronomy, got under way May 29 and will continue through July 8. First session of this school was held April 10-May 20.

Course of instruction in the cotton school is designed for serving those who wish to acquire training, experience and the basic fundamentals of cotton classification, and for those who have had experience in producing, processing and handling cotton, but who wish to improve their understanding of cotton classing. At the present time there is a critical shortage of

experience cotton classers.

Special training in cotton classification, based on U. S. Government standards is being given, which features grading, stapling, local cotton buying and trading records. Cotton fiber testing and spinning is being observed in the only U. S. Government Cotton Spinning Laboratory in the Southwest, located at the Texas A. & M. College. Outstanding authorities on various phases of cotton production and research will be brought in to give lectures on their special fields of cotton production.

Registration is limited to not over 50 cotton classers and these come from all cotton producing states and Latin America.

A new series of studies on protein materialism is to be undertaken at the Wayne university college of medicine.

Welcome Back--- AGGIES

WE'RE GLAD TO SEE YOU --

COME IN AND SEE US

LET LOU HELP YOU WITH YOUR PURCHASES

REMEMBER—Lou's the biggest used book dealer in College Station. Thousands of Texas Aggies have made him that because they know that they always get a fair and square deal from Lou.
