

## Distinguished List Released by Office of the Registrar

Ninety-eight students have been listed as distinguished students by the registrar's office for the spring semester of the 1943-44 session. The majority of these students who will receive certificates signifying that they have been named distinguished are in the School of Engineering. The School of Veterinary Medicine follows as second and the School of Agriculture is a close third. Lagging behind as a natural result of the emphasis on vocational courses comes the School of Liberal Arts.

During the spring semester the freshmen led the list of distinguished students with a total of twenty-nine. The sophomore and junior classes followed close behind with a total of twenty-seven and twenty-three respectively. The senior class contributed fourteen students to the list. Five graduate students were distinguished.

For a distinguished student rating a student must have no grade below a "C" and a grade point average of not less than 2.25 per credit hour for the spring semester.

The following students have been named by the registrar's office and may receive their certificates of distinction by calling at the registrar's office:

## Engineering Dean Returns From SPEE Meeting In Ohio

H. W. Barlow, Dean of the School of Engineering, has returned from a thirteen-day trip to the northern section of the country. The trip was mainly for the purpose of attending a meeting of the Society for Promotion of Engineering Education.

The meeting of the Society was held for the purpose of discussing methods by which relations can be improved between the colleges of the country and the industries. It was decided that this could be done by interchanging members of the various staffs in connection with the research departments. Barlow was chairman of the Aeronautics Committee that convened at the meetings, and ways to improve the aeronautical engineering courses in the colleges was the chief topic discussed. The meeting was held in Cincinnati, Ohio.

From there Barlow went to Pitts-

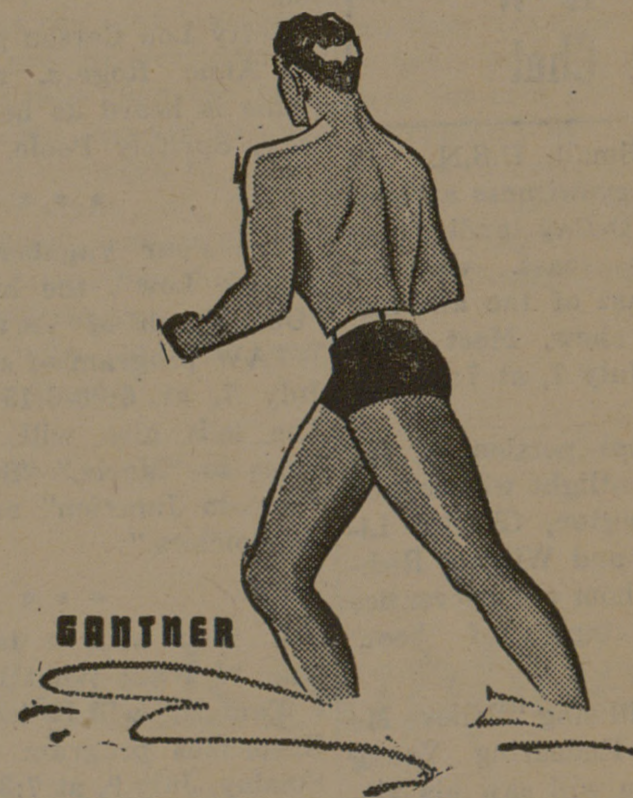

burgh, Pa., to attend a meeting with the Westinghouse Corporation, to discuss cooperative research projects. The conference was arranged through M. W. Smith, class of '15, who is a member of the staff of the Westinghouse Corporation.

Then Barlow went to Dayton, Ohio, to the Army Air Service Command to obtain air force equipment for the college. While there he was received by Lieut. Col. T. H. Baker, class of '23.

After finishing his business there Mr. Barlow proceeded to Purdue University at West Lafayette, Ind., to inspect their air port and aviation training program, and to discuss mutual interests in aviation training.

He returned to the college the night of the second, after "an instructive and interesting trip."
