

—AIRCRAFT—

(Continued from page 1)

can either attend for four hours a day or for eight hours.

Although there will be no tuition connected with the course, each student will have to arrange a place to stay, for his meals, and for transportation to and from classes.

The classes will be small and will have not more than fifteen in each. Most of the classes will be held at the college air field, Easterwood Airport, and will be taught by licensed C.A.A. instructors. The purpose of the course is to turn out men qualified as skilled mechanics, inspectors, and aircraft maintenance foremen.

Anyone interested in the course should contact the Industrial Education Department in Room 106, or phone 4-7564.

Reports From Exes In Armed Forces

Lt. Lloyd W. Kelly, class of '39, who makes his home at 1707 S. Concho St., Coleman, Texas, was recently awarded the first Oak Leaf Cluster to the Air Medal "for meritorious achievement in aerial flight" while participating in combat missions against the enemy in the Balkans, northern Italy and Austria. He is a navigator with a B-24 Liberator Heavy Bombardment Group of the 15th Air Force. Aviation Cadets James E. La Rue, Jr., class of '46, and James H. Lindsay, class of '46, are now stationed at Maxwell Field, Ala. They have reported to the pre-flight school at the field, and are to receive nine weeks of intensive physical, military and academic instruction.

Flight Officer William M. Paulk, class of '45, son of Mr. and Mrs. T. L. Paulk, 2003 Violet St. in Vernon, Texas, was appointed a flight officer in the Army Air Forces after completing bombardier training at the Carlsbad, New Mexico, Air Field.

Major James C. Ellis, class of '34, is the pilot on an AAF B-17 Flying Fortress. He is the commanding officer of the unit. He joined the air forces as a flying

Butter Making Is Explained By Extension Agent

For best quality sweet cream butter, cream should test about 30 per cent butterfat. This means it is rich enough for one gallon to yield approximately three pounds of butter, explains Gladys Martin, home dairy specialist for the A. and M. College Extension Service.

While some people prefer the more pronounced flavor of butter made from slightly sour cream, most seem to prefer sweet cream butter, she observes. At this time of year the cream should be cooled immediately after it is skimm-

cadet on October 6, 1940. He served the Air Force in the Southwest Pacific before coming to the Mediterranean theatre. His first mission was over Fischamend, Austria, on March 17, 1944. He has participated in 28 missions in this theatre.

He is a graduate of Highland Park High School, and attended A. & M. He has been awarded the Distinguished Flying Cross, Air Medal, Silver Star with two Oak Leaf Clusters.

Staff Sergeant Anderson R. Frank, Jr., class of '46 of 4351 Normandy Street, Dallas, Texas, is a tail gunner on a B-17 in the Italian theatre of operations. He has completed thirty-eight combat missions and has been awarded the Air Medal with six bronze Oak Leaf Clusters.

Sgt. Frank graduated from Woodrow Wilson High School in 1942, and entered the air force on January 7, 1943, and left for overseas duty in January, 1944.

Thermometers Hit High Marks Monday

According to J. E. Roberts, the thermometers of the Main Station Agronomy Farm at College, hit 103 degrees on both Monday and Tuesday. This sets a high mark for the year.

The thermometer reached its highest mark last year when in July it soared to 106 degrees. Of all recorded years the highest for this area was 111 which also came during the month of July.

ed and kept at 50 degrees M. or below, the specialist says.

On many farms, homemakers churn only two or three times a week and use sour cream. When this is the practice each day the cream should be placed in one container and thoroughly mixed, then warmed slowly to a temperature of from 65 to 75 degrees F. Miss Martin explains that this allows the cream to ripen uniformly. The cream should stand at this ripening temperature until it thickens, assumes a glossy appearance, and is mildly sour. Then it should be cooled quickly to churning temperature for at least two hours before churning is begun.

In summer proper churning temperature varies between 50 and 60 degrees F. while in the winter between 55 and 65 degrees usually is satisfactory. At the proper temperature only about 25 to 30 minutes of churning are required for the butter granules to be firm without becoming hard. A dairy thermometer, which is inexpensive, offers the only sure way of checking the cream temperature.

Miss Martin says the churn should be filled only one-third to one-half full of cream. Churning should continue until the granules are the size of a grain of corn. Then the buttermilk should be removed from the churn. The butter should be washed with the same amount of water as there was buttermilk. It should be at about the same temperature the cream was in the beginning. Usually three washings are required. Buttermilk should never be "worked" out.

Cattle Course To Finish Tomorrow

Saturday the six-week training course given by the Animal Husbandry Department under the supervision of Dr. J. C. Miller will end.

Dealing with beef cattle problems for a number of vocational agriculture teachers, classes in classroom and laboratory work have been held for eight hours each Saturday.

Scheduled subjects have been breeds and breeding, selection of breeding stock, wintering problems, fattening cattle for market, parasites and diseases.

The course is equivalent to one given regular college students with three hours a week over a college semester. Those enrolled in the course have taken it as partial fulfillment of requirements toward their master's degrees in agricultural education.

It's easier to see through the other fellow when your own conscience is clear.

First Christian Church Gives Social

An ice cream social featuring homemade cake will be held at the City Park (in front of the City Hall) next Saturday evening beginning at seven-thirty o'clock, under the sponsorship of the First Christian Church.

The public is cordially invited to attend.

The committee in charge is composed of Mrs. A. G. Syptak, Mrs. Guy Bittle and Mrs. F. J. Reed.

Prior to November 17, 1800, when the U. S. Congress first met at Washington, Congress had convened in New York, N. Y.; Philadelphia, Pa.; Baltimore, Md.; Lancaster, Pa.; York, Pa.; Princeton, N. J.; Annapolis, Md.; and Trenton, N. J.
