of the U. M. C. A., and valedictorian were some of his other honors.

Immediately after leaving Cornell in 1902, he came here as an instructor and was made Head of the Horticulture Department in 1905 and later Dean of the School of Agriculture when it was created in 1911. At that time there were four departments and three hundred students in this school, while today there are fifteen departments and over 2400 students in 1942. It has been the largest agricultural school in the world for the past decade and has gained national recognition in its development of the economic or business side of agriculture.

Being the first person to advocate the teaching of agriculture in the public schools of Texas, it is appropriate that Kyle should also

## Aggies and Future Aggies Shine in Annual Game

Aggie coaches Homer Norton and Lil Dimmitt had just cause to be pleased with the showing of Aggies and future Aggies at the annual Texas High School All Star game which was played in Wichita Falls last week. Eight of the footballers who took part in that dream game have reported that they will be wearing the Maroon and White this fall.

Gene Spires, scat back from Abilene was the big gun for the North, scoring their lone touchdown and kicking the extra point. Most writers agreed he showed up better than Bobby Layne of Highland Park, Dallas, who was slated to be the North's star.

Paul Yates, the big back from Amon Carter-Riverside of Fort Worth, got off the longest run of the game when he returned the kickoff opening the third period 59 yards.

Harold Buckner, center from Cleburne High School, played a jam up game at the pivot position for the Southerners.

Spires, Buckner, and Yates are already enrolled at A. & M., and took part in the summer drills. The other boys who participated in this game and who will be at Aggieland this fall cannot be named here.

be the author of the state adopted text on agriculture for the public schools, and joint author of a high school text. He has published numerous bulletins on fruits and vegetables and also made many addresses.

Because he has been connected with all phases of education, he was selected by the Bureau of Education in Washington to direct the educational work in the survey of the landgrant colleges which was ordered by Congress. He also aided in the establishment of the Fish and Game Department and the Forestry Division here at A. & M. As vice-chairman of the board of directors in the Farm Credit Administration at Houston, he has a voice in the largest financial institution in the state.

In 1941 Kyle made a flying four-months good will visit to Central and South American countries under the auspices of the Council of National Defense. Mexico, Nicaragua, Costa Rica, Panama, Venezuela, Brazil, Argentina, Uruguay, Paraguay, Chile, Ecuador, Peru, and Colombia were the countries visited. He wrote to the Latin American men who had attended A. & M. and was able to renew acquaintances with many of them.

Kyle and athletics at A. & M. have gone hand in hand since before the turn of the century when he was a member of the track team. Since returning here to serve on the faculty in 1902, he has been connected with the Athletic Council and has been chairman of the council since 1937. When he took over these duties, there was a debt of

## C Company Defeats Officers, 14 to 8

The Commissioned Officers took it on the chin again on the softball diamond, this time losing to C Company by the score of 14 to 8 Friday evening.

The "Bulls" were leading until the sixth inning when the cadets went on a scoring spree and went ahead. The Officers rallied in the last inning but were unable to pull the game out of the fire.

For the first five innings the contest was an evenly fought affair, but it developed into a slugfest in the final stages. The diamond was rather soggy as a result of the rain which fell earlier in the afternoon.

\$206,000.00 against the stadium, but this was erased five years later. As part of his work, he established and developed the athletic field which bears his name, Kyle Field.
