Every year preventable forest fires in the United States destroy or damage timber of sufficient amount to build five-room houses for the entire population of a city the size of Denver, Portland, Seattle, San Francisco, Atlanta, Louisville, Kansas City, New Orleans, or Washington, D. C. And still people wonder why timber owners hasten to cut ripe timber and hesitate to plant new forests.

There are three perpetual planks in a platform of forestry; perpetuation of the nation; perpetuation of the woods; perpetuation of wealth. The trio is inseparable.—C. A. Schenck.
