

SMITH (Continued From Page 9)
ily in command of the fighting Texas 36th Division, in having lunch with the arch Nazi gangster and murderer, Hermann Goering.

Smith's speech, ordered placed in the Senate Journal by his approving colleagues, echoed the sentiment of most Texans in its expression of bitterness at the attempts of some people to soften the deserved wrath falling on the conspirators of crumpled Nazidom, who must now face an accounting for their foul deeds that have been so brutal as to shock the sensi-

bilities of all mankind. "We have been told war criminals would be punished," said Smith. "Some of us old soldiers see a disposition, as after the last war, to be kind to monsters.

"Hermann Goering, the murderer of Antwerp and Warsaw, who sent his planes over defenseless cities, has been captured by the 36th Division. I was saddened to see in the papers that some fellow in temporary command of the 36th has invited this monster to dine with him. I resent it. It is not in keeping with the traditions of Texas. There can be no excuse for breaking courteous bread with an arch criminal.

"Such action is not in keeping with the tradition of Texas," the Lieutenant Governor stated. Burning off land impoverishes the soil and the landowner.

Approximately Ninety Students Are Now Members Of Ex-Serviceman's Club Here

Six months of age and proud of its active membership of 90 enthusiastic veterans, the A. & M. Ex-Servicemen's Student Club is one of the liveliest organizations on the Texas A. & M. College campus.

About half of the members of the organization attended Texas A. & M. prior to their call to military service; the others came to confirm the stories told to them about the college by Aggies they met in service.

Organized during the fall semester of 1944, the club now has its own recreation hall on the campus, fully equipped with game rooms, radio, record-player and comfortably furnished. They inherited the navy radio and radar unit's recreation house on the campus when the naval training program was completed.

Many of the club members are married and efforts are being made to provide suitable living quarters for this group. The ex-servicemen have their choice of living in non-military student dormitories, or in the cadet corps. Those residing in the non-military dormitories wear civilian clothes and are under no military regulations.

secretary; L. M. Main, Palestine, treasurer; R. L. Campbell, Burkburnett, reporter; C. T. Parker, Rising Star, sergeant at arms; and Douglas Williams, Houston, parliamentary.

The club is taking an active interest in all campus affairs, and through its officers is giving many constructive suggestions to college officials who are keenly aware of the problems facing the returning veteran in completing his college education.

Since the college still is on the year-round basis of education, it is expected that a large number of the veterans will remain on the campus through the summer months in order to complete their chosen courses in the shortest possible time.

The veterans range in age from 19 to 34, and their courses of study are almost as varied, 31 being enrolled in the engineering courses offered at Texas A. & M. College, agriculture has 27, liberal arts eight, and veterinary medicine course has attracted 24 veterans.

"I believe the administrative officers and faculty of Texas A. & M. College understand the veteran's problems," President Fleisher said. "We are being given every consideration here, and we deeply appreciate the kindness and counsel of the teachers. As soon as the veterans are released from service

they should not delay in entering college, because when our numbers increase sufficiently more courses of study will be possible. The Veterans Administration is anxious for every service man to avail himself of the privilege of a college education, and Texas A. & M. College is ready to do its share in the program. The A. & M. Ex-Servicemen's Student Club welcomes inquiries from veterans from any branch of the service."

Conservation of the soil is largely a matter of using the land in accordance with the dictates of Nature.

course of study rather than technological and scientific courses. Bachelor of Arts and Bachelor of Science degrees are granted in the liberal arts in economics, education, English, history, mathematics, modern languages, and physical education; a pre-law course is also available. The Bachelor of Science degree is offered in biology, including botany, zoology, and bacteriology; chemistry, entomology, geology, and physics. Courses are also offered for pre-medicine and pre-dentistry work.

Firebreaks hold forest fires in check as dikes hold back the floods.
