

7,410 Persons Are Enrolled in Job Training Classes

A. & M.'s extension job training program is growing fast. The annual report just made by the Industrial Extension Service to the Texas State Board for Vocational Education shows 7,410 individuals

enrolled in 513 classes held in 475 Texas cities and towns during the 12-months' period July 1, 1944-June 30, 1945. The Industrial Extension Service was operated as part of the Texas A. & M. School of Engineering in cooperation with the Texas State Board for Vocational Education. Major programs were supported by State and Federal vocational funds, and were partly financed by the Texas A. & M. College, Director E. L. Williams said.

Certain courses were offered specifically for war industries, and the instructors were paid from vocational war training funds.

Functions of the Industrial Extension Service are grouped under four main heads in the annual report. These are: teacher training, supervisory (foreman) training, extension training for occupational groups, and branch training schools.

During the period covered in this report, the Service maintained 24 full-time employees, and 50 employees devoting part-time to the program.

Branch training schools operated by the Service were supervised during the year by C. H. Groneman. These schools are located at Inks Lake, Cuero, Grand Prairie and College Station.

The annual report cites the various courses given in each of the four main groupings of functions of the Services, names the instructors and shows details on number of classes organized, number of students enrolled, number of Texas communities represented, and other information on specific courses considered of interest.

Navy Needs Men For Maintenance Of Peacetime Fleet

Men to man history's mightiest fleet as it prowls the world to maintain peace will be recruited in an immediate national drive according to Lieut. Comdr. Jack Beebe, Officer in Charge of Navy Recruiting in Southern Texas.

"Texans, military and civilian, played so memorable a role for the Navy in its phase of winning the war that we are now being called upon to support another great objective, maintenance of the peace," Commander Beebe said. "So great was the response of Texans in those dark, desperate days of 1942, when our own Cruiser Houston was but one of the many victims of the treacherous enemy, that in the minds of Americans Texas almost has become a naval entity in itself.

"That tradition must be maintained by volunteers to keep the peace won at so precious a cost to fellow Texans and fellow Americans."

Commander Beebe announced that voluntary enlistments again are being received directly by the Navy, in accordance with a recent presidential decree. Enlistments are being accepted for the regular Navy from those 17 to 30 years of age for four-year terms and from than 17 to 50½ for the Naval Reserve for the duration of the national emergency plus 6 months.

For those men who have not yet reached 18, and enlist with the consent of their parents, the term of enlistment is only until they reach majority on their twenty-first birthday.

Commander Beebe said he anticipated heavy response to the recruiting drive, since the Navy of today offers young men a career as well as the more glamorous excitement of adventurous travel, due to the high specialized equipment developed during the war, such as expanded use of the high speed Diesel engine, radar, radio and other devices in the electronics field.

The Navy's recruiting drive is designed to speed demobilization of men with long war service, to reduce the Navy's calls through Selective Service and at the same time enable the Navy to fulfill its extensive responsibilities through the transportation period and beyond, the Commander added.

An attractive program for men changing from the Naval Reserve to the regular Navy, and men re-enlisting in the regular Navy has been announced, Commander Beebe said. These men retain their rights to mustering out pay, are entitled to full credit for past active duty, are given a special cash re-enlistment bonus and get up to 60 days' leave.

Applicants should inquire at the nearest Navy Recruiting Station for full information.

W. R. HORSLEY, Vice-Director Student Affairs.

Wamble Is Named Research Chief In Cotton Oil

A. Cecil Wamble has been named research engineer in vegetable oil technology for the Texas Engineering Experiment Station and manager of the Cottonseed Products Research Laboratory. Wamble had been in charge of cottonseed investigations for the Texas Cotton Research Committee since February 1943.

Among Wamble's new duties will be coordinating the work of the Engineering Experiment Station in vegetable oil technology with teaching departments of A. & M.'s School of Engineering and outside agencies. He will assist the Chemical Engineering Department in giving the annual short course for cottonseed oil mill operators.

Wamble also will set up a laboratory for cottonseed testing in cooperation with the Chemurgic Research Center, will be consultant to staff members in projects sponsored by the Texas Cotton Research Committee, and will conduct research of his own conception.

USHERS WANTED

All students interested in serving as ushers at Texas A. & M. football games during the 1945 season should contact Art Adamson at the door to Downs Natatorium.

Three Members of A. & M. Staff Go Into Retirement

Names of three veteran Texas A. & M. College staff members who went into full retirement from the College system Saturday were announced last week by Dr. F. C. Bolton, executive vice president.

These are Dr. F. E. Giesecke, S. E. Asbury and L. A. Koenig, and their total service to the institution adds up to 109 years.

Dr. Giesecke was made professor emeritus, heating, ventilating and air conditioning for the College in 1940 when he was retired from active teaching. His long term at Texas A. & M., dating back to his graduation in 1886, was broken in 1912 when he joined the staff of the University of Texas, but he returned to his alma mater in 1927 and has remained ever since. During his reign as college architect, beginning in 1895, he designed a large number of the buildings now in use on the campus.

Mr. Asbury retires as assistant state chemist with the Agricultural

of the Texas Cottonseed Crushers Association, said Wamble also will be custodian of the organization's machinery and equipment housed in the Cottonseed Products Research Laboratory.

A native of Mississippi, Wamble came to Texas A. & M. College as a student as this was the only institution of higher education at that time where through chemical engineering he could specialize in cottonseed oil work.

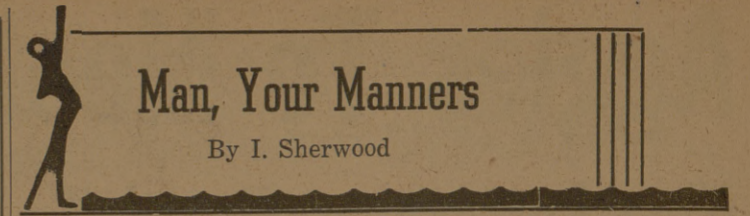

After graduation at Texas A. & M. in 1933, Wamble spent the next ten years in fields related to vegetable oil technology, including seven years as chief engineer for the Mississippi Cottonseed Products Company, which operated 16 cotton oil mills.

He has been a frequent contributor to publications devoted to cotton and cotton oil industries, and has been in demand as a lecturer on cottonseed oil mill operations before groups within that industry.

The Arthur Everts cameo collection, the largest privately owned collection in the world, dates back 2,000 years.

LOUPOTS

Watch Dog of the Aggies

Man, Your Manners

By I. Sherwood

Football has its etiquette for player and spectator. Courtesy is an integral part of the sportsmanship of the playing field. It should also be a characteristic part of the behavior of the spectator.

Spectators are expected to be noisier in their approval of football than at some other sports but small actions unconsciously per-

formed during moments of excitement reveal the character of the spectator. One of the surest tests of our courtesy and good breeding is that to which sports and games expose us.

The well-bred player doesn't boo the referee or a player from a visiting team. He compliments the winner of the game and if he is the winner he credits himself with good luck as the cause. It is pretty difficult at times to be a good loser, to be a decent, generous winner or to play with those who are neither.

Certain courtesies are observed by spectators—even though they may be done in a perfunctory manner. Everyone takes part in the "welcome yell" for both teams. Everyone rises when the Alma Mater of either school is sung. Partisans of both sides applaud an injured player as soon as he gets to his feet whether he continues to play in the game or has to leave it.

When the game is over the victory and defeat are over; the sports writers should be the ones to hash and rehash it.

John D. Rockefeller, Jr. drove the last rivet in the final building that completed the construction of Rockefeller Center, in New York City, on November 1, 1939.

Trade With Lou--He's Right With You

FAIR TRADES and TOP PRICES

are Lou's reputation with Aggies for many years. They have made him the biggest dealer in used equipment in town.

TRY US AND SEE!

A WORD TO YOU OLD AGGIES

Thanks a million for your business this summer.

You'll be going home soon for a few days. Tell the new boys about A. & M. and its traditions. And explain Lou's deal on used books—they have a full week to return any book they decide they don't want—and they can save 50% by coming to the Trading Post.

WANTED — \$5,000.00 Worth of Used Books

Here are some of the books I need:

- Accounting and Statistics: Finney: Introduction to Principles of Accounting
- Agricultural Economics: Case & Bergmark: College Geography
- Goode: School Atlas
- Gras: A History of Agriculture
- Agricultural Engineering: Jones: Farm Gas Engines and Tractors
- Agronomy: Hutchinson, Wolf and Kipps: Production of Field Crops
- Biology: Fuller: The Plant World
- Potter: Textbook of Zoology
- Guyser: Animal Biology
- Dairy Husbandry: Olson: Elements of Dairying
- Engineering Drawing: Svenson: Drafting for Engineers
- English: Morgan: Opinions and Attitudes Summey: Manual for Freshman English
- Entomology: Fernald: Applied Entomology
- History: Hicks: A Short History of American Democracy
- Hall & Albarn: History of England and the British Empire
- Horticulture: Adriance & Brison: Propagation of Horticultural Plants
- Mathematics: Hart: Brief College Algebra
- Sparks & Rees: Plane Trigonometry
- Spars: Trigonometry Tables
- Mechanical Engineering: Crawford: Introductory Problems in Engineering
- Slide Rules: Keuffel & Esser
- Rigsby: Student Manual of Welding
- Poultry Husbandry: Knandel: Profitable Poultry Keeping
- Irwin, Funk, Winter & Parker: Poultry Laboratory Manual
- Rural Sociology: Dow: Society and Its Problems

I want drawing instruments, drawing boards, T-squares, slide rules, and THREE HUNDRED DICTIONARIES.

BRING IT TO LOU

Whatever you have—in any condition—books, hats, slide rules, drawing instruments, veterinary equipment, anything. Get Lou's offer before you sell.

I NEED:

Slide Rules—Fellows, I am really short on slide rules, and will pay to get them.

Drawing Instruments—I need these badly, and will pay premium prices. But—if you are selling your set to a new Froggie let's be fair and sell him a complete set. We have a full stock of K. & E. parts.

Give Lou a chance to help you get top prices.
