Crisis In Education . . .

American education is in a critical dilemna. No, we're not speaking specifically about situations in our own back yard. Nor are we speaking about the "civil war" over at Texas u., where an irresistible force has been hammering against an immovable object for several years. Every college and university in this country is up against problems that are bringing grief to students and faculty alike.

What has happened? Simply this: some of the ideas on which American education was founded were valid for limited time only, but they have been carried over into a world where those ideas no longer fit.

Two world wars have made great changes in America. But no changes in our educational system were made. We simply enlarged the original model, or "pilot plant" to a size so huge that it no longer works the way it should. We have run smack up against the law of diminishing returns.

Now, therefore, it is necessary to create a new educational pattern for America. But changes in educational technique and purpose are not made as easily as changes in manufacturing.

There is one illustration from manufacturing that is pertinent. One of the largest cotton mills in the country was headed by a man who believed in long underwear for women. When abbreviated undergarments became popular, he vowed and declared that his plant would never make such clothing. By his orders, the machines kept turning out long-handles for women. Needless to say, the corporation he controlled went bankrupt.

Perhaps the parallel doesn't seem close, because students are flocking to college in unpredented numbers. But are we getting long-handled education?

What are the reasons for our being in college? Some are seeking simply a technological background with which to earn an above-average income in the future. That is a legi-

Some seek, along with that first purpose, to learn why the world is in a mess, and how it got that way. Certainly Is Brightened by Lady Vets an intelligent citizen needs to learn what he can, though there is no simple answer to such a huge question.

Some students are in college simply because it's the thing to do, and because a diploma gives prestige. All over the last yours truly hopes to see the country, it is probably these students who give rise to in the "Brazos Bottoms" . . . four the biggest problems. Paradoxically, these students give ought to be enough! The students least "trouble" because they don't care whether they learn anything or not, so long as they get a sheepskin. of fairer sex are back with us af-ter some 3 years absence. The "poop

Perhaps, in the next ten years, it will be necessary for from group" says that we aren't American colleges, treating the problem on the basis of on the speed-up program any longpresent needs, to split themselves into many different types er. Going pretty fast in mine. pending on what type of education is needed by and required for different student groups. Do we worship a fouryear fetish that is outworn?

A. & M. Reconverts . . .

The war is over, so far as A. & M. College is concerned. As of Monday morning, the college returned to its peacetime schedule-substantially modified by the presence of thousands of World War II veterans on the campus.

The speed-up is finished. Not many months ago there was at this college a Navy course which reviewed trigonometry in one hour, and if a student sneezed, he missed calculus. Those days are gone-even if subjects do seem to shoot by rapidly in these short summer terms.

Many traditions at A. & M. have been dropped or to just how your Saturday nite slighted during the war years. Some of them have been spirit is made. Keep a close eye revived during the past year. Now is the time for us to on the junk pile outside Leggett review the entire body of A. & M. traditions, actively en- Hall or take another look in your courage those which have value, and quietly drop any closet if you live in Milner. ative investigation into the University be heard right now. It seems unusual since this is election time and Legislators aren't ordinarily concerned with anything other than politics-and, of course, it would be injudicious to construe a Legislative investigation of the University at this time as "politics."

What makes the current talk even more surprising is the great contrast with 1944. Compared to the turmoil at the University in that year any recent disturbance has been nothing more than a dull match of tic-tac-toe. A president was fired, a third of the Board of Regents resigned, five thousand students marched twice on the capitol, exstudent associations split across the state, and state officials-high and low-were embroiled in the controversy. But no effort was made to initiate a Legislative investigation. Finally, because of the persistence of the chairman of the Senate educational committee, a small-scale hearing was scheduled. Even this witness chair "investigation" was almost killed when a high elective official-now running for governor-tried to halt the inquiry.

It is doubtful that any situation now is more urgentor even equally as pressing—than the situation which existed during 1944. This is not to say that no good could in Atlanta will be looking for a of the Texas A. and M. College come of an investigation by the Legislature.
