

Prominent Veterinarians Present Developments in Field to Texas Ass'n.

The annual summer meeting of the State Veterinary Medical Association was conducted at A. & M. June 4 and 5. Each year the veterinarians of Texas hold two meetings designed to bring the veterinary practitioner up-to-date on the developments in his field. The summer meeting June 4 and 5 included many prominent veterinarians and associates of allied fields.

Dr. I. Forrest Huddleston of the Michigan State University, recognized for his work in Bangs disease in cattle and for his early work in development of etiology of the disease headlined the program.

Dr. Wilford Olsen, parasitologist with the Angleton Experiment Station presented his work on liver flukes.

Dr. J. W. Torbett of the Torbett Medical Clinic, Marlin, Texas, presented Bangs disease (brucellosis) as seen in the medical profession.

D. Hilton A. Smith, associate professor of veterinary pathology, Iowa State College, presented "Pathological Lesions as Aids in Diagnosis" illustrated in color.

Dr. Glenn L. Dunlap, representing Ashe-Lockhart of Kansas City, Mo., discussed "Rabies and Its Control."

The representative from the American Veterinary Medical Association was Dr. R. C. Klusendorf of the Chicago office.

The present officers of the State Veterinary Medical Association of Texas include Dr. Chas. W. Koberg of San Angelo, president; Dr. H. Shull of Texarkana, first vice-president; Dr. W. W. Armstead of College Station, second vice-president; Dr. E. W. Wupperman, Austin, secretary-treasurer; and Dr. E. A. Grist, College Station, corresponding secretary and editor of the Texas Veterinary Bulletin.

A program also was arranged for the Women's Auxiliary including a demonstration in food preservation by Miss Gwendolyn Jones of the Texas Extension Service. Luncheons and informal get-togethers completed the entertainment for the ladies.

Eels have scales on the inside of their skin.

A&M Research Heads To Meet Here June 14

Trustees and councilors of the Texas A. & M. College Research Foundation will hold their annual meeting here June 14-15, it was announced today.

The trustees will meet June 14 and the entire Foundation membership will get together the following day. Four of the five groups of councilors—college, public, industrial and alumni—will elect new trustees, nominated previously by mail from the membership. The fifth group—agricultural—has no trusteeships falling open this year.

Cottonseed Millers Hold Short Course On Campus This Week

A cottonseed-oil mill operators short course is being held on this campus this week, and will end Saturday. Registrants checked in Sunday and Monday at the Cottonseed Laboratory and are being housed in the top floors of Dorms 5 and 11.

A banquet will be held tonight by the group.

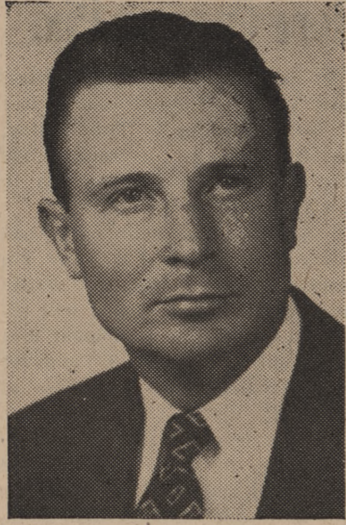

Trucks Now Bright Maroon and White; Aggies Cheer Sight

Once upon a time the trucks and work vehicles of the buildings and college utilities department were a dingy sight—painted in various drab or weather-beaten colors. That has all been changed in the last few weeks.

College vehicles have been sprayed with a finish of shiny maroon and laquer, and the letters "B & CU Dept., A. & M. College" are stenciled on their glistening sides. It's enough to make an Aggie stand up and cheer to see these bright vehicles gliding through the oak-shaded streets, proudly displaying the school colors.

More men become victims of insanity than do women.

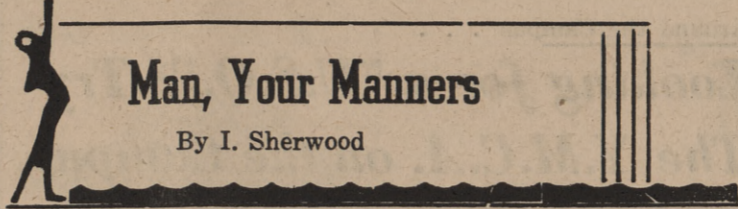

Aggie Ex Is Named South Tex Manager

Richard N. Conolly

Richard N. Conolly, who was graduated from Texas A. & M. College in 1937 with a Business Administration degree, has been appointed manager at Corpus Christi for the South Texas area of Stewart & Stevenson Services.

Mr. Conolly came with the company in December, 1945, after completing nearly five years of active duty with the U. S. Army Air Corps, attaining the rank of Lt. Colonel.

Man, Your Manners

By I. Sherwood

"What can you do when a particle of food has lodged between the teeth?"

The answer is, unequivocally, that you must wait until you are alone before doing anything about it. We still find toothpicks at the cashier's desk in many eating places, but that does not justify using them in public. Avoid offending those about you even though you may be uncomfortable

for a few minutes. It's not only what you do, but when and how you do it that leaves an impression on the friends, acquaintances and strangers you meet. So, remember, always, that the keynote of good manners is consideration for the feelings of others.

Those of you who will be leaving for your summer vacation, have a good time, and we will see you in the Fall.

A. & M. Offers Opportunity Awards to Top High School Graduating Seniors

Texas A&M is entering into the most challenging scholarships program ever attempted by a Southwestern institution, under the title of "The Texas A. & M. College Opportunity Awards," it was announced today. The announcement came from the office of the Texas A. & M. College Development Fund, joint representative of the College and its Association of Former Students.

The Opportunity Awards, ten in number at its beginning, will offer through a statewide competition, an opportunity for high school graduates of outstanding ability to secure a complete education at this institution, in spite of financial handicaps. Designed to reach that large group of highly capable boys who graduate from high school each year but do not have the money to attend college, this program will offer the ten best of these men in Texas full four-year scholarships worth \$200 to \$300 per year for their four years of college.

In their annual meeting on the campus recently, the Board of Directors of the Association chose this project as the objectives for their next year's giving program, assuring the financing of these awards for a minimum of five years. The permanent scholarships committee of the college has approved this program and set up the machinery to put it into operation.

Application forms will be mailed

upon request to all 1946 graduates (male) of accredited Texas High Schools, and will also be sent to a list who have been recommended by their high school superintendents and principals. From the applicants, ten winners will be selected, five to receive the \$200 awards and five the \$300 scholarships. These winners will be announced during the summer and will enter the College in September.

Gen. E. H. Leavey Gets Degree at Commencement

Major General Edmond Harrison Leavey, Chief of Transportation, United States Army, received the honorary degree of Doctor of Law at the College Commencement services on May 31. General Leavey originally was scheduled to receive the degree during the muster ceremonies but was unable to be present at that time.

General Leavey entered Texas A. & M. in 1913 and two years later was appointed to West Point. A Lt. Colonel at the beginning of World War II, he advanced rapidly until he gained his present rank.

In command of all engineering troops in the Northern African campaign, General Leavey served later in the Pacific Theater on the staff of General McArthur.

4 Egyptian News Editors Visit Here

Four top-ranking Egyptian journalists, representing government, opposition and independent newspapers, arrived here Saturday to visit A. & M. In this country for a seven-week tour of the United States as guests of the Department of State, the Egyptians expressed a desire to visit Texas A. & M. College.

The journalists are Galal el Hammami, managing editor of Al Kotla, Bloc Wafdist daily; Negib Cnaan, foreign editor of the leading independent daily, Al Ahram; Abel Kader Hamza, associate editor of Al Balagh, leading Wafdist (Nationalist) daily; and Fahmy Samaha, vice president of the weekly magazine, Al Mussawar, who will also represent the magazines, Al Itnein, L'Image, and Parade, all published by the El Hilal Publishing House.

Egypt's visiting press representatives express a live interest in American farming methods, particularly the intensification of crop production on sub-marginal lands. In the South and Far West they will inspect irrigation and land reclamation projects, spending several days at the Tennessee Valley Authority and Imperial Valley developments. In view of

Egypt's importance in the cotton export trade, the group is interested in American cotton production and textile manufacture. A trip to the New Orleans Cotton Exchange was planned and they then visited Louisiana cane and rice growing areas.

Tom Richmond of the Texas Agricultural Experiment Station met the journalists at Beaumont on their way to visit Texas A. & M. College early Friday morning. He conducted them on a tour of the Rice experiment station near Beaumont, through the Boyt properties at Devers and on to the rice growing area between Houston and Waller.

The party then spent Friday night at Prairie View University and came on to College Station Saturday to visit the Brazos bottom plantation and the Cottonseed Research laboratory on the campus as well as other places of interest to them.

On Sunday, after spending the night in the A. & M. Board of Directors headquarters on the campus, the party moved up their visit here and were taken to Houston to board a train for California.

A square jaw is not an indication of strong willpower.

Cottage pudding is plain cake covered with sweet sauce.
