Initiation For Newmanites Sunday

Sunday November 24, 1946 at 1 p. m. all new members of the Texas A. & M. Newman Club will be initiated at the Knights of Columbus hall in Bryan. According to Herman Neusch, president of the club, an elaborate program has been arranged which will include an impressive initiation ceremony followed by a dance.

The main purpose of this initiation is to bring together all the members of the Newman Club and to make them feel they are actually a part of this organization, while pointing out to them the real meaning of its theme "to deepen the spiritual and enrich the temporal lives of its members through a balanced program of religious, intellectual and social activities." Mr. Neusch states that this program will be one of the best of the season so every Newman Club member is urged to be present.

Museum Curator At Fish & Game Meeting

H. B. Parks, curator of the college museum, spoke to the Fish and Game club last Tuesday night on the subject of "Birds and their relation to plant distribution in Brazos county".

As a result of long observations and study in the College vicinity, Parks has concluded that cedars and several varieties of elms growing in this area were seeded by birds who carried the seed in from other localities in the state.

Bill Welch, club president, announced that the deadline for submission of papers for the club-sponsored contest would be extended. Participation is limited to Fish and Game majors and the winners will be sent to a national conference relating to fish and wildlife of their own choosing. A Fish and Wildlife Service film, "Beavers at Home", was also shown.

Architects Hear Houston Designer

Stayton Nunn of Nunn & McGinty, Houston architectural firm, was principal speaker at a meeting, last week, Nunn and McGinty have been nationally recognized for their USHA Project and the De Felchin Faith Home for children in Houston. The River Oaks shopping center is also an example of their work and more recently they were associated in the design and construction of the new Memorial Hospital.

Mr. Nunn's discussion, "A Battle of Words", elaborated on the inevitable word conflict between the Architect and the Engineer as to which is more important to the building industry. The final conclusion was that proper design and construction can only be accomplished through class collaboration and cooperation.

Plans for the annual Architects' Ball on Feb. 14, which is traditionally a lavish costume affair, were discussed in a short business meeting of the society.

Johns Addresses AH Seminar on Feeding

J. H. Jones, of the Agriculture Experiment Station, spoke to the animal husbandry seminar students Monday evening November 11 on the bull feeding trials at the Balmorhea sub-station.

Ranchers of the Davis mountain area send bull calves to the station in the latter part of November. These calves are from registered cattle; each sire has 6 calves in the pens.

At the station the calves are fed a daily ration of 2.5 pounds of cottonseed meal, 4 to 5 pounds of alfalfa hay, and all the chopped hegari they want. The average daily gain is 2.5 pounds at a cost of 25 cents.

The feeding period terminates during the month of April with a field day. All the breeders and other interested parties gather to compare the feedlot gains made between calves from different sires and of different breeding. Jones said that this would be the fifth year of the trial and the station expects to feed over 200 bulls this year.
