

OU, TCU, and A & M Cafeteria Food Prices Compared by AVC

In an attempt to show food prices at various college cafeterias, the American Veterans Committee at Texas A. & M. mailed questionnaires to six other schools. To date only two schools have replied and their figures as compared to A. & M. prices at Sbisal and Duncan cafeterias are tabulated below.

This survey cannot show the size of serving, quality of food or efficiency in operation of the cafeteria. It assumes that despite the size of the serving, only one serving will be purchased; therefore the cost per serving is the basis of comparison.

When and if replies are received from Texas U., S.M.U., or Rice, another tabulation will be printed in the Battalion.

Meats—	OU	TCU	A&M
Roast beef	21	30	26
Roast pork	31	—	—
Ham	35	30	33
Bacon (2 slices)	12	10	12

'A Kiss Goodnight, Is All Right, But Just Remember This,' Say Specialists

by Mack T. Nolen

Kissing is here to stay, predicted Dr. Henry A. Bowman in a speech to LSU students last week. And I think he is right! "Kissing used to be the line crossed near the finish line of marriage, but today it is the symbol of the beginning of a romance," he continued. Though the meaning has changed, the purpose is still the same.

Taken objectively, the kiss is perhaps the silliest of all man's inventions. Besides revealing some lazy hygiene habits and offending queasy nostrils, it serves for nothing but a step in the right direction.

The physiological value of the kiss is immense. World crises fade, time stops, flowers bloom in snowdrifts, and life takes on new savor when two lips lock with two lips in the stillness of the night. Kisses have inspired more good and evil than any nationalistic harangue ever thought about.

After completing a kiss, what have you got? An insecure hold on your senses, maybe, and any number and variety of strange bacteria. A queer bubbly feeling in the pit of the stomach, and an overall lightness that would seem to defy gravity. And if you are true with yourself, a silly feeling. Many men can trace all their

troubles back to a mere kiss. One is sufficient, and the ramifications are evident, but the kiss is here to stay. Who really wants to get rid of it anyhow?

Loveless Elected Reserve Officer Association Prexy

The following officers were elected at the regular meeting of the Reserve Officer's Association in the Petroleum Lecture Room Wednesday, March 12: Lt. S. L. Loveless, Cavalry Reserve, president; Lt. Fred Benson, Naval Reserve, vice-president; Lt. W. A. Aven, Air Corps Reserve, second vice-president; Lt. Col. H. F. Murray, Air Corps Reserve, secretary; and Capt. Theodore Moffett, National Guard, assistant secretary.

E. N. Holmgren, outgoing president, was presented with the executive's key of the association.

Regular meeting night of the club is the second Wednesday of the month. Committees for the coming year will be appointed at the next meeting. Reserve officers from all branches are urged to attend.

State Foundry Establishes 2 Scholarships

Testing out a plan for pre-training of future employees, the Texas Foundries, Inc., of Lufkin has established two scholarships for engineering undergraduates at A & M, Dr. Howard W. Barlow, dean of engineering announced Thursday.

Recipients of the scholarships, which will pay \$40 monthly, will be chosen from among a group of junior engineering students, especially interested in foundry processes, who will go to Lufkin at the end of this month for an inspection trip and a conference with Col. C. C. Chambers, head of Texas Foundries.

From this group four will be chosen to spend their summer vacation at Texas Foundries employees, and at the summer's end two of them will be awarded scholarships for their final college year.

The scholarships will be awarded with the understanding that the recipients will enter the employ of Texas Foundries upon graduation if it is possible for them to do so, the corporation guaranteeing employment for at least one year. During this time the scholarship men will be tested in various capacities to determine their best abilities.

During his senior year, each scholarship holder will prepare a paper dealing with his previous summer's work and outlining constructive suggestions.

Col. Chambers is also interested in offering summer employment to other undergraduates, Barlow indicated.

In commenting on the plan, Barlow stated, "Through this procedure the donor will have an opportunity of securing top-notch personnel, and the young men chosen will have an unexcelled opportunity for an early start in their profession."

Veterans to Elect Athletic Representative March 21

Only Classified Seniors Are Eligible; Must File Names Before Next Wednesday

With less than ten days before the next meeting of the Athletic Council, the Veteran Students' Association Board of Representatives has set up the machinery for the election of a veteran member to the council. At a meeting Wednesday night in Goodwin Hall the group laid plans for an election March 21.

Nominees must be classified seniors to be eligible for office as Athletic Council representative and must not be attending school on an athletic scholarship. Voting unanimously, the board decided that candidates must file before Wednesday noon, March 19, in the Student Activities Office.

The election will be held on Friday, March 21 in the rotunda of the Academic Building and at both mess halls. The polls in the Academic Building will be open from 8 a.m. to 5 p.m. Friday, and the polling booths at Duncan and Sbisal Halls will be open during the noon and evening meals. E. O. Courtade, J. B. Haywick, Jesse Welch, and E. D. Howd were appointed by vice-president Bob Polson to serve as the election committee.

Yellow slips will be required. Pictures of duress candidates are urged to submit pictures of their wives or sweethearts as candidates for duress at the Cotton Ball. R. P. Sanders, heading the selection committee, stated that there is no stipulation as to whether the duress be a wife or a sweetheart, and final selection will be based solely on photogenic appeal.

Pictures of duress candidates may be turned in to Room 207, Goodwin Hall or to Scott Hood, 47, Milner Hall, and the deadline for entries is Thursday, March 20.

Chairmen were appointed to various standing committees, with committee membership open to any veteran. Chairman of the Cam-

Hillel Dance Slated May 3

by David M. Seligman

The Hillel Foundation has announced the date of its annual dance as May 3. A highlight of the club's social program for the semester, the affair will be held in the Veterans' Lounge of Sbisal Hall to the music of the Aggieband Orchestra.

Committees for making arrangements have been named by Archie Brood, president of the club. The social will last from 8:30 p. m. until midnight, and refreshments will be served, he announced.

Social chairman of the club is Dick Gottlieb, who is in charge of the week-end program. Members of the attendance committee have been contacting members to discover the number who plan to attend.

Reports state that past Hillel dances have been popular and well attended. In view of the number of dates anticipated to visit the campus for the early May social, Mrs. Taubenhau has reserved rooms in the Aggieband Inn. Any member wishing to obtain a room in the Inn should contact her in the YMCA.

Tickets for the dance will go on sale in the near future at \$3 stag or with a date.

Small, Rain-Swept Audience Appreciates 'Cramped' Ballet

by Vick Lindley

Undaunted by a cloudburst, a miniature stage, and a minuscule audience, the Ballet Theatre gave College Station balletomanes their quota of thrills Wednesday night.

By rapturous applause of Igor Youskevitch and Nora Kaye in the Pas de Deux from the Black Swan, the audience indicated its preference for the classical Russian ballet. Youskevitch and Kaye demonstrated the perfection that comes from long years of training, and that can be acquired no other way.

That the audience was well accustomed to ballet was shown by prolonged applause when either of these two executed difficult maneuvers.

By comparison, the audience was indifferent to the "American style" ballet which has been the distinguishing mark of the Ballet Theatre. This reviewer, who preferred the delicate clowning of "On Stage" with Michael Kidd as a stage-

struck janitor, found himself backed into a corner of Guion Hall lobby during intermissions, defending his preference.

The other two numbers were "Tallyho" staged by Agnes DeMille in the musical comedy vein which she created on Broadway, and "Interplay" staged by Jerome Robbins, an intricate counterpoint between the classic ballet steps and the eurythmics of Wigan, Graham, and other modernists.

If Aggies had realized how many good-looking girls would be whipping around the stage in entrancing costumes, Guion Hall probably would have been packed, even at the \$1.50-\$2 tax.

Stage Cramps Company More disappointing than the small audience was the way in which the movement of the dancers was cramped by Guion Hall's orange-box stage. Accustomed to the freedom of a normal-sized platform, the dancers frequently

found themselves having to put on "brakes" to avoid crashing into the side walls.

The company of 80 persons arrived here in a special train, including four box cars of costumes, musical instruments, and scenic effects.

Most of the scenery, lighting equipment, and such paraphernalia was left sitting in the box cars on the siding. The spectacular backdrops were twice too long for Guion Hall, and there was no place to connect or hang the many spotlights, floods and special effects.

Even the orchestra found itself cramped, though Guion does have a large pit. The music would have made a concert by itself.

General opinion after the performance was that though College Station enjoys ballet on a concert scale, we have no place adequate for ballet on the grand scale.

AVMA Dance Set Tonight In Sbisal Hall

The Junior chapter of the American Veterinary Medical Association of A. & M. will hold its annual semi-formal dance this evening at 9 o'clock in Sbisal Hall, with Bill Turner and the Aggieband Orchestra furnishing the music.

The committee in charge has arranged an added attraction in the selection of the chapter's Cotton Ball duress. This selection will be made by members and their guests during the dancing intermission.

The chapter held its March meeting last Tuesday evening in the vet hospital amphitheater and heard Dr. H. T. Cartrite of Canyon. Dr. Cartrite was introduced by Dr. W. W. Armistead, president of the Texas Veterinary Medical Association, and a former instructor of Dr. Cartrite's.

The speaker's subject was "Do's and Don'ts of Veterinary Practice," and recounted his experiences in practice at Dallas and Oklahoma City. He stressed the importance of maintaining a professional attitude at all times. More than one hundred attended the meeting, and a short business session was conducted by president H. N. Starckie.

McGuire Chosen To Serve on ASEE Visual Aid Staff

J. G. McGuire of the Engineering Drawing department has been named to represent the Southwest on the Visual Aid Committee of the American Society of Engineering Education at the coming meeting in Minneapolis.

The announcement came from Professor John T. Rale of the Massachusetts Institute of Technology, Chairman of the Drawing Division of the A. S. E. E. It was stated that the committee has been organized to determine if more suitable visual aids in the form of slides or film strips on shop processes and their relation to drafting room dimensioning can be made.

As an integral part of their instruction program the Engineering Drawing department has used visual education for the past several years. The choice of McGuire to serve on the visual aid committee was thought to be a result of his report on this subject in the last convention of the society held in St. Louis.

Newcomers' Club to Meet Wednesday in Sbisal Hall

A dessert-bridge meeting of the Newcomers' Club will be held Wednesday afternoon, March 19, at 2 o'clock. Mrs. J. G. Potter has announced. The get-together will be held in Sbisal Hall, and ladies planning to attend are requested to call one of the following hostesses by Monday evening: Mrs. S. A. Lynch, 4-8599; Mrs. John Weber, 4-7909; Mrs. L. E. Kapp, 4-8319; or Mrs. Kenneth Kinken, 4-8899.

IRC to Meet Monday at 7

US, Russian Aims In Greece Topic

"U. S. and Russia Aims in Greece" will be the topic of discussion by the International Relations Club Monday evening at 7 o'clock. H. H. Caldwell, faculty leader, has announced. The informal session will be held in Room 207, Academic Building.

An attempt will be made to evaluate the conflicting policies of these two powers and the effect upon the Greeks, the Balkan nations, and the stability of the world, Mr. Caldwell stated.

The IRC was the first of the discussion groups to be organized two weeks ago, and meetings are scheduled on the first and third Tuesdays of each month. Due to a conflicting meeting of Arts and Science faculty members, the date of this IRC session was changed to Monday.

Another problem which promises to encourage rabid discussion can be titled, "Should the United States help Turkey out of the Red fire," Mr. Caldwell said, and perhaps this subject will be selected for the next meeting.

Price, Waterhouse Officials Address Accounting Society

Houston representatives of the world's largest accounting firm, Price, Waterhouse Company, whose main headquarters are located in New York City, addressed the Accounting Society Tuesday evening. L. A. Linoff and Ray Jordan, of Houston's Price-Waterhouse Company, discussed the policies of the firm and answered questions from all prospective accountants.

Dr. Dunham, former professor at Yale and Harvard Universities and now personnel director of the New York office, discussed the firm's training program for keeping employees informed on latest accounting methods. The company's methods are based on previous experiences with different clients. After hearing the accounting authorities, the society held a business session to make tentative plans for a forthcoming banquet to be held April 8. A duress to represent the Accounting Society at the Cotton Pageant and Ball was also selected during the course of the evening.

Petroleum Engineer Picture

The Petroleum Engineering Club picture will be taken for the LONGHORN in front of the Petroleum Building at 12 noon, Thursday, March 20. Members should wear coats and ties.

Scenes from "A Murder Has Been Arranged", which the Aggie Players presented at the Assembly Hall Wednesday,

Thursday, and Friday of this week.

LEFT, PICTURE 1 are Robert Q. Blakeney, Art Stauffer,

Nancy Tucker, and Mary O. Johnson. Blakeney played the role of Jimmy North (or Richard Simonson or Simon Richard-

son). Stauffer was the victim, Sir Charles Jasper, who was almost ready to celebrate his fortieth birthday. Nancy Tucker,

or Mrs. Arthur, was the mother of Mary O. Johnson, Lady Beatrice Jasper, seated next to her.

PICTURE 2. Orchestra leader

Cavendish, Frank Camp, admires the body (Stauffer), along with Bill Krause, who was responsible for "arranging the murder".

PICTURE 3. The woman of

mystery, Patty Kirkpatrick, is trying her best to speak.

PICTURE 4. Mary Johnson and Bob Blakeney have lots to talk about.
