## Texas City Relief Fund Tops \$4,496 in Community Drive

Contributions totaling \$4,496 have been sent to Mayor Curtis Trahan, the city council and churches of Texas City as College Station's official relief fund, W. W. Watts, student chairman of the community's aid fund group, announced yesterday afternoon.

## Equity Suit Needed To Clear Up Condition, Clark Declares

By Allen Self

An injunction should be filed with the Brazos county equity court to stop the present Board of Directors from functioning, Dr. F. B. Clark, head of the economics department, stated yesterday in an interview.

This action, he claimed, would enable an impartial group of local men to ascertain that no irregularities of administration exist in the present set-up. Such a group would be better able to discern maladministration than a legislative committee, Dr. Clark asserted.

He did not say who should file the suit.

Dr. Clark, still a little resentful over his treatment before the legislative committee, said he had appeared more to make charges than to furnish evidence to support them. "It is their job to do the investigating," he said.

When queried as to whether he still thought there was evidence sufficient to warrant a grand jury investigation, Dr. Clark replied, "Yes, I do." He declined to make any disposition of evidence other than that which appeared in the Battalion of April 22, concerning the breach of a dam in College Park property by order of administration officials.

Some kind of an ouster agency should be established, perhaps by constitutional amendment, to initiate impeachment proceedings against incompetent, Clark proposed. As it stands now, only the Legislature can institute impeachment proceedings against board members.

Dr. Clark also proposed that some group, such as the Texas

State Teachers Association, should submit nominations for board members from which the governor would be required to choose.

"It isn't a very good condition for higher education when not one of the governing body of a college is an educator," he claimed.

No Dislike

"I hold no dislike for Mr. Gilchrist personally. I do feel that some of his dealings with men have been unfortunate. But it is a matter of principle with me. We want to turn that lake in College Park to some public use—as a park, perhaps.

"It's true that mosquitos were breeding there when it was drained. We had made provision for cutting the weeds in the lake so that breeding could be eliminated. Many people living adjacent to the lake area have said they want it back, so that should prove it is not a nuisance. I hope some agency, such as that appointed by a court of equity, will allow us to make some disposition of the lake."

Forgiveness

Dr. Clark expressed his willingness to forgive the present administration for their bungling if they would change their ways.

"I believe everyone would cooperate with President Gilchrist if he changed his methods, and that includes the students," Dr. Clark asserted.

Vet Appraisal

Service Newest

Student Aid

A new activity on the A&M campus is the Veterans Appraisal Service under the Education and Psychology Department.

This guidance program is accomplished through the administration and interpretation of psychological tests. Upon the completion of such tests, individual counseling and guidance is offered each student. These tests are administered and scored by Mrs. L. J. Payne, Mrs. Leonard Dicky, and Mrs. Joe Reed Street, and interpretation and counseling is done by Robert H. Hughes.

Although this is a new service to A & M veterans, it is well-established in many universities and colleges throughout the nation. This activity is recognized as a valuable aid in helping a student to choose the right course of study and the right vocation after graduation.

All students desiring guidance in the educational and vocational fields, are invited to contact this office in C Room of Hart Hall, or to call 4-1208 for an appointment.

Groneman Retires as Prexy Of Vocational Association

Chris Groneman, acting head of the industrial education department, will become vice president-at-large of the Texas Vocational Association September 1, when he retires as president of that organization, it was revealed today. Wade Banowsky of Fort Worth will succeed Groneman as president.

## Two Danforth Fellowships Now Available

Danforth Fellowships will be available this summer for a junior and a freshman in the School of Agriculture, according to an announcement received by Dean C. N. Shepardson from the Danforth Foundation.

The junior will spend two weeks studying the problems of manufacturing, commercial research, distribution, advertising, and personnel at the Ralston Purina Mills in St. Louis and will then attend a two weeks Leadership Training Camp on Lake Michigan. The freshman will attend the Leadership Conference only.

The stipends will approximately cover actual expenses except transportation. The program for the junior will extend from July 27 to August 24 and for the freshman from August 11-24.

A faculty committee to award the fellowship has been appointed of which J. Wheeler Barger, Professor of Agricultural Economics, is chairman. Literature and application blanks may be obtained at his office. The selections will be made on April 29.

Selections will be based on scholarship, leadership, activities, and general culture.

## 'No Star Chamber Member'---Gilbert

William A. "Boots" Gilbert, referred to by Delbert Shultz as a member of the "Oust Gilchrist" star chamber today denied having any part in their activities.

"Shultz often came by my room to talk to me, wanting me to help, but I never participated in either their meetings or their activities. I did say I was in favor of Mr. Gilchrist's removal, but that's all," Gilbert stated.

"I don't know about any secret meetings with Shultz," Gilbert said. "When he came to talk to me, we closed the door. Is that secret?"

Warren Gilbert, the older of the Gilbert brothers, attests that he was in the South Pacific in 1945, when Shultz's alleged star chamber activities were going on. Warren Gilbert did not return to the campus until September, 1946.

## Regular Army Applicants To Be Screened

A roving screen team consisting of 7 officers and necessary assistants will arrive at A. & M. on April 29 for a four-day stay to interview and examine qualified applicants for integration into the Regular Army.

Lt. Colonel John G. Johnson and Lt. Colonel Van H. Slayden outlined to all interested in Guion Hall the new Army integration program.

The main source of augmenting the officer strength in the Regular Army will be honor graduates of outstanding colleges and universities and former commissioned officers who left the Army in order to complete their education and who are graduating by July 15. This interview team will make its headquarters at Ross Hall.

All interested students are urged to report to Ross Hall as soon as possible to arrange for an appointment to meet this team. Application blanks and full information will be available from the team. Colonel G. S. Meloy, Jr., commandant, announced that this team was qualified and charged with the processing of all applicants and that the complete papers after review by the team will be forwarded directly to the Adjutant General for necessary action.

Interested parties may arrange for appointment through the Adjutant of ROTC at Ross Hall.

## 900 Veterans Still Must Complete Form

Over 900 veteran students under the G. I. Bill of Rights face loss of subsistence payments because they failed to fill out VA Form 1908 in Sbis Hall from April 21 to 25.

The deadline has been extended to Tuesday, April 29, and those who failed to fill out these forms may do so by reporting

to one of the training Officers in the Guidance Center, Room "B", Hart Hall.

The Guidance Center, which is normally closed on Saturdays, will be open Saturday, April 26, to assist those who failed to report. This form does not apply to disabled veterans under Part VII.

The Aeronautical Engineering exhibit will include design problems by students, aircraft engines, wind tunnel, construction of wings, tail and control surfaces, various instruments used in controlling the plane's flight and the constant speed propeller, completed and disassembled.

The Chemical Engineering exhibit will include plastics and plastic molding, a model still, Cottrell precipitator, incendiary bombs, synthetic rubber, cosmetics, a magnetic plant, wetting agents, chemicals in airplanes, cotton seed oil, military explosives and fireproofing. Also included will be displays on photography, a model sulfur mine, soap manufacture, dyes and a liquid air show.

The Municipal and Sanitary Engineering Department also plans an exhibit.

In the mechanical and steam laboratory, cutaway engine mountings, including that of an Oldsmobile, the chassis of Ford, Dodge, and Plymouth will be on display. Complete Ford, Chevrolet, and Plymouth engines and a mounted Studebaker engine running on the test block will be shown.

Also for inspection will be a Worthington Diesel engine and generator, a turbo-generator unit, a Corliss valve steam engine, a hot air engine, and various other types of steam, oil and gas engines. Of interest to the popscience lover will be an exhibit showing the manufacture of popscience.

There will also be exhibits in the metallurgy and air-conditioning laboratories. A kinematics exhibit including novel cams and gears will be found in the M. E. Shop Building.

Included in the activities for this week-end are Agriculture-Engineers Day, open house in the dormitory areas, and the pinning of flowers on the individual cadets by the Cadet Commander's mother or sweetheart. Parents of all Aggies are cordially invited to attend the various entertainments planned and see A. & M. at its best.

REVEILLE, ERECTED APR. 21, 1947—The red granite memorial "T" was dedicated Monday afternoon as part of the San Jacinto Day muster. Here the color guard "presents arms" as trumpeters sound "Silver Taps" in honor of the never-to-be-forgotten dog mascot.

## Meloy, Anderson, Rollins Subpoenaed For Monday Night

Monday evening the state investigating committee will hear Col. Guy S. Meloy, Jr., commandant; Dean of Men J. W. Rollins, and Col. Frank Anderson, now track coach but former commandant. The session will be held in the Senate Chamber at Austin beginning at 8 p. m.

## Cadet Corps Plans Review Mothers' Day

In observance of Mother's Day, May 11, the Cadet Corps will hold a review on the main drill field at 10 a. m., Col. G. S. Meloy, Jr., commandant, has announced. This review will consist of both foot troops and mounted elements. Mounted elements will include heavy and light Field Artillery weapons, tanks of the Armored Cavalry, and 4.2 mortars of the Chemical Corps.

Highlighting this review will be the awarding of various medals and trophies to members of the Cadet Corps. Awards to be made will be the Field Artillery, Coast Artillery, and Ordnance Association Medals. These medals are awarded to outstanding cadets of the respective branches who are chosen by grades in academic subjects exclusive of military subjects, grades in military subjects, character, initiative, leadership, loyalty, cooperation, industry, military bearing, and neatness.

Also included in the awards will be the Sons of American Revolution Medal, Daughters of the American Revolution Trophy, which consists of a two-hundred dollar cash award, Daughters of the Confederacy Award, which is the Albert Sidney Johnson Saber, and the Caldwell Trophy. Basis for awarding the above medals and trophies are academic standards, proficiency in Military Science, leadership, and student's records.

Included in the activities for this week-end are Agriculture-Engineers Day, open house in the dormitory areas, and the pinning of flowers on the individual cadets by the Cadet Commander's mother or sweetheart. Parents of all Aggies are cordially invited to attend the various entertainments planned and see A. & M. at its best.

## Wind Tunnel Motor, Fan Delivered

### Contractor Bids Called For Soon

R. M. Pinkerton, head of the aeronautical engineering department has announced the delivery here last week of the 1,000 horsepower motor needed for the Southwest's largest wind-tunnel and aerodynamics laboratory at nearby Easterwood Airport. This leaves only the mounting of the motor and construction of a special 2,300-volt power transmission line to be completed before the \$100,000 plant is ready for operation.

Engineering specifications now are being drawn up for the motor mounting and power line construction, and bids from contractors will be called for soon.

Pinkerton said a B-32 four bladed propeller, 13 feet in diameter had been obtained from war surplus for the fan unit.

The wind tunnel, 90 feet long with a test chamber 7 feet high and 10 feet wide, will be able to handle the wing performance and engine-cooling tests, while the building of which the tunnel is a part will house the structural and engine testing laboratories.

Testing facilities will be made available to aircraft manufacturers in the southwest, a number of whom have expressed eagerness to use the plant, Pinkerton said.

The building was completed in June, 1945, but it was impossible to obtain the proper motor until recently, when it was purchased for \$75,000.

## Bucek Leaves Annex Post

### Dean of Bryan Field Quits For Schulerburg Business

Roy Bucek, Class of '42, Dean of Men at the Bryan Field Annex since September, 1946 and Assistant Director of Student Affairs since his return from the service in September, 1945, has resigned effective May 1.

He will take over and manage a frozen foods locker at Schulerburg, which is his home town.

When Bucek was a student here, he lettered in football for three consecutive years, 1939-41, and in basketball 1940-42, respectively. During his last year he was captain of the Aggie track team.

## Russia Is IRC Tuesday Topic

The IRC will meet Tuesday night at 7 p. m. in Room 205, Academic Building to discuss the topic "Will We Fight Russia?" This will be the preliminary topic and after some discussion it is to be broadened to "What Should be the American Attitude Towards Russia?"

This meeting of the IRC should be particularly interesting, as two of the speakers scheduled to appear are Milton R. Beychok and Richard E. Scruggs. These names should be familiar to readers of the "Letters to the Editors" column.

H. A. Caldwell, sponsor of the club, expects an attendance of at least 40 to 50 students. He expressed the hope that faculty members and students' wives interested in this topic would attend.

The club, serving as a medium of exchanging ideas, will try to evaluate and compare the Truman and Wallace attitudes toward Russia, with the hope of developing an informed student body.

## Doane Foundation Sponsors Farm Management Contest

A prize of \$25 will be awarded by the Doane Foundation to the student writing the best essay on Farm Management, according to J. Wheeler Barger, of the Agricultural Economics Department.

The contest is open to students who have completed or who are now taking the course in Farm Management. The essay should not be over 600 words in length and should deal with the application of practical ideas and principals in the management of a farm.

To be judged by a committee of college instructors, essays must be submitted on or before July 1. Further information may be obtained from Barger, whose office is in Room 400, Agriculture Building.

## Engineering Departments Prepare for AE Day May 10

(The following is a partial list of things to look for in the School of Engineering on Agriculture-Engineers Day, May 10.)

Since the Management Department was inaugurated during the war, this will be the first time they have participated in the exhibition. Their exhibit will consist of several parts, they being personnel and labor relations, time and motion study, production control, tool design and factory tooling, quality control, industrial psychology and personal testing devices. Photographs of labor strife, production layouts, tooling methods, and other interesting management functions will be shown. This exhibit will show the public that scientific management has come to Texas and that A. & M. is way out in front of the other schools and colleges in this section.

Each class in the Architecture

Department will have a problem on display. Samples of designs and works of various Texas architects, and various media of rendition such as water color, tempera, and charcoal will also be shown. On the humorous side will be a cartoon display depicting the trials and tribulations in the life of an architect.

Comprising the Civil Engineering Show will be demonstrations in the highway, the hydraulics, the soils, and the strength laboratories. Also included will be a surveying display, a structure display, and a study of stresses by the use of plastic models.

Included in the Electrical Engineering exhibit will be the photo-electric speed indicator, voice-on-wire recorder, Tesla Coil demonstration, Sonovox demonstration, levitator or "floating disc", speech scrambler, and mic-

ro-wave transmitting and receiving sets. There will be a high voltage exhibit using a surge generator, a high voltage show using a swing pendulum, a polarized light exhibit, the Stroboscopic effect, and an oscillograph exhibit showing "shape" of voice.
