roleum, four volumes of scientific facts compiled and printed by the Oxford University press. He was selected from among all the geologists in this country.

Before coming to A.&M, Dr. Russell was with Stanoline and Well Surveys Inc., the latter having invented and developed these well log methods.

German Prewar Auto Under Test to Set 248.3 MPH Record

HOLLYWOOD, Calif., May 5—A "Hitler-built" prewar racing car is being made ready for entry in the Indianapolis races on Memorial Day. It is a Mercedes-Benz V-12, just brought to this country, which set a world record of 248.3 miles an hour.

The car has many unusual features. It has a tubular frame, five-speed transmission, and a trick suspension. The driver sits four inches off the ground. Its 480-horsepower engine is assisted by a two-stage supercharger.

The engine is set at a diagonal, with the drive shaft clearing the driver on the left side. It has a double overhead cam, four valves to a cylinder, roller-bearing crank shaft, and twin magnetos. It is water-cooled, and uses methanol alcohol as a fuel.

The car was brought to this country by the Don Lee Experimental Engineering Company, and is now being tested on the California salt flats. It was built just before the war in the Hitler program to develop high-performance motors.

Veterans Relax After Voting On Exchange Store

Veterans relaxed and forgot their troubles last night, listening to the Prairie View Swingsters rock the old Assembly Hall in a jazz program that followed the monthly business meeting of the association.

During the business meeting, the group was told by A. E. Hinman, newly elected president of the Ex-students Association, that "the exes will be behind you in every way we see fit." Hinman read and explained the resolution adopted by the exes last Saturday, which expressed full confidence in the board of directors; urged the legislative committee to continue to make its investigations carefully, completely and fairly; and urged wholehearted support of all to whatever solution may be found to end present differences.

"The quicker these troubles can be smoothed over and forgotten, the better it will be for the school," Hinman said. "We're going to have to give things and take things."

The question of Exchange Store profits was discussed by O. E. Courtade and Arthur Matula, student members of the Exchange store committee. Courtade stated that manufacturers would not stock the store unless standard prices were charged. With few cash sales, and most of last year's business done with the Veterans Administration, the store made a large profit for the first time last year, Courtade stated.

The veterans voted to request that funds from next years profits be given to the library for books and air-conditioning rather than to the operating fund for the Student Union Building, not yet erected.

Sam S. Williams, treasurer, asked every veteran on the campus to contribute 50 cents or a dollar to the "clean-up" fund which has financed anti-administration fight. The association has so far expended \$627 on the fight, Williams announced, the largest item being for lawyer's fees.

The number of disabled veterans awaiting induction into training for vocational rehabilitation continued to decline during January 1947, Veterans Administration said. Veterans Administration estimated the World War II veterans population for March 1 at nearly 14,500,000 and the total veteran population at approximately 18,378,000.

3 Plastic Surgery Centers Designated In Dallas District

Three hospitals—McKinney, New Orleans, and El Paso—have been designated as plastic surgery centers in the Dallas Branch Area, according to Dr. Lee D. Cady, branch medical director of the Veterans Administration. The latter will be used only when facilities are overtaxed at other hospitals, Dr. Cady said.

Plastic surgeons are available through agreements with Southwestern, Dallas, Tulane, and Louisiana State University medical schools.

Movement of the VA hospital from McKinney to Dallas at a later date is contemplated for the convenience of both veterans and surgeons, stated Dr. Cady.

—POPULATION—

(Continued from Page 1)

time industry to a peace-time will their population remain unchanged.

C. Horace Hamilton, '23, head of the Department of Rural Sociology, North Carolina State College, closed the afternoon session with an address on "The Application of Population Research to Welfare Problems." He told of the need for population studies specifically related to such problems as health, medical care, care of crippled children, afflicted adults and the aged. He also described the application of population and vital statistics to the development of a hospital and medical care program, with particular reference to North Carolina. The program was brought to a close at noon, May 2.
