

VA Asks Vets Not To Pay Premiums in Cash

The Veterans Administration has advised World War II veterans in Texas, Louisiana, and Mississippi to pay their GI insurance premiums by draft, personal check, or money order, rather than by direct cash remittances.

Remittances by draft, check, or money order should be made payable to the Treasurer of the United States, and premiums may be mailed to Collections Unit, Insurance Service, VA Branch Office 10, 1114 Commerce Street, Dallas 2, Texas.

Vance Leaves On Mission to Greece

B. F. Vance, a member of the Agricultural Adjustment Administration staff and the Production and Marketing Administration, left Bryan Tuesday to join the United States mission to Greece in charge of agricultural production. He flew to Washington, D. C. to complete details of the assignment.

Vance, who has been connected with the AAA since 1937, is the second member of the college staff to join the mission. Former business manager of the college E. N. Holmgren has already joined the group in charge of the Greek agricultural rehabilitation.

Vance, after a telephone conversation Monday with an official of the Department of Agriculture, stated that plans may be made for his wife and three children to accompany him.

Besides being connected with the AAA, Vance has been active in real estate, having developed Meadowbrook and Garden Acres in Bryan.

Physics Department Offers New Courses

Physics Department will offer Geophysics 407 during the next six weeks. Geophysics 407 is scheduled daily at 10 and Monday, Wednesday, and Friday at 9. Physics 203, not listed in the bulletin, will also be offered. Classes will meet daily from 7-9 and labs will be held Monday, Wednesday, and Friday from 1-4.

One other advanced physics course will be offered according to demand. Anyone interested should notify the Physics Department of any advanced course he would like.

Geology Class Now Along Rio Grande

The geology summer camp has moved to the Rio Grande area to study West Texas geology under Dr. Ross Maxwell, according to S. A. Lynch, head of the department.

The class of 20 students first studied mapping in the Marble Falls, Burnet County area, under Dr. J. J. Graham and Dr. Carl Lausen. Lynch then supervised a study of geology in north central Texas and southern Oklahoma in the Gainsville vicinity.

In the current phase of the course, the geologists will learn about rock formations along the Rio Grande from Del Rio to Marathon. They will also make a study of the Big Bend Park geology during this time.

Instructor Joins Monsanto Co.

Robert H. Shannon, a 1941 graduate of Mechanical Engineering, who spent approximately three years with the General Electric Company and two years as an officer in the Navy, has left A&M and is now employed by the Monsanto Chemical Company in their power department.

During the past year Shannon, with the aid of four senior students, carried on extensive research work on the flow of superheated steam through nozzles.
