

U. N. MAY INTERVENE IN BERLIN DEADLOCK

LAKE SUCCESS, June 30 (AP)—An American spokesman said yesterday the United States is considering a request from United Nations Secretary General Trygve Lie for action in the Security Council to break the Berlin deadlock.

MEXICAN NONCHALANT; BECOMES 100TH SUICIDE

SAN FRANCISCO, June 30 (AP)—A middle-aged man paid his ten cents and walked to the center span of the Golden Gate bridge. A couple of young men came by. "Boys, I'm from Mexico City," said the man. "Will you give me a cigarette?"

FIRST ALL-NEGRO JURY TRIES WAURIKA CASE

WAURIKA, Okla., June 30 (AP)—Jefferson County, Oklahoma, across the Red River from Texas, had its first all-Negro jury yesterday.

GOVERNOR THURMOND SAYS GEN. IKE MAY RIDE "MULE"

COLUMBIA, S. C., June 30 (AP)—There is "a good chance" that General Dwight D. Eisenhower will be the Democratic nominee for president, Governor Thurmond predicted yesterday.

"UNFAIR LABOR PRACTICE" FILED AGAINST UMW

WASHINGTON, June 30 (AP)—Robert N. Denham, National Labor Relations Board general counsel, issued an unfair labor practice complaint yesterday against District 31 of John L. Lewis' United Mine Workers of America.

U. S. WARSHIPS DIDN'T SHOOT, ATTACHE SAYS

CAIRO, June 30 (AP)—The Arab League reported today the American naval attaché had given "this proof" that a U. S. warship could not have shelled Arab positions in Palestine as Syria contends it did.

BRITISH PLANES OUT TO BEAT U. S. RECORD

LONDON, June 30 (AP)—If weather permits, Britain will nose out the United States in the race for the first jet-propelled aircraft crossing of the Atlantic.

12-YEAR-OLD WIFE GIVES BIRTH TO SON

SHREVEPORT, La., June 30 (AP)—A 12-year-old girl who gave birth to a six and three-quarter pound baby boy is believed to be Shreveport's youngest mother.

STONE WALL DOESN'T BOTHER COW NO. 15

McALESTER, Okla., June 30 (AP)—Stone walls do not pasture make any iron bars in jail. But just the same, No. 15 has a splendid record at the state penitentiary here.

U. S. MAY GET TOUGH WITH USSR

WASHINGTON, June 30 (AP)—United States officials were reported readying new, tough diplomatic moves Tuesday to crack Russia's land blockade of Berlin.

Continued Cooperation Asked . . .

College Station Residents Plan to Continue Cleanup

A committee of College Station residents met last Monday night in order to forge a tentative plan for the continuation of the clean-up program inaugurated earlier this month.

The committee was called by Dean C. N. Shepardson, who is chairman. Members include J. C. Culpepper, Eugene Rush, G. E. Potter, R. Steen, L. E. Winder, Ran Boswell, O. G. Helvey, Ed. Madely, Mrs. Deatz, Riley Woods, and Mr. Jones of the Brazos County Health Unit.

Some of the proposals considered by the committee were:

- 1) The establishment of a joint sanitary fill for the use of both the College and the City of College Station. The present separate dumps used for the disposal of garbage are inadequate and present a possible menace to the health of the community.
- 2) That an effort be made by the citizens to comply with regulations concerning containers. Linking with this is a plea by the collectors that bulky containers be banded to facilitate collections.
- 3) A plea to the citizens to aid in enforcing pet ordinances. The large number of unlicensed and unvaccinated animals are a danger to the children of College Station.
- 4) An urge that owners of vacant lots clear these lots of trash and weeds. The city has equipment available for cutting weeds, and will clear any lot of weeds for a slight fee, which is to cover the cost.
- 5) Problems in the present system of sewage disposal, and tentative plans for more effective treatment of sewage disposal.
- 6) Present problems concerning drainage, which can be alleviated by the citizens themselves, by keeping present facilities clear of trash and rubbish.
- 7) That the City of Bryan be urged to alter their present system of sewage disposal from the area around the Country Club. The sewage, though deposited inside the city limits, present a menace to the

Ministers Hear Suggestions Of Farmer's Panel

"Every rural minister should farm about 40 acres himself, so as to have a closer tie to his people," W. B. Starr, Cisco farmer, told the Rural Church Conference Tuesday.

"The minister shouldn't have to rent such land," said Starr, a farmer for nearly 40 years. "Nor should he have to own his tractor or other large tools, which he could borrow from his congregation. By earning part of his living from the soil, he would be in constant touch with the problems of his congregation."

Starr pointed out that when ancient civilizations and religions fell, it was the agricultural section of the civilization that collapsed first. "Farmers must produce in abundance, but they must not starve to death while doing it," he warned.

Wade Knudson, who belongs to a 900-member rural church at Granfills Gap, said that cities are not reproducing themselves, and therefore much of America's future population will have to come from the farms. This places a heavy responsibility upon the rural church, he said.

A special meeting of the City Council will be held at the City Hall, corner of Church Street and Old Highway 6, at 7:30 p.m. Tuesday, July 6. This meeting will be open to the public, and all citizens are invited to attend and present any proposals that the committee has not, and to criticize or acclaim those which the committee has presented, according to Dr. G. E. Potter.

Grandpa Jones, Grandchildren Air 'Rattler' at Grove Tonight

Coon Dogs and Pups Will Begin Their Howling At 8 p.m. in Regular "Grand Ole Opry" Style

By OTTO KUNZE

Grandpa Jones, whose song "Old Rattler" has caused him to gain the acquaintance of all Aggies, will make a personal appearance at the Grove this evening at 8 p.m. Accompanying him will be his musically inclined "grandchildren" featuring Ramona, champion old time fiddler. Grandpa and his group will come to Aggield directly from Station WSM in Nashville, Tennessee where they are heard quite regularly over the "Grand Ole Opry."

New Associate Pastor Becomes Acquainted With Duties Here

By W. H. BEARDSLEY

"This is the biggest school I have ever seen," Rev. Asbury Lenox, associate pastor of the A&M Methodist church, said in an interview recently. Rev. Lenox, who prefers to be called just plain "Asbury," was appointed to his position here by Bishop A. Frank Smith in a recent Houston Methodist meeting.

Lenox said, with a smile, that he was already acquainted with some of the pastoral duties here as he has been preaching during the pastor's absence. Rev. Jackson, pastor, is attending a Jurisdictional Conference in El Paso.

After graduating from High School in Texarkana in 1942, Lenox worked for a utility company for several years, then entered Lon Morris College in Jacksonville.

While here he was president of the student body, and president of the Religious Council, and when he graduated in 1946 he was given the Founder Award. Along with these school activities he was licensed to preach in June 1944 by his home district, Texarkana. He pastored churches at Ballard, the Jacksonville Circuit, and two years at Minerva-Maisfield near Cameron.

After leaving Lon Morris Junior College he went to Southwestern where he majored in Sociology. He was president of the "Independents," students not organized into fraternities, President of the Gamma Mu, a scholastic society, in Who's Who of Colleges and Universities, and a member of the Blue Key, a leadership fraternity.

As Finance Chairman and Vice President of the Student Christian Association he was responsible for raising a \$1,000 a semester budget.

He represented both the junior and the senior class in the student senate. He graduated from Southwestern June 7, 1948 with a B.A. degree.

Lenox and his bride of two weeks, the former Beulah Derr of Quitman, Texas, have moved into one of the Jackson Apartments north of the North Gate.

Mrs. Lenox attended Lon Morris where she met her husband, and Southwestern where she received her B.S. Degree in Home Economics. She graduated this June.

When he was asked about a hobby, Lenox just scratched his head and said, "I just like all kinds of sports, especially baseball and football."

GRANDPA JONES will appear at the Grove tonight with his grandchildren at 8.

Cavalry ROTC At Camp Hood Has to Walk

By BEN ADAIR

An adding machine or at least an accounting major would be needed to keep track of all the formations met by ROTC Cavalry Cadets here at Camp Hood.

The men of the cavalry are beginning to wonder if they aren't being converted into "paddlefeet." So far the armored cavalry transportation has been two swelling "dogs" incased in combat boots most of the time.

The tank jockeys are ready for their tanks. While running a compass course last Friday, some of the group got off course and were lost for a time until rescued by jeeps.

As a result George Marble of C Troop Cavalry is currently known as "Indian Scout."

Some of the Aggies at Fort Belvoir have sent travel folders as a "float out" to the men here. But already the cavalrymen are planning to return the favor. They are going to send the engineers a vivid description of Mom's home cooking after they go home during the July 4th holidays.

The Aggie cadets at Hood gave the other trainees a sample of that old Aggie spirit the other day with a yell practice. Asa Holleman and Tommy Splittarber were back in their old places and brought memories of past yell practices.

Announcements May Be Ordered

All students who plan to graduate at the end of the summer term are requested to place orders for graduation announcements at the Student Activities office, Room 209, Goodwin Hall, according to Grady Elms, assistant director of Student Activities.

Texas Firemen's Training To Be Held Here On July 11-16

The nineteenth annual session of the Texas Firemen's Training School will be held here from noon, July 11, to 1 p. m., July 16, according to H. R. Brayton, director of the school.

The first of these meetings was held in 1930, when 170 men from 76 cities attended.

This year Brayton expects approximately 600 men from some 325 cities and has already received word from several out-of-state firemen wishing to attend.

The trainees will be instructed by approximately 65 departmental instructors from Texas' Cities and specialists from major industries interested in fire prevention and control.

The trainees' day will consist of two periods of four hours each, made up of a one hour lecture followed by three hours field work.

This year for the first time they will handle major oil and gasoline fires, using special new equipment and methods of extinguishing such as "water-wetters, powders, and special fog-streams." They will also work with baled cotton and paper, rubber fires, butane tank fires, gasoline "spill-fires," and electrical fires.

The annual meeting is held under the jurisdiction of the Industrial Extension Service and sponsored by the State Firemen and Firemarshalls Association which cooperated with the State Board for Vocational Education. The firemen and marshalls of Texas are making every effort to cut down the enormous loss of life and property in Texas due to fire. Last year over \$23,000,000 in property and approximately 500 persons (not counting Texas City Disaster), lost their lives because of fire.

The trainees will be housed in dormitories No. 15, 16 and 17 with Walton Hall held in reserve for overflow. Courses are to be offered in basic, advanced, building inspectors, and instructors methods.

Shepardson Meets With Ag Division

Dean C. N. Shepardson left for Washington Tuesday noon for a meeting of the Executive Committee of The Agriculture Division of the Association of Land Grant Colleges and Universities.

The meeting is to prepare plans for an annual program for the committee. The next meeting of the committee will be in November.

The committee will consider the establishment of a program of accrediting work in Agriculture offered by different colleges. Most all fields other than Agriculture have accrediting agencies.

Shepardson is on the subcommittee which is working on the plan of an accrediting agency for work in Agriculture. He will be back the last of the week.

Dr. Quisenberry Attends Poultry Science Meeting

Dr. J. H. Quisenberry has just returned from Ft. Collins, Colorado where he attended the annual meeting of the Poultry Science Association.

While at the meeting he presented a paper on the use of hormones for the production of superior market quality in broilers and fryers.

He was accompanied on the trip by Professor D. H. Reid, C. B. Ryan, and H. L. German. Reid and German also presented papers at the meeting.

Other members of the A&M College poultry staff who attended the meetings at Ft. Collins included Ted Martin and F. Z. Beanblossom.

Martin presented a paper in the Extension section and Beanblossom presented a paper to the Marketing section of the Poultry Science Association.

Each year the annual meeting of the Poultry Science association is held on the campus of some land grant college or university. Next year the meetings will be held on the campus of McDonald College, McGill University, Guelph, Ontario, Canada.

If San Andreas Fault Gives . . .

West Coast Earthquake Near; Towns Prepare for Emergency

By EDDIE SMITH

"Hundreds Die in Los Angeles Earthquake." "Violent Tremor Panics San Francisco." No, these aren't the latest news dispatches from the Associated Press, but seismologists say they may well be in the near future.

The series of shocks which struck the West Coast of Japan and resulted in an estimated 3,100 dead Monday has caused renewed speculation on the possibilities of another disaster in California such as occurred in 1906 in San Francisco. According to an eminent West Coast seismologist, an earthquake equal to the one that struck San Francisco in 1906 could happen tomorrow and is sure to happen in the next 20 years.

Earthquakes are nothing new to Californians. They have occurred there regularly for over a century. Since 1906, fortunately, they have confined their activity to sparsely populated areas, causing little or no loss of life and minimum material damage.

The speculation is over the great

San Andreas fault which runs the length of the state and narrowly misses San Francisco and Los Angeles. If this ancient crack, whose Pacific side has been creeping toward the ocean at the geologically rapid rate of two inches per year, should reach its breaking point, then two of the nation's largest cities might easily suffer.

However, officials of San Francisco and Los Angeles have not been idly standing by. In the Bay City, a high-pressure fire protection system, independent of the domestic water supply, and with all its main pipes laid in streets where there were no breaks in 1906, stands ready for service if such an emergency should present itself.

Two salt water pumping stations, located on a solid rock foundation near the bay, stand ready to supplement the system if necessary.

In Los Angeles, a Major Disaster Emergency Council was created with power to supervise relief work in any of the fifteen districts into which the city has been divided for that purpose.

A building ordinance restricts the number of stories of all structures to a safe figure, the fifteen story Los Angeles City Hall towering over all other buildings in the city.

Most buildings are of steel and concrete construction although frame houses are equally safe for their occupants. The most dangerous materials are brick, tile, stucco, and plaster which crumble easily when under a strain.

Structures built of these materials invite calamities such as the one that occurred Monday in Fukui, Japan, where a crowded theater collapsed and only three persons escaped. The possibility of that occurring in this country makes the cost of any precaution a small price to pay.

The dubious advantage of an earthquake in Los Angeles is the unique newsreel coverage afforded the public. One can well imagine the Paramount News cameraman eagerly training his camera on the Warner Brothers studio as it collapses, leaving him with exclusive pictures of the decline of competition within the movie industry.

REV. ASBURY LENOX has been appointed Associate Pastor of the A&M Methodist Church.

Annex Apartments Now Available to Married Students

The college now has twenty three apartments at the Annex available to married students, according to Harry L. Boyer, chief of the Housing Office.

These apartments, for the most part, do not have running water, Boyer said, but most of them have portable sinks. A few do have running water in the house, and all of them have an outside bath with hot and cold water.

There are now thirty five families, many with children, living in similar apartments at the Annex.

These homes are in good shape, having been sprayed with DDT on June 28, Boyer said.

Anyone interested should see Boyer, in the Housing Office, Room 100, Goodwin Hall.

Local Girl Will Appear On FHA Convention Panel

Miss Lou Burgess, daughter of Mr. and Mrs. H. E. Burgess of College Station, is scheduled to appear on the program of the National Convention of the Future Homemakers of America, to be held July 6-9 in the Municipal Auditorium at Kansas City, Mo.

Miss Burgess will represent Texas in a panel discussion on "National Work Projects." The panel, led by Miss Charlotte Ackers of Jacksonville, Texas, also includes Misses Gene Marrs of Coleman, Frances Spratt of Huntsville, and Gwen Balliff of Marshall.

In addition to the discussion on work projects, Texans will participate in other parts of the program. A ritual for opening and closing a chapter will be presented by a group of Texas girls. This ritual was written by the Temple Chapter of F. H. A.

The A&M Consolidated Sextette will sing the Future Homemakers' song as a part of the ritual. Symposiums will be presented by Miss Lenora Walters of Houston and Miss Margaret Sandin of Aldine. Texans will take part in the "Parade of the States" and will also present a skit entitled "Tactless Tourists."

Steen Reports To Kiwanians On Convention

There were 2300 delegates representing 1100 clubs at the recent Kiwanis International Convention in Los Angeles. Ralph Steen, delegate from the College Station club, told Kiwanians at their noon luncheon meeting Tuesday.

The Texas-Oklahoma district had 400 delegates. It was the second largest delegation. The California-Arizona district had the largest delegation.

The speaker said that Los Angeles is a great collection of taverns, completely surrounded by the Bank of America. "They had smog out there, too," he said. He referred to the California weather; the natives call it smog when it rains or there is a heavy fog over the state.

The convention passed, among other resolutions, Steen said, one calling for statehood for Hawaii and Alaska. "Governor Earl Warren made a fine talk. It lasted only 15 minutes; Jim Farley talked an hour and a half and said nothing," he pointed out.

"Oh yes, we heard some jokes," he went on. "For example, the one about the hog and the chicken walking along the road together. They saw a sign, 'ham and eggs'. The hog said to the chicken, 'that's just a job's work for you—but me—just's the day of a lifetime!'"

Barnard Fly was given a rising vote of praise. Joe Sorrels, who introduced the speaker, said that Fly is leaving soon and offered a vote of praise for his fine citizenship and membership in the club.

"Pay up," Joe Motheral, who presided in the absence of President Sid Loveless, urged members who may be in arrears in payment of dues.

Guests who were introduced by Welcome Wright included E. K. Spurr, Austin, and Dr. S. P. Pawl, Baltimore, Maryland.

Street Will Head ASEE Next Year

Dr. W. E. Street, head of the Engineering Drawing Department, has been elected to the Executive Committee of the Drawing Division of the American Society of Engineering Education at its recent annual convention in Austin.

Street was elected to his five year term by written ballot of schools from the United States and Canada.

J. G. McGuire, J. P. Oliver, B. F. K. Mullins, G. H. Brock, C. H. Rossdell, R. L. Berton, Paul M. Mason, B. C. Doggett and W. J. DeSpain, staff members of the drawing department also attended the convention. Mason presented a paper on "A Unique Method of Teaching Projection by Models."

This is the second ASEE annual convention held in Texas in the organization's 56 years of history. The other meeting was held on the A&M campus in 1938.
