

HIGH WINDS SWEEP PYOTE AIR FORCE BASE

Volume 48

PYOTE, Tex., Aug. 11 —(P)—Tornadoic winds ranging up to 100 miles an hour damaged nearly 100 planes at Pyote Air Force Base last night.

The storm dipped down out of the northwest about 8:30 p. m. and cut a 200-yard swath across the southeast corner of the army base.

The base, in far West Texas near the New Mexico-Texas line, is now an air force storage and reconditioning center.

Three C-46s were tossed into a nearby pasture and at least 90 other planes were battered.

No one was injured.

Capt. Waldo Bither, executive officer, said 54 C-46s, 18 B-25s, 27 B-17s and one B-29 were damaged.

No estimate of the damage was made.

DEWEY PLANS ONLY TEN MAJOR SPEECHES

WASHINGTON, Aug. 11 —(P)—Gov. Thomas E. Dewey was described Tuesday by friends as so confident of election victory he may make fewer than 10 major campaign speeches.

The Republican campaign course will not be fixed finally until an Albany meeting next week with Governor Earl Warren of California, Dewey's running mate.

But the signs now point to a sharp contrast between the GOP nominee's carefully-paced bid for November support and the sort of whistle stop speaking drive planned for President Truman by the Democratic National Committee.

If early plans jell, friends said Dewey may make one long campaign tour by train. After that he may fly to fill individual speaking dates.

GOVERNMENT ORDERS HIGHER FUEL QUOTAS

WASHINGTON, Aug. 11 —(P)—The Commerce Department Tuesday fixed higher export quotas for fuel oil, to meet naval needs in the Caribbean, and aviation gasoline to boost shipments for Gander Airport in Newfoundland.

The department announced these overall quotas for the July-September quarter:

Crude oil, 2,220,000 barrels; aviation gasoline, 1,305,000; other motor gasoline, 4,900,000; kerosene, 500,000; gas oil, and distillate fuel oil, 4,200,000; residual fuel oil, 1,450,000.

The quota for gas oil and distillate fuel is 317,000 barrels higher than the second quarter quota. Commerce's office of international trade said the boost was made necessary by higher demands for additional distillate in Caribbean refineries for the production of a special fuel oil for the U. S. Navy.

TWO CROSSES BURNED IN SOUTH CAROLINA

COLUMBIA, S. C., Aug. 11 —(P)—Two crosses were burned near an Aiken County Church Monday night while South Carolina Negroes were inside being instructed in the voting procedure for Tuesday's Democratic primary, a Negro leader said.

State President J. M. Hinton of the South Carolina Chapter of the National Association for the Advancement of Colored People, said no white persons were in evidence at either cross site, and that the meeting proceeded without incident.

AIR FORCE WANDERER GIVEN NEW CHANCE

SAN ANGELO, Aug. 11 —(P)—Staff Sgt. Lloyd C. Terrell, Plainview, sentenced to five years imprisonment and dishonorable discharge for unauthorized flight in a base training plane, has been released by order of higher headquarters.

Terrell has been in the Goodfellow Air Force Base guardhouse. The order suspending his sentence and restoring his rank was received this morning from headquarters of the flying division, Air Training Command, at Randolph Field, San Antonio.

The sergeant flew to his parents home near Plainview on July 14. He was apprehended by state and federal police as he was driving toward San Angelo in his father's car. He had flattened a tire on the plane in landing in a meadow.

U. S. DEMANDS TRIESTE BE GIVEN TO ITALY

LAKE SUCCESS, Aug. 11 —(P)—The United States renewed its demands Tuesday that Russia agree to return Trieste to Italy.

The new bid was made by U. S. delegate Philip C. Jessup in a speech before the United Nations Security Council.

Jessup recalled the U. S., France and Britain had proposed last March 20 that the free territory be returned to Italy, but Russia had turned down the proposal.

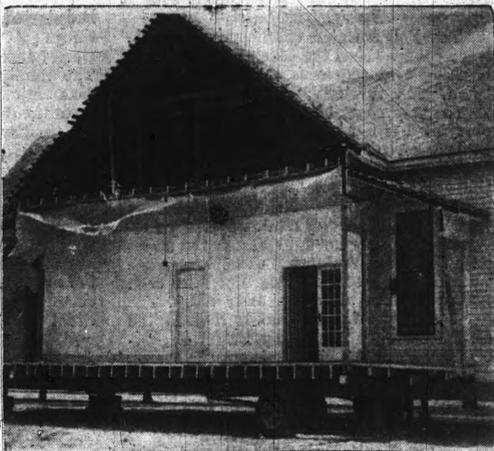

Jessup said "it is hoped that it will soon be possible to establish procedure" to carry out the March 20 proposal.

TROOPS TO RECOVER PLANE CRASH VICTIMS

MILAN, Italy, Aug. 11 —(P)—Italian Alpine Troops began efforts Tuesday to bring down the bodies of a score of Americans lost in a plane crash last November in the Alps South of Cuneo.

The air rescue center at Milan said it would take five or six days to get the victims down from the 9000-foot crags where their C-47 crashed.

The rescue center said 23 persons were aboard, but U. S. Army early announcements had set the number at 20.

HOUSE NUMBER TWO has been put on wheels and is ready to move off the Campus. This space will be occupied by the Student Memorial Center. Since the house was cut into for moving, a clear view is shown of the former living room.

Milk Samplers To Make Taste Test

By H. T. WRIGHT

Approximately 300 people have been invited to attend a "Milk Tasting" this afternoon from 2 p.m. until 6 p.m. in the laboratory of the A&M Creamery, A. V. Moore, of the Dairy Husbandry Department, announced today.

The purpose of this Milk Tasting is to determine if people can really tell the difference between raw milk and pasteurized milk. For many years raw milk was sold in College Station, and in 1946 a city ordinance was passed to the effect that all milk had to be pasteurized before it could be offered for sale. Complaints arose from all parts of the city against this ordinance, but nothing was done about it. The residents of College Station wanted raw milk, and this is their opportunity to determine if there is any difference. Moore, who has been teaching dairy production work for many years, said, "Most people do not have the ability to tell the difference between raw and pasteurized milk at first, but after considerable practice, they develop the ability to distinguish between the two."

Gee And Rypma Accept Biology Teaching Posts

Dr. Lynn L. Gee and Richard B. Rypma have been named professor and instructor, respectively, in the Biology Department effective Sept. 1. M. T. Harrington, Dean of the School of Arts and Sciences, announced today.

Dr. Gee, who will be professor of bacteriology, has been affiliated with the extension service at Purdue University since 1946.

He served as a bacteriologist for the Wisconsin Conservation Department for two years and was engaged in bacteriological research at Camp Detrick, Maryland, before going to Purdue.

Dr. Gee received his bachelor of arts degree from Brigham Young University in Utah and his master of science degree in bacteriology from Colorado State College in 1937.

His work in bacteriology for his Ph.D. was completed at the University of Wisconsin in 1940.

Rypma is coming to A&M as an instructor in general biology. Prior to his acceptance here, he served as instructor of general botany in the Science Department of the University of Ohio.

Rypma received his bachelor of science and master of science degrees from the University of Ohio.

GIVE ME THAT KEY, YOU! Why would a student risk his chances for an education, his self-respect, and future in order to steal an examination? At what point does a student's PERSONAL INTEGRITY and SELF-RESPECT ENTER? Are such incidents as the one pictured above a fault of the student, the school, or the system of examinations?

Contractors' Bids on Memorial Center Will Be Opened Tomorrow Afternoon

Unusual Interest Displayed by Contractors; Architect Expects Reasonable Number of Bids

By JOHN SINGLETARY

"Building contractors have shown unusual interest in figuring the work on the Memorial Student Center," Carleton W. Adams, A&M System Architect, announced today.

"There has been a wide distribution of plans and specifications, and we are expecting a reasonable number of bids to be turned in before the deadline Thursday."

Bids will be opened tomorrow afternoon in the Construction Office. Chancellor elect Gibb Gilchrist, Adams, and others will then study the bids and submit recommendations to the Board of Directors. The Directors will consider the bids at a meeting to be held sometime within the next two weeks.

For construction purposes the Center has been divided into three distinct units. Unit One constitutes the central portion or heart of the building. It consists of three stories and a basement, and will contain such principal facilities as lounges, dining rooms, fountain room, ballroom, meeting rooms, Post Office, supply store, kitchen, rest rooms, and service rooms. Unit Two constitutes the West Wing. It is three stories and will contain student activity rooms on the first floor; the other two will be composed of offices and guest rooms. Unit Three is connected to the main building by means of an enclosed passage and will house bowling alleys and billiard room.

Bids will be made on the separate units or on combinations of them. In this way it is possible that construction can be started on parts upon which acceptable bids have been received.

At this time the plans call for a long rambling or "open-type" building, varying in height from one to three stories and with part basement. The building is planned to allow for future construction of additional facilities.

Other features of the building include air-conditioning, elevators, dumbwaiters, and two open air patios on the second floor. Present plans and bids are for principal construction only. Later plans will be drawn up for grading, landscaping, equipment, and other incidentals.

THE OTHER HALF remains behind. This is the other section of the house being moved to make way for the Student Memorial Center. MAJOR L. W. McGRUDER formerly lived in this house.

80 Assistantships Available Each Year for Qualified Grads

By HENRY LACOUR

Are you in need of additional cash? Provided you can meet the requirements, the graduate school has just the job for you.

The requirements are simple enough, all you have to have is a reasonably high scholastic average, and be enrolled in the graduate school. Graduate assistantships are available to some 80 graduate students each year and are assigned for a period of nine months.

Assistantships pay \$100 a month if the graduate is doing his first semester of graduate work, or \$110 a month if the student has completed two or more semesters of his work.

A graduate student holding one of these assistantships is required to devote part of his time to teaching. He may be assigned to correct papers, supervise laboratory classes, or prepare laboratory apparatus or experiments. Advanced Graduate Assistants may even hold positions as teachers in the classroom.

All these assistantships are distributed among the various departments offering graduate work; approximately in proportion to the number of students in each.

Assistantships next year will be held by students representing almost all 48 states.

In addition to teaching assistantships, there are between 40 and 50 research assistantships available each year. Graduates holding these are assigned to the Agriculture Experiment Station, the Engineering Experiment Station, or the A&M Research Foundation.

Many of these research assistantships are sponsored by grants from industries, which have special problems that the students work on. A large number of industries have problems of production and maintenance that are solved each year by these students.

Fellowships are also granted to worthy students by individuals and industries. These fellowships enable a student who would otherwise be unable to continue his studies in his major field after graduation.

Jester Issues Proclamation Setting Registration Dates

AUSTIN, Aug. 11 —(P)—Gov. Beauford H. Jester yesterday issued a proclamation naming 17 days on which Texans 18 to 25 years of age will register for selective service.

The days are as follows:

1. Persons born in 1922 after August 30, 1922, will register on Monday, August 30.

2. Persons born in 1923 will register on Tuesday, Aug. 31, or Wednesday, Sept. 1.

3. Persons born in 1924 will register on Thursday, Sept. 2, or Friday, Sept. 3.

4. Persons born in 1925 will register on Saturday, Sept. 4, or Tuesday, Sept. 7.

5. Persons born in 1926 will register on Wednesday, Sept. 8, or Thursday, Sept. 9.

6. Persons born in 1927 will register on Friday, Sept. 10, or Saturday, Sept. 11.

7. Persons born in 1928 will register on Monday, Sept. 13, or Tuesday, Sept. 14.

8. Persons born in 1929 will register on Wednesday, Sept. 15, or Thursday, Sept. 16.

9. Persons born in 1930 before Sept. 19, 1930, will register on Friday, Sept. 17, or Saturday, September 18.

10. Persons born on or after September 19, 1930, will register on the day they are 18 years of age, or five days after.

Hours for registration on the days designated were proclaimed by the governor as named by registration points in each county.

Groups exempted from registration are as follows:

1. Members of the Armed Forces on active duty, including members of the coast and geodetic survey and the public health service.

2. Cadets of the U. S. Military Academy and Coast Guard Academy.

3. Midshipmen of the U. S. Naval Academy.

4. Foreign diplomatic and consular representatives and members of their families who are not citizens of the U. S.

5. Other persons in the United States to be specified by the president who have not declared their intention to become U. S. citizens.

According to the proclamation, men may register late only when prevented by circumstances beyond their control. Men of registration age in foreign countries must present themselves for registration within five days after returning to the U. S. or its possessions.

Piano Humorist Will Appear At Grove Soon

By BUDDY LUCE

Henry L. Scott, America's first concert piano humorist, will appear at The Grove August 18 with a one-man show that promises to tickle the floating ribs of all comers.

Scott, who has played the piano in various and sundry attitudes and positions since childhood, has been hailed as a huge success by all kinds of audiences from college capers to Carnegie Hall.

Along with being a master of the piano keyboard, Henry L. Scott is a satirical humorist who has even been compared with Mark Twain by The Salt Lake Tribune when he appeared at the University of Utah.

Scott was taught piano by his mother when he was a child. In his later years he has taken the childhood mistakes that he used to make and has combined them with other mimicry to form a show that no one ever forgets.

The genial Scott usually "wows" his audience from the moment he walks out on the stage. His act was described in Life Magazine as the funny man with the piano.

His rapid routine includes such numbers as "Chopin in the Citrus Belt" (played first with an orange and then a grapefruit in his right hand) and "Little Boy Genius Grows Up" in which he follows the progress of a spoiled darling of the keyboard from the time of his first public appearance at the age of five through the age of 92, still hitting the same wrong notes.

His program also includes impersonations of the styles of popular musicians Vincent Lopez, Eddie Duchin and Frankie Carle; the Juba Dance, Impressions of a great concert pianist complete with flowing wig and exaggerated mannerisms; the History of the Lost Chord, a boogie woogie version of "Kitten on the Keys," a South American tango and rumba. To music lovers and joke lovers alike this should be a show without a substitute.

Also attending will be Dick Hervey, '42, secretary of the Association of Former Students, and E. E. McQuillen, '20, director of the College Development Fund.
