

SENATE FIGHT STILL WARM

FORT WORTH, Sept. 21.—Lyndon Johnson's attorneys will attack the right of jurisdiction when U. S. District Judge Davidson opens a hearing today on Coke Stevenson's motion for a temporary injunction to prevent Johnson being listed as the Democratic senatorial nominee on the general election ballot.

Raymond Buck, one of the Johnson attorneys, said yesterday the action would be based on the grounds that the senate itself is the exclusive judge of such contests.

Stevenson based his motion for the injunction on an allegation that fraudulently counted votes in Jim Wells and Zapata Counties were responsible for Johnson's 87-vote victory in the second Democratic primary.

Secretary of State Paul Brown today told the Star-Telegram that if the court dissolves the restraining order Tuesday or Wednesday morning, he will be able to get the name of Johnson on the sample ballot now being prepared for presentation to the election boards of the 254 Texas counties.

FBI CHIEF IS IMPROVING

WASHINGTON, Sept. 21.—The condition of J. Edgar Hoover was reported "slightly improved" Monday. The FBI chief has been ill with bronchial pneumonia for the past week.

GREEN FREIGHTER REPORTED AFIRE

HALIFAX, Sept. 21.—Ten crewmen suffered burns Monday in an explosion aboard a Greek freighter which caught fire after grounding in the strait of Belle Isle near Newfoundland's northern tip.

The 35-man crew of the vessel, the 4,798-ton Orion, abandoned the ship after messaging at 7:30 a. m. that they were urgently in need of help.

ARMY JET BOMBER DESTROYED IN CRASH

TULARE, Calif., Sept. 21.—A four-jet army bomber from MacRae experimental air base exploded with terrific force today and crashed into farmland near Alpaugh. All aboard were believed to have perished.

Army officials said the plane, an A-44 normally carries a combat crew of six or seven members. Two bodies were recovered from the wreckage which was strewn over a four mile square area.

CUBAN AREA LA-SHED AGAIN

MIAMI, Sept. 21.—Hurricane warnings were hoisted over Florida from Miami to Key West at 2 p. m. Monday as a tropical storm edged close to Cuba and headed for the Florida Keys.

Emergency hurricane measures should be taken immediately in the Florida Keys and greater Miami area, the weather bureau advised.

By late evening the hurricane had whipped into the southern part of Isle of Pines, Southwest of Cuba, Bolen observatory reported.

The observatory said the storm was advancing toward the north and was expected to reach Cuba today. It estimated the winds at 110 miles an hour.

PETROLEUM STRIKE PRINCIPALS ARBITRATING

SAN FRANCISCO, Sept. 21.—Striking west coast CIO oil workers and Standard Oil Company officials are meeting today to continue their efforts to settle the 17-day-old wage dispute. Peace officers in Contra Costa County meanwhile investigated a shot fired into the home of an oil plant foreman.

Partially Paid Vet Should See Wilkins

Veterans who were enrolled for the second summer term and are still in school receiving partial payment for September subsistence should report to the Veterans' Advisor immediately, Taylor Wilkins announced today.

Partial payment for September indicates that the VA has dropped these veterans from its rolls, Wilkins said.

College Offers Fall Courses To Veteran's Wives

The college will again offer extension courses for full credit to wives of veteran students Dr. T. S. Mayo, head of the English Department, has announced.

All those women interested are asked to meet Dr. Mayo at 7:30 p. m. Wednesday in the South Lounge of the Y M C A. first floor.

Practically any course in the college catalogue may be taken at a charge of \$5 for each credit point if as many as 10 student veteran wives apply at this meeting, Dr. Mayo said.

President F. C. Bolton shovels the first dirt on the site of the Memorial Student Center. Ground-breaking ceremonies were held Monday afternoon for the three-story Center which will become the center of activities on the Campus.

Bus to Accommodate Children Within 2 Miles From School

A new school bus has been put into operation to serve students attending A&M Consolidated who, until this time, have been ineligible to ride other school buses, W. D. Bunting, Brazos County school superintendent, announced today.

Students living within 2 1/2 miles of school will be accommodated by the bus, but will be charged a five-cent fare for each ride. Operations were started Monday morning, but no fare will be charged until Monday, September 27, Bunting stated.

This year we find our buses are crowded more than ever because of these ineligible students, therefore this change has become necessary. The buses coming in from the outlying territory will not stop inside the 2 1/2 mile zone.

According to Bunting, the beginning time, schedule and routing for the new bus will be as follows: Beginning at 8 a. m. at the East entrance to the College on Highway 6; thence North to Louis Mair Grocery Store; West by the College View Area; West to the Old Highway by the Triple A Building; South to Southside Grocery Store; on Montclair Street; West on Fidelity Street; East on Park Place Street; by S. Herford to East Dexter-North to Jersey Street and then to school arriving at 8:20 a. m.

Beginning at the school at 8:25 a. m. East to Kyle Street; on Foster Street to Francis Street; East through the Woodland acres back to Walton Drive; North around Walton Drive to Highway 6 and on to school arriving at 8:40 a. m.

These same routes will be repeated from 2:30 p. m. to 3:10 p. m. and again from 4 p. m. to 4:30 p. m. Bunting said.

Adjustments will be made as they seem necessary. Only school children will be eligible to ride this bus, and a charge of 5c per ride will be made beginning Monday, September 27, 1948, Bunting concluded.

Polio Expected to Reach High Of 22,000 in U.S. This Year

The 1948 outbreak of Polio in the U. S. is now at its peak, and if it continues to spread as nearly all outbreaks have, it will end with about 22,000 victims.

If this number is reached, it will cost the U. S. between \$25,000,000 and \$35,000,000 for medical care.

Ordinarily the peak for infantile paralysis comes in the last week of August and the first week of September. This year is following the pattern of other years, despite the fact that the epidemic began in Texas about two months earlier than usual.

The Foundation up to a week ago had sent, as emergency funds, \$2,800,000 to hard-hit states and communities. The Foundation calculates that this emergency money will reach \$5,500,000 by the end of the 1948 epidemic.

Emergency money from the National Office is what states and communities get after they have exhausted that part of the "Dimes Money" kept by the local chapters.

The largest emergency contributions have been made to three states—California, Texas and North Carolina—where this year's epidemic was worst. These states are the only ones in which the number of polio victims exceed 1,000. The figures, of September 2, are California 1,877, North Carolina 1,761 and Texas 1,256.

Figures from the National Foundation for Infantile Paralysis show 1946 with 27,363 cases to be the highest figure attained previously.

ASHVE Meets Thursday Nite In ME Building

The American Society of Heating and Ventilation Engineers will meet Thursday night at 7:30 in the Mechanical Engineering Lecture Room, J. C. Blum, publicity chairman, announced Monday.

The A.S.H.V.E. is a student Engineering Society which fosters the interest and education of air conditioning, heating, and ventilation, and also presents a greater knowledge of the advantages of air conditioning to the general public.

Staron Ammons, president of the student chapter, has requested that all students who are interested in air conditioning, heating, and ventilation should attend this meeting.

All students who wish to file application for membership may obtain applications in the hall of the Mechanical Engineering Building or in the Mechanical Engineering Office, Ammons said.

Tommy Burns, chairman of the program committee, has announced that a well balanced program has been planned and those students who wish to gain a better knowledge of the latest developments in the air conditioning field will find it beneficial to attend.

Staron Ammons will make the formal introduction of Professor L. S. O'Bannon, the new adviser of the society.

O'Bannon, formerly of the University of Kentucky and the University of Michigan and member of the Senior Society of ASHVE since 1928, is the refrigeration and air conditioning instructor in the Mechanical Engineering Department.

All students and visitors are welcome to attend, Ammons said. Refreshments will be served.

Disease Control By State Health Unit Cited by Dr. Cox

The amount of communicable diseases in a county can be lessened considerably through the use of full time local health units, according to a release by Dr. George W. Cox, State Health Officer.

Using the common childhood disease of whooping cough as a basis of comparison, Cox surveyed 20 counties, 10 with the local health units and 10 without them.

In the counties where there are no health units the following rates of incidence per 100,000 population apply: Gaines and Floyd, above 1000; Hale, Dallam, Castro and Cottle above 300; Carson above 400; Bailey and Hartley above 600; and Lipscomb above 750 cases.

By way of contrast to these high rates of incidence, Dr. Cox pointed out that in a representative group of counties where full-time health units made use of the biologicals available from the State Health Department, the average rate of incidence was approximately 188 cases per 100,000 population.

"It is plain to be seen," Cox said, "that the counties receiving the benefit of a full-time health protection, enjoy a much lower incidence of disease and the resulting lessened danger of death."

Street Is Author Of Geometry Text

Technical Descriptive Geometry by Professor W. E. Street, head of the Engineering Drawing Department, has just been received from D. Van Nostrand Co., the publishers.

Features of the book include a new course outline; the draftsman's method of problem solution; illustrations and problems supplied by industry; special shadings and pictures; a new system of notation and nomenclature; illustration explanations broken up into component parts to help analyze steps involved; and industrial applications of revolution including latest design of checking clearances of cutters for oil field drilling bits.

It also discusses the three industrial methods of laying out lofting templates and patterns; and the given views for intersecting surfaces to assist in visualizing the problem.

Although published this month, several colleges and universities have already adopted the book.

File for Student Life Committee

Non military candidates for the Student Life Committee may file for that office beginning today. Deadline for filing is 5 p. m. Friday.

There are 3 vacancies on the Student Life Committee which must be filled by non military students.

The election will be held Monday, September 27.

Seniors Hear Address by Stiteler and Discuss 'War Hymn' Change at Meeting

By KENNETH BOND

Eight Seniors in the Corps were appointed by Don Kasper, Senior Class President, to work with the non-corps in determining if the "Aggie War Hymn" should be modified for the games not played against TU.

Coach Harry Stiteler described the A&M-Villanova game and discussed means for the Twelfth March to aid the football team to an over-flowing crowd of Seniors which was liberally sprinkled with non-corps men. This is the first time that non-corps seniors have attended a Senior Class Meeting in force in some time. The meeting was held in the Y chapel last night.

Rupe Hall explained the results of the committee from the Senior Class which met with the Freshmen at the Annex. "They're interested and they are ready for influence," Hall said, "I feel a group of seniors should go out weekly to help the Freshmen."

"We took a good old fashioned country lick from Villanova," Stiteler explained. "There isn't a man that was present who will not say that our boys did not quit; we were not in condition for such a good, strong team with so many reserves."

"We played a good game during the first half, but after then, you know what happened."

"I am not belittling the Villanova boys nor am I offering excuses, but I say those boys are good," Stiteler continued. "They started their fall practice on August 15; a full 15 days before our boys began practice. They also had three scrimmages; we had none. Prior to our game, they beat Columbia 41-21; Columbia then beat Holy Cross this week."

"An interesting insight into their scouting was evidenced by Army's scouts at the game. There were 11 scouts and four movie cameras in action."

Stiteler pointed out that the attitude of A&M students has improved considerably in the past two years. He mentioned the discontinuing of painting the opposing campus and no longer in a hostile attitude toward the sportsmanship by the Aggies.

"However, I feel we and you could improve. When we left for Villanova, the people who saw us off were singing 'Goodbye to Texas University.' When we returned, they were singing the same thing. I feel we must play each game as it comes. The words to this song remains one of too much of Texas and not enough of the team we are playing next."

After a discussion about students attending football games, Stiteler said he would put a notice in the Battalion when he wanted a private session. At those times, he asked people, students and others, not to attend.

Paul Berry, E Flight, made a motion, which was passed, that the signs on the dormitories be kept clean and free of vulgarity. The battery commanders will use their discretion on the signs, it was decided. Berry's motion was received with enthusiasm.

George Edwards made a motion that Kasper see that the Corps and non-corps alternate their positions on the 50 yard line. Kasper appointed three men as free agents to work on the problem.

A motion was made by John Orr that a group of qualified men work with a non-corps group and former students to decide whether to modify the "Aggie War Hymn" or not. Tommy Spittlerger, Jim Stephens, Ralph Daniels, James Kinkland, Walter Wentland, Barker Chapman, and Dick Wall were named on a committee to work with the non-corps men.

A meeting with the non-corps men has been tentatively set for Thursday night.

After some indiscriminate remarks by two seniors about jamming the Student Senate in the coming election, John Wallace remarked that such bickering between corps and non-corps was out of place at a Senior Class Meeting. He was applauded by a large number.

Roy Blanton, E Flight, offered the suggestion that the five senior class officers, Corps Commander, Corps Executive Officer, and five Regimental Commanders serve on a committee to select the Aggie Sweetheart. He was howled down as the meeting was brought to a close.

Lutheran Students Install Officers

Installation of officers of the Lutheran Student Association will be held in the center chapel of the local Lutheran Church at 7:30 Wednesday evening September 22.

Rev. Fred McCreff, pastor of the church, announced that Leon J. Falls, A&M student and president of the Gulf Region Lutheran Student Association of America, will conduct the program.

Officers to be installed are Richard Wornet, president; Willie A. Kelling, vice-president; C. R. Lundelius and A. D. Dittmar, secretaries and Robert Schero, treasurer.

President Bolton Turns Sod For Memorial Student Center

O. J. WOODWARD, JR.

Construction of the new Memorial Student Center for Texas A&M College, long a dream on paper, became an actuality Monday when College President F. C. Bolton turned the first spadeful of earth at a ground-breaking ceremony.

The reviewing stand, located on a plot just south of the Main Drill Field where construction will start was backed by bearers of the American and organizational flags and the Corps of Cadets was arranged before the stand. The A&M band took a position to the right of the corps. In addition, a number of the general public witnessed the ceremonies.

Cadet Colonel Bob McClure was the master of ceremonies. After calling on the Reverend Sam Hill to give the invocation, McClure introduced George P. Smith of Houston, president of the Former Students Association.

Smith voiced the appreciation of all former students of the fact the building was officially beginning construction. He said "Results were brought about by 30,000 Aggies and the members of the school."

W. J. Lawson, of Austin, president of the Former Students Association in 1942-43, was next introduced as the father of the building idea. He traced the history of the plans for the Center. The original conception, according to Lawson, goes back to the time when Tyree Bell headed the association. At a meeting in Dallas plans were made to begin raising the money, and \$51,000 was raised during the first year.

G. W. Schlesselman, head of the Four Students Accepted For Senate Ballot

Four students have filed their applications in the race for Student Senate positions, N. R. Leatherwood past senate president announced today.

The applications were accepted this morning in the Student Activities Office and they will continue to be accepted until September 24, Leatherwood added.

All dormitories will elect one representative each on Monday, September 27. Each of the college housing areas will elect a representative, and two senators will be elected from among the day students.

Seven students will be elected at large making a total of 43 senators in the new body.

Applicants must be classified sophomores and have attended A&M for two previous semesters with an overall grade point ratio of 1. Candidates from any area are eligible to file for the seven positions at large.

Three representatives from the Freshman Class will be elected in a meeting at the Annex on a later date, so they need not file at this time, Leatherwood concluded.

Deadline Set For Dropping Courses

The deadline for registration has been set for September 27, H. L. Heaton, registrar, has announced.

This is the last day that a student may register in this College for the fall semester.

Students desiring to add or drop a course are urged to make registration changes immediately, as any student dropping a course after September 27 will receive a grade of F.

The fifty top scientists of A&M have combined their talents to produce an exhibit for the Texas State Fair at Dallas, October 9-24. The exhibit, the most comprehensive display of agricultural research ever put together in Texas, will be one of the outstanding exhibits at the Fair.

The general committee for the fair is headed by chairman D. T. Kilgough of the Experiment Station. Other members are A. W. Crain and R. C. Potts of the Agronomy Department; M. K. Thornton, and Jack Sloan of the Extension Service; Howard Berry, visual aids; Hal Moseley, Architecture Department, who designed the exhibit, and R. H. Shuffler, director of information.

The fifty committeemen who planned the displays on specific research subjects were assigned by subjects rather than by departments. The committee on grain sorghums, headed by T. E. McAfee of the Agronomy Department, included R. E. Karner, agronomist of the Lubbock Experiment Station; Fred Hale of the Feeding and Breeding Station; J. W. Sorenson, Agricultural Engineering Department; and L. S. Payne of the Agricultural Economics and Rural Sociology Department.

GEORGE SMITH, president of the Former Students Association, speaks at the "Ground Breaking" ceremonies for the Memorial Student Center. From left to right the other people on the reviewing stand are W. J. LAWSON, former president of the Former Students; DR. GEORGE SCHLESSELMAN, of the Geography Department; GEORGE BUTCHER, representing the successful bidders, and President F. C. BOLTON.

Exhibit for State Fair Produced by Aggie Scientists

Fifty top scientists of A&M have combined their talents to produce an exhibit for the Texas State Fair at Dallas, October 9-24. The exhibit, the most comprehensive display of agricultural research ever put together in Texas, will be one of the outstanding exhibits at the Fair.
