

Southern Methodist Graduate Heads A&M Church of Christ

Announcement of services to be conducted throughout the school year by the Church of Christ was made today by James F. Fowler, pastor of the church.

Bible classes at 9:45 a.m. will begin the Sunday services and they will be followed by the regular morning worship at 10:45. Young Peoples meeting will be held at 7:15 p.m.

Regular Wednesday evening services will be conducted at 7:15. The church is located one block north of the North Gate post office on the corner of Main and Church Avenues.

Fowler and his family live in a home adjoining the church, and have recently completed three

New Engineer Unit Added to ORC

A new Organized Reserve Corps unit has been added to the growing roster of Army installations in the College Station area, Colonel Oscar B. Abbott, executive of the Texas Military District, announced here today.

The unit is the Headquarters of the 4200th Engineer Construction Group. The Group will be authorized a strength of 17 officers, 5 warrant officers and 98 enlisted men.

Captain Albert W. Stockell, the Organized Reserve Corps instructor for the College Station area, announced that Lt. Col. Spencer J. Buchanan, College Station, will command the new unit.

Captain Stockell went on to say that immediate action would be taken to assign all engineer personnel to the new unit and that armory training meetings for pay purposes would be initiated in the very near future.

years as College Station residents. Both he and Mrs. Fowler are graduates from Abilene Christian College, and Fowler did graduate work, receiving his Master's Degree from Southern Methodist University.

The property directly behind the church auditorium has been purchased by the church as the site for a Fellowship Hall to be built in the future.

The Fowlers have three children, Jim, aged six years, Louis, 4, and Judy, ten months.

A woodshop behind the church, presided over by Fowler, is often used by married students where they may construct items for their homes.

In addition to his services as pastor of the church, Fowler will conduct two courses in religious education at the college.

Dr. I. B. Boughton, the newest dean on the campus, is dean of the School of Veterinary Medicine.

Ag Experiment Station Gets New Donations

Several gifts and loans have been made to the Texas Agricultural Experiment Station Dr. R. D. Lewis, director, announced today.

R. L. Hubner of the Warren Manufacturing Company, Monmouth, Ohio, has loaned the department a special type self-propelled spray machine to the Weslaco substation. "The use of this equipment will greatly aid the personnel of our Weslaco substation in conducting their programs on corn earworm control and cotton defoliation," Dr. Lewis says.

R. E. Acker of the Container Corporation of America, Ft. Worth, has given the station \$300 to be used in support of peach marketing studies. "These investigations are being conducted by the Department of Horticulture," Dr. Lewis points out.

A check for \$300 has been received by the station from Ben Lee Boynton, president of the Texas Golf Association, Dallas, as a contribution to the Texas Turf Research Fund.

R. W. Barnes of the Package Research Laboratory, Stapling Machines Company, Rockaway, N. J., has sent a check to the station for \$300 to be used in support of peach marketing studies with Spartan boxes, which are being conducted by the Department of Horticulture.

The loan of a Yelow Devil Sprayer from C. M. Meadows of Sherwin-Williams Co., Waco, has been made to the station. It will be used at the Temple substation.

"The use of this sprayer will greatly aid the personnel of our Temple substation in conducting their programs," Dr. Lewis says.

A grant-in-aid of \$1,000, from the Texas Cottonseed Crushers' Association, Inc., has been made to the station.

"This grant-in-aid is under the immediate supervision of Don L. Jones, superintendent, Substation No. 8, Lubbock," Dr. Lewis says.

Colonel H. L. Boatner will begin his second year as PMS&T and commandant this fall.

The School of Military Science and Tactics extends a warm and genuine welcome to the class of '53. We hope to play our part in trying to make it the best class ever to graduate from A.M.C.

We believe our predecessors in the Military Department of this College have exerted a great influence in making the traditional A&M Cadet a man of force, character, integrity, initiative and perseverance. We intend within our responsibilities to exert ourselves to the utmost in maintaining that same mold for casting you into a successful graduate.

We believe in the well balanced cadet—spiritually, mentally and physically. That requires a balanced effort on your part academically, athletically and militarily, and appropriate participation in campus activities. It requires constant effort on your part. You are "the door", "the learner". We are the teacher, the counselor and keep the record you make.

Your freshman year here will not be easy. Being a freshman requires many adjustments by the average High School graduate. Here, a freshman must combine the adjustments of both an academic freshman and cadet, a new type of life away from your home environment. It requires development and emphasis on individual desirable traits of character. It will not be easy, and we all know it for we have all been through it ourselves. We will watch your efforts with interest, confidence and sympathetic understanding. All members of the Military Department will be very happy to help any one of you individually with your problems and difficulties anywhere, any time. Come to us soon enough so we can be of help.

Pull together with your classmates and the College in your efforts to make yours the best class in A.M.C. history. Best of luck!!!

H. L. Boatner
Colonel, Infantry
PMS&T and Commandant of Cadets

Regular Corps Drill Planned; Sophs To Get Branch Training

Sweeping revisions of military science class schedules were announced today by the Military Department.

Subject matter, specialization, hours of presentation and drill periods are included in a newly revamped program of cadet study.

EE Department Gets New Men

Four new instructors have been appointed in the Electrical Engineering Department, according to M. C. Hughes, head of the department.

E. R. Wesley began class instructions here during the second summer semester. He received his BS degree in electrical engineering from the University of Delaware in 1949, and is a member of Tau Bet Pi and the American Institute of Electrical Engineering.

C. S. Walker received his BS degree from Texas Technological Institute in 1939 and received his MS degree from Ohio State University in 1948. He has worked for the Tennessee Valley Authority, Texas and New Mexico Utilities Co., and was assistant professor at the University of Alabama.

John S. Denison, a native of Waco will do work on the A-C network calculator, and will also act as instructor in electrical engineering. Denison received his BS from New Mexico A&M and his MS from Texas A&M.

David H. DeSutter, from Hamburg, Arkansas, is another of the new instructors in electrical engineering. He received his BS from the University of Minnesota and is a member of the AIEE.

Willy F. Bohlmann, Jr. has been named colonel in command of the sixth regiment for 1949-1950. Bohlmann is majoring in civil engineering. Bohlmann was first sergeant of B Veteran Company last year.

Most startling change is a reduction in the number of military science theory classes. Instead of meeting for theory classes three times a week, cadets will meet only twice a week. This will eliminate many of the Saturday and Wednesday morning theory classes.

The one hour thus gained as a result of dropping the theory class will be devoted to a special drill period in which the entire corps will participate every Wednesday from 4 to 5 p.m.

This hour will be spent in drilling by five of the six corps regiments. The remaining regiment will use the hour for a regimental review.

Sophomores Specialize

Together with the announcement of class schedule changes came word that sophomores will begin taking specialized branch training during their second year instead of waiting until their junior years.

This departure from the procedure followed in recent years is a result of a decision reached by the Army and Air Force Departments.

Freshmen will also feel the result of changes in military science schedules.

Three Annex Battalions

Three battalions of freshmen cadets will be formed this year. One will drill on Tuesday afternoon from 4 to 5, another will drill during the same hours on Wednesday. The remaining battalion will drill on Thursday afternoon from 4 to 5.

For cadets on the campus the inauguration of the regular drill period will eliminate conflicts which, in the past, have occurred with intramural games and other campus activities. Cooperation with the military department by other departments on the college has resulted in an agreement that no classes will be scheduled to conflict with the new 4 to 5 p.m. Wednesday drill hour.

Difficult to Give Facial Description

FORT WORTH, Tex., (AP)—The police identification bureau received a letter from the Twin Falls, Idaho police department in which it was asked if the department here held a record on a woman suspected of passing bogus checks.

The woman's description as to age, weight and height was given, and then the letter abruptly stated:

"She wore a low-cut dress with a short skirt, making it very hard to gain a description of her facial features."

Roy Hagood Weds

Miss Marian Emily Shepherd became the bride of Roy O. Hagood in Fort Worth last Saturday.

Hagood is a senior Dairy Management major and lived in Dorm 16 last semester.

He and his bride will live at 414 Coulter in Bryan until Hagood completes his degree here in January.
