

Extension Service Trains Shamrock Hotel Bellhops

By BOB PRICE

If you are ever in the Shamrock Hotel and a bellhop waits on you, you can remember that he was trained by A&M.

That's right, because the Industrial Extension Service of the Texas A&M College System handled the Herculean task of providing supervisory training of the 1200

Iron, Steel, Machinery Top Texas Industrial Purchases

Texas firms purchase more iron and steel, machinery and mill products from out-of-state concerns than any other industrial material. The report on this matter comes from the Texas Engineering Experiment Station.

The pamphlet, "A Report of the Out-of-State Purchase by Texas Organizations, 1947," covers a survey made to determine which materials or products currently purchased outside the state might be manufactured in Texas. The survey was taken in cooperation with the Purchasing Agents Associations and the Chambers of Commerce of the state.

A&M Garden Club Met Last Friday

The A&M Garden Club held the first meeting of the year last Friday in the YMCA with Mrs. Al Nelson, president, presiding.

Mrs. A. W. Melton, president of the campus club, invited all club members to take part in the Book Fair to be held in November. Mrs. H. W. Barlow will be in charge of table arrangement for display by the Garden Club.

Nobel Winner Will Promote Peace

DUNDEE, Scotland, Oct. 14 (AP)—Lord Boyd Orr says he will use the money from the 1949 Nobel peace prize, nearly \$22,000, to promote peace and world government.

"The important thing in the world today is to get the nations to cooperate," he said last night. Boyd Orr, a bushy-browed Scotsman, believes wars can be prevented by creation of a World Federal Government and by raising more food to prevent hunger.

COMPETITION

(Continued from Page 3)

Mintura, and Trahan rode to a victory over Flight 9. Barnard, Boykins, Eaton, Campbell, Eyer, and Ash played good ball for a fighting Flight 9 team.

Flight 9 came back on Monday, October 17, to down Company 1, 12-0. Throughout the first half, Eaton ran and passed in combination with Barnard, and Caldwell to score. Company 1 countered with a Heathman to Austin pass combination, but it was not equal to the task as the Company 1 ground game failed to prevent any threat.

After the ball had changed hands several times, Eaton and Barnard once more caught fire. The TD play covered 50 yards as Barnard caught a pass in the flat and raced to the goal.

personnel of the hotel. The Extension Service offers supervisory training to any industrial concern in Texas. The service has a five step training course that extends over a two year period.

This program is divided into five twenty-hour courses. The entire course includes analyzing the su-

est dollar volume purchases during 1947. A total of 2,349 separate items were reported. From purchase totals of the cooperating organizations—mineral producers, contractors, manufacturers, transportation companies, utilities, wholesalers, retailers, schools and governments—estimates were determined to show the complete figures for Texas.

The estimates were based on the assumptions: First that like organizations will purchase the same products in proportional quantities and second that the actual quantities purchased will be in proportion to the number of persons employed for the same kinds of organizations. Of the 173 organizations cooperating, the following types were best represented: Crude petroleum and natural gas producers, machinery manufacturers, machinery wholesalers and electric and gas utilities.

Industrial states such as Pennsylvania, Ohio, and Illinois were heaviest shippers to Texas. Heaviest recipient sections of Texas receiving the out-of-state goods were the North Central-Northeast and Southeast portions of the state. Other sections of the state having considerably smaller out-of-state purchase values were the Southern, Western, and Panhandle.

Copies of the report are available at the Texas Engineering Experiment Station, College Station, Texas.

Nobel Winner Will Promote Peace

DUNDEE, Scotland, Oct. 14 (AP)—Lord Boyd Orr says he will use the money from the 1949 Nobel peace prize, nearly \$22,000, to promote peace and world government.

"The important thing in the world today is to get the nations to cooperate," he said last night. Boyd Orr, a bushy-browed Scotsman, believes wars can be prevented by creation of a World Federal Government and by raising more food to prevent hunger.

The Norwegian parliament's Nobel committee announced the award last night. Boyd Orr is a food expert and practical farmer. He formerly headed the United Nations food and agricultural organization.

No Nobel peace prize was given in 1948. The 1947 prize went to the American Friends (Quakers) Service Committee and the Friends Service Council, London.

The prize is awarded from a fund set up in 1896 by Alfred B. Nobel, the inventor of dynamite. It is awarded to persons deemed outstanding in promoting peace among nations.

The Nobel committee does not give reasons for its awards. The 69-year-old recipient, known as Sir John Boyd Orr, until he was made a baron last January, said he believed the prize was given him for his proposals for a world food plan as well as for his work for a world federal government.

supervisor's job, human relations, work improvement, accident prevention, and leadership.

The Service has trained supervisors for many of the large concerns of Texas. In each of these training programs, the instructor begins with the first step of the program and carries it on through to the end.

The Service hasn't been in operation long enough to have completed the full five step course but several of the concerns have received three of the five parts of the program.

Some of the businesses in Texas

that have been served by this group include the Dallas Police Force, State Hotel Association, State Laundry and Dry Cleaning Association, Texas and Pacific Railroad, Central Freight Lines, San Antonio Machine and Supply Company, Shell Pipelines, Hammond Machine Company, Associated General Contractors, Clifton Manufacturing Company, and United Gas Corporation.

A four man staff under the direction of E. L. Williams, head of the Extension Service help carry on this training program. This group is composed of D. L. Belch-

er, R. A. Downard, E. B. Hoyler, and L. L. O'Connor. These men working out of the Service travel all over Texas to conduct these training programs.

These large firms realizing the necessity of having well trained personnel keep the group busy with training assignments. These men work in cooperation with the State Board for Vocational Education.

So the next time you see someone working in one of the large firms in Texas you better be careful what you say—He might be A&M trained too.

Uranium Ore for Russ A-Bomb is From Korea

Seoul, Oct. 18 (AP)—Reports have reached both Korean and American quarters that the Russians are mining uranium ore—source of the atomic bomb—in Communist dominated North Korea.

The (south) Korean information spokesman said the radioactive material is being produced in two locations in Whanghai Province and exported to Russia. He did not disclose how this was learned.

Painless Dentistry May Soon Be Here

SAN FRANCISCO—(AP)—You soon may have "painless" dentistry that really doesn't hurt—tooth drilling without drills.

The millennium for tender-toothed dental patients may be reached within a year the American Dental Association convention learned here yesterday.

The new method involves a machine invented by Dr. R. B. Black, Corpus Christi, Tex., and perfected by the S. S. White Dental Manufacturing Company of Philadelphia. Instead of drilling, it uses a blast

of carbon dioxide gas, shot at 75 pounds a square inch pressure through a nozzle only 18 thousandths of an inch in diameter. A finely ground abrasive, aluminum oxide is carried against the tooth to be drilled by the high pressure gas and does the cutting finely and precisely.

The benefits are lack of vibration, heat or bone-conducted sound, all of which combine to produce the "hurt" in tooth drilling. The new machines now are being used by various dental schools and by the Navy dental center.

These are the SCRUBS!

They're warming the bench today. But next year most of these boys will be "regulars"—a few will become stars. They're waiting their chance.

And don't think that they spend most of their time on the sidelines. They see plenty of action at every practice—they come up against the "varsity" in every scrimmage. They're getting ready for their chance.

Have your ever thought of your youngster as one of today's "scrubs"? He has his dreams and hopes; he's waiting his chance to realize every childish ambition.

Are you helping him to get ready for tomorrow's opportunity? Are you giving him the advantage of religious training in the Church?

Now, while your youngster knows life only as a fascinating game, the Church can teach him the rules, can guide him toward the right goals, can develop his spiritual and moral strength.

For the Church there is no substitute!

THE CHURCH FOR ALL... ALL FOR THE CHURCH

The Church is the greatest factor on earth for the building of character and good citizenship. It is a storehouse of spiritual values. Without a strong Church, neither democracy nor civilization can survive. There are four sound reasons why every person should attend services regularly and support the Church. They are: (1) For his own sake. (2) For his children's sake. (3) For the sake of his community and nation. (4) For the sake of the Church itself, which needs his moral and material support. Plan to go to church regularly and read your Bible daily.

Sunday ... Philippians 3:12-16
Monday ... I Corinthians 9:22-27
Tuesday ... Proverbs 15:26-33
Wednesday ... Timothy 5:11-19
Thursday ... Mark 7: 24-30
Friday ... Acts 9:1-9
Saturday ... I Corinthians 13:9-13
