# **Aid Renewed**

A grant-in-aid which the Midwest Research Institute, Kansas City, Mo., has made available for several years to Station to Station to support the grain sor-ghum breeding program has been renewed and the amount doubled. Dr. M. H. Thornton, chairman of the institute's chemistry division, confirmed the renewal to R. D. Lewis, director of the TAES.

This year, the amount of the grant will be \$4,000. It is to support work in grain sorghums be-ing done by R. E. Karper at the Lubbock Substation.

"The increased grant," Lewis said, "will make it possible for us to employ some highly-qualified assistants which Mr. Karper badly needs in order to carry on his extensive programs which have been so productive and which have great promise for the future

In conforming renewal of the grant, Dr. Thornton wrote Lewis, "the fact that this agreement has been renewed from year to year is testimony that you people are doing a very good job."

Star-Telegram sponsored tourna ment. The 120-pound ring strategist is the most experienced of the three local ringmen who will be entered in the North Texas competition. Last year he was not allowed to continue participation in the Tem-

ple regional tournament when it was discovered that he had only a thumb on his right hand. However, he has a special glove which compensated for the miss-ing fingers which he lost in an accident some time ago. It is not expected by officials that he will be disqualified this year, accord-ing to "Cotton" Slovacek, who was one of the directors of the local tournament.
