

J. A. Mortenson Given Annual Burpee Award

John Mortenson, senior horticulture major from Crystal City, last night received the annual W. A. Burpee award from F. R. Brison, head of the Horticulture Department.

The award, a scholarship of \$100, is made available annually by the Burpee Seed Company of Philadelphia. It is presented to an outstanding student of horticulture by a selection committee appointed by the Horticulture Department head.

'Society' Now On Page Four

Today you'll find a new department on the back page of The Battalion bearing the name "Society". This new section was created to facilitate the concentration of the greater part of College Station news in one place in the paper. The Battalion Co-Editors said this morning.

The new section is a further step in The Battalion's recently organized city news department and was provided for reader convenience, the Co-Editors explained.

Changes made earlier as a part of the Battalion's city news program include carrier boy delivery to College Station residents and news stand sales.

Baylor Frosh Chosen States Club Duchess

Fatay Barfield, freshman Baylor student from New Boston, was chosen to represent the Four States Area A&M Club at the Cotton Ball and Pageant April 28. Miss Barfield will be escorted by Jim Rodgers, club president.

Added Cooling Tower Units To Furnish Reserve Power

This summer A&M is going to have more cool clear water than ever before. But before men get trampled in the rush to get the liquid for the impending hot days, there's one hitch — it's all going to be used for the power plant.

Miss Nancy Naylor has been selected Bryan Chamber of Commerce Duchess to A&M's Cotton Pageant and Ball to be held next month. She is a senior at Bryan's Stephen F. Austin High School.

Three Injured In Auto Wreck Wednesday

Three people were taken to the hospital yesterday morning at 11:30 following a two-car collision on highway 8, just outside the College Station city limits.

Citizen's Honesty Costs Him Money

Washington, March 9—The government is richer today because of the honesty of one Robert K. Terry of 4100 Santa Fe Street, Corpus Christi.

Aggie Rodeo Team Leaves for Alpine

Six members of the Aggie Rodeo team left yesterday for Alpine and the second annual Sul Ross Intercollegiate Rodeo. They will compete with 12 other colleges from the Southwest.

Trotter Speaks Before AAUP

Dr. Ide P. Trotter, dean of the Graduate School, will speak to members of the local chapter of the American Association of University Professors Thursday night at 7:30 in the Assembly room of the YMCA.

Bryan Builder Gets Methodist Contract

A contract for the Sanctuary and the Transverse Unit of the proposed Methodist Building Program at A&M was let last Saturday morning according to Fred R. Brison, professor of the Horticulture Department and a member of the A&M Methodist Church Building Committee.

The contract was let to Clarence L. Andrews, general contractor in Bryan. The W. E. Kutzschbach Heating, Plumbing and Electrical Company has been employed to install the heating and electrical equipment, according to Brison.

Reba McDermott

A junior at the A&M Consolidated High School, Miss McDermott will represent the local chapter of Future Homemakers of America as duchess to the Cotton Ball, April 28.

Walton to Address Father-Son Dinner

E. V. Walton of the Agricultural Education Department will be the principal speaker at the Princeton Father and Son Banquet at Princeton on March 10.

Architects to Hear Residence Lecture

W. W. Caudill, research architect of the Engineering Experiment Station, will speak to the Architectural Society Thursday evening at 7:30 in the chapel of the YMCA.

Who's Who at A&M

Lytle Blankenship and Lloyd Manjeot are featured in the 'Who's Who at A&M' section.

Harry Boyer to M.C. Masonic Celebration

Harry Boyer, Grand Junior Steward of Sul Ross Masonic Lodge, will serve as master of ceremonies at the George Washington celebration at Shisa Hall at 7 p. m. Friday, March 10.

John C. Truehardt looks over his winning plate design. He won the 75th Anniversary Commemorative plate design contest held recently. Truehardt is a first year design architecture student. The plate is a standard 10 1/4 inches in diameter. The outer and inner edge of the plate will be gold. Between the rims will be maroon ring with the center white. The names of the presidents of the college and names of some of the historic buildings will be printed in gold.

'Engineer' In Mails Friday Features Agriculture Expose

By GEORGE CHARLTON
An answer to the humor-starved student with the slipstick and drawing board has now been published. Finally someone, and in this case the staff of the Engineer magazine, has taken heed of the monotonous drudgery of the slide rule student's life and has printed a special edition to revive him from the dry heaves of fractions, figures, and formulas.

Initial article of this amusing issue is an expose on none other than the School of Agriculture — but naturally. Incriminating pictures show the Ag student at work — Cow Washing 119, Hog Sloppling 313, Education 411 lab (at the movies), Plow Pulling 438, Fence Building 401, and Hay Stacking 213. A special course offering the student a precise "working knowledge of the insides of a cat" is depicted and designated Ugh! 213.

In reading "The Senior Sells Himself," we were enlightened to find out that "an overwhelming percentage of college seniors want jobs after graduation." Good grief! Think of all the competition. The article goes on to list the four steps in applying and getting a job. The fourth reads: "The final step in landing a job is

Who's Who at A&M

Miss O'Bannon will represent the A&M Consolidated High School as duchess at the annual Cotton Ball to be held April 28. She is a senior student.

UN Successes, Future Goals Told by Cates

A mental picture of the inner workings and the successes of the United Nations was painted for students of the Great Issues class last night.

John M. Cates, state department officer in charge of the United States Division of Public Liaison at UN Headquarters, outlined the "Accomplishments of the United Nations" for 100 students and guests in the Electrical Engineering Lecture Room.

Contrary to popular opinion, Cates said, the UN has made some great advances.

"You hear more of our failures," he continued, "but you don't hear too much of the progress we have made in some of the little problems which fit into the great spectrum of problems which face the United Nations."

Examples
He cited dissemination of news of modern agricultural methods as just one example of UN progress. Sending vaccine abroad to help curb disease, educating farmers to protect their crops from locusts, rats and other

destroyers were other examples. Cates used the operations of the International Bank as evidence of United Nations progress. The bank, which is under UN sponsorship, provides capital for ventures which are too risky for private investors.

Standardization of "rules of the road" for international air travel is another UN accomplishment. All the examples were effected through specialized agencies of the United Nations.

Problems facing the UN are "fantastically difficult," Cates emphasized. Differences in language, ideals, goals, and backgrounds all hinder rapid and effective settlement of the most simple problems.

Social Groups Progress
The social group of specialized agencies of the United Nations also have made progress, Cates said.

Shipping of iron lungs to India during polio epidemics is just one example, he continued. "These social agencies train medical personnel and promote uniform health standards."

The UN has had its political successes too, Cates explained. As a result of a UN protest, the Russians withdrew from Iran after invading that nation. The explosive situation in Greece was quieted because of UN intervention, he said.

A cease-fire order was effected in Kashmir because of action of a United Nations mediation group. The Palestine truce was accomplished. This latter success was one of the UN's greatest moves, Cates said. He told of the centuries-old conflicts which had kept that part of the world in constant turmoil, and he explained the significance of the UN's success in bringing about peace there.

Largely through United Nations efforts, Cates said, the Republic of Indonesia was established.

Difficulties Faced
"The United Nations faces extraordinary difficulties in achieving any satisfactory negotiations," he told of the varying concepts of human rights and international morality and how they hindered every undertaking of the UN.

"However," he concluded, "we are here. There is no use wishing we lived in the past or in the days of Buck Rogers. We must work out our problems, and the measure of our success will be what will happen in the next 20 years."

"The United Nations can work," he said. "The United States entered into the organization in good faith. The charter has the framework necessary to enable the nations of the world to work out their difficulties. It is up to us to make it work."

'Live What You Talk,' Page Informs Group

By CURTIS EDWARDS
"If we want to keep our civilization going, we must not only talk about love, we must live the way we talk," Kirby Page said last night in an address given in the First Methodist Church of College Station.

Page, noted religious author and lecturer, used Matthew 7:21 as the text for his speech which followed a dinner given by the Wesleyan Foundation.

"Not everyone that saith unto me, Lord, Lord, shall enter into the kingdom of heaven; but he that doeth the will of my Father which is in heaven."
