

Dean M. T. Harrington Dr. Fred Jensen

Dean M. T. Harrington looks over the Art-Science scroll he received Tuesday afternoon. Professor Fred Jensen, chemistry department is presenting the award. This scroll was presented at the Art-Science faculty meeting for "exemplary administration as dean."

## Senate Investigates Hospital Conditions

By JOHN WHITMORE

A more effective way of making up the hospital absence reports was discussed last night in a joint meeting of the college staff hospital committee and the students hospital committee.

The combined committees interviewed Miss Irene Claghorn, superintendent of the hospital, and Dr. J. E. Marsh, staff physician. In addition to the question of absence reports the question of telephone privileges in the hospital, and Day Student absences, was discussed.

It was decided to present a resolution to the Director of Student Affairs making it possible to have a man's name put on the sick list the same week he is admitted to the hospital, rather than the present system of putting him on the list only after he is discharged.

**Student Senate Questions**  
These questions were brought up by the Student Senate representatives with the staff committee

C. L. Moody

## Moody to Speak To Geology Club Tuesday

C. L. Moody, of the Ohio Oil Company, Shreveport Division, and president-elect of the American Association of Petroleum Geologists, will speak to the Geology Club Tuesday night, March 28, at 7:30 in the Petroleum Building lecture room.

As President of the A. A. P. G., C. L. Moody holds one of the most distinguished positions of the world's petroleum geologists. The A. A. P. G. is a world wide organization, the largest of its kind, having a membership of over 6,000 technical men. Moody has been granted leave of absence by his company, in order that he may devote the time necessary to the handling of his duties as President.

**Active In Science**

Since entering the oil business in 1917, Moody has been active in various organizations for the advancement of geology and related sciences, having served the A. A. P. G. as associate editor of the Bulletin in 1933-38; as vice president in 1937; as editor in 1947, 49; and many other lesser positions.

He is also a member of the American Association for the Advancement of Science, of the American Petroleum Institute, of the American Geophysical Union, and is now serving on the Publications Committee of the Geological Society of America.

## Hockadites Present Guion Show Tonight

By GEORGE CHARLTON

Once again the girls from that staid institution on the northern banks of the Trinity will appear tonight in choral concert both at the Annex and on the Campus. The girls? You guessed it. They're the All-Girl Choir from Hockaday Junior College.

The Annex show, which will be free, takes place in the Student Center at 5 p. m. The campus concert will begin at 8 p. m. in Guion as part of tonight's regular show. Only admission price will be that normally charged to see the motion picture.

The group enlarged since last year by 12 members, consists of 44 singers. They will present an hour-and-a-half program of modern singing with a popular repertoire very much like the one presented here last year. Appearing in April of '49, the girls were soundly applauded by an appreciative Aggie audience.

As a Battalion story coverage of last year's concert proves, the girls were duly appreciated: "Judging by the applause, the rush for the side door, and the rapidity with which each girl was provided an escort, one can only say that Hockaday's Choral Club made a real 'hit' at A&M."

Soloist Lou Ringo will sing two popular numbers in tonight's performance, Cole Porter's "Begin the Beguine," and Victor Herbert's "This Alone." Miss Ringo is from St. Louis, Mo.

Members of the group will combine vocal talents on seven selections ranging from the popular through the classic. Of the latter variety will be "Riding, Riding" by Skiles, "Mountains" by Rasbach, and "Choral Procession" by Kouritz.

Along more familiar lines will be "All the Things You Are" by Kern, "You'll Never Walk Alone" by Rogers, "Tea for Two" by Youmans, and "Dark Eyes."

And really going modern will be a trio from the group singing "Where Are You?" and "Music, Music, Music."

The entire aggregation will have supper in the Annex Dining Hall following their performance in the Student Center. After their Guion Hall show, the girls will be guests of the Singing Cadets in the Music Hall. Dancing and refreshments for the group are being planned.

The choir arrived here early this morning and returns to "Big D" early Saturday.

## Senators Send File Request To President

Washington, March 23—(AP)—Senators investigating charges of Communism in the State Department have sent a formal request to President Truman for federal loyalty records, Senator Tydings (D-Md) said today.

Tydings dispatched the request as chairman of a Senate Foreign Relations Subcommittee investigating the charges, made by Senator McCarthy (R-Wis). McCarthy sent a telegram to Mr. Truman charging that the President's "arrogant refusal" to open the loyalty files was "endangering the security of this nation."

At Key West, Fla., where the president is vacationing, his press secretary, Charles G. Ross, said Mr. Truman is awaiting receipt of the formal request before announcing his decision whether to give congress limited access to the files.

Tydings told newsmen he had sent the request for the files on Tuesday. He said the request went to the White House for relay to the President in Florida.

**Limited Use Not Mentioned**  
Asked whether he had requested "limited" access to the files or full access, Tydings replied: "I didn't say anything about that. I just asked for the files."

He said committee requests for the records also went to Secretary of State Acheson, FBI Chief J. Edgar Hoover and Chairman Seth W. Richardson of the Civil Service Loyalty Review Board.

The committee has not yet submitted to Mr. Truman the names of any of the 115 persons who have been accused by McCarthy, either in public or in secret session, Tydings said.

The Maryland senator also declared that the man cited by McCarthy as "the top" Soviet espionage agent in this country "has never been employed or connected with the state department except once."

McCarthy said on Tuesday that the man—whose identity has not been disclosed—is now connected with the department. Deputy Undersecretary of State John E. Purnifoy said yesterday that the individual has "never" been employed by the department.

Tydings said that immediately after McCarthy disclosed the man's name, in a closed-door session, he asked the state department for the mystery figure's employment record.

## Prizes Picked For Spring Dairy Show

One hundred years of magazine subscription and a pair of hand made boots will be given away.

These are just a few of the prizes to be awarded to the winners at the Spring Dairy Show, president Carl Hand said.

The Spring Dairy Show will be held in the vicinity of the College Creamery, All College Day, May 6. Winners in the various classes will be awarded prizes that are being donated by companies interested in dairying, Hand said.

The annual barbecue will be held on April 29. Warren C. Jones, chairman of the barbecue committee announced that a calf to be barbecued has been obtained.

## Geologists Plan Mexican Tour

A six day expedition to the San Carlos Mountains near Tamaulipas, Mexico, is scheduled for a group of the senior geology majors the first week of April.

Dr. Carl Lausen, Distinguished Professor of Geology, will lead the group. One of Dr. Lausen's better known achievements is his expedition into the unexplored regions of the Great Slave Lake of Northern Canada in the mid-twenties.

The San Carlos Mountains, which lie 125 miles southeast of Brownsville, Texas, is one of the few localities on the North American Continent where nepheline-bearing rocks occur. One of the primary purposes for making this expedition is to study these unusual rocks.

Necessary equipment is being taken to camp for several days in the mountains, since it is doubtful that the small Mexican towns will have sufficient accommodations for the group.

The group will also examine and collect fossils from the sedimentary rock series of Upper Jurassic to Upper Cretaceous age, and studies will be made of volcanic necks, localities, sills, and dikes in the area.

The last days of the expedition will be spent inspecting the old copper mines in the vicinity of San Jose.

## Houston Ex Gives Second Fellowship

A new graduate fellowship in the Department of Petroleum Engineering has been established by Michael T. Halbouty '30, Houston geologist and petroleum engineer.

Recipients of the fellowship will receive financial aid enabling them to do research in those fields. The fellowship is similar to one provided last year by Halbouty for graduate work and research in geology.

## Home Town Speakers

Any student who wants to talk to high school seniors in his home town about coming to A&M next year sign up at Room 102, Goodwin Hall before Tuesday March 28. Authorized absence will be allowed either the day before or the day after Easter Holidays for this purpose.

The lovely lady playing peek-a-boo behind the gloves (cotton gloves, of course) is Elizabeth McGee, 1950 Maid of Cotton. She will appear on the campus as guest of honor at the 16 Annual Cotton Ball and Pageant April 28.

## Sales Forum Explains Field Of Salesmanship

By KEN BERNHARDT

"Selling produces and maintains business. It is the profession that influences production, jobs, and opportunities," Carl B. Kreiner, president of the Houston Sales Executives Club, told an audience of Business and Accounting students Wednesday.

Kreiner headed the sales forum in a frank and informal discussion of the opportunities of selling as a career.

"There is a bright side to the business world for all of you. Keep your eyes and ears open," he said.

Good salesmen are in demand.

## PMA Lauds State Committee Heads

Twenty-six Texas county Production and Marketing Administration committees were honored here Tuesday for 16 years' continuous service.

B. F. Vance, chairman of the state PMA committee said the 26 have served since the original AAA program was begun in 1934.

The 26 were guests of the state committee, state fieldmen and state PMA office personnel at a banquet last night. Nine county administrative officers with long service records also were honored. They and the 26 county committee-men received special certificates.

The PMA committee men honored included Joe A. Hoffman, Archer County; Albert Schulz, Concho; Harry F. Eckhardt, Gillespie; Oscar Neuhoff, Kerr; Ben P. Palmer, Menard; Jasper M. Taylor, Smith; Thomas Jung, Gillespie; Truman R. Miller, Oldham.

The county administrative officers honored included Robert J. Persons, Cherokee; William W. Gunn, Grayson; James W. Bullock, Gregg; James W. Evans, Hoekley.

## Cattle Production In 'Golden Age'

"Today we are living in the golden age of beef cattle production," Sterling Evans, president of the Federal Land Bank of Houston, told the animal husbandry seminar class Monday night.

"The past six or seven years has been the longest period of high prices for beef cattle that the world has ever known, but the cattle business is tricky," Evans said.

It is very improbable that a man can start from scratch in the ranch country today and make a success of ranching with the present price of land, he said.

Industry is constantly seeking more men for advancements than are available.

**Highest Paid**  
Selling is the highest paid profession in America. Two-thirds of incomes over the \$5,000 bracket are earned by men connected with the field of selling.

Loyalty, honesty, proper technical background, willingness to work, and the ability to sell, in that order, are the traits looked for in men desiring to become salesmen, he said.

In explaining the importance of knowing how to apply technical knowledge, Kreiner said that theory without application is useless and not in demand.

Between three and ten thousand dollars are invested on the average salesman the first year he is employed. Hard work and sacrifice have built businesses able to offer the opportunities available to salesmen today.

## Vet Enrollment At A&M Decreases

Two thousand four hundred forty-one veterans are attending A&M College this semester according to the Veterans Administration. This is a slight reduction from last fall when 3,021 were enrolled under the G. I. Bill.

Of this number, 1,160 are married and most of these are living in college operated apartments.

Two hundred fifty-five of the 473 graduate students now enrolled at A&M are veterans on the G. I. Bill. There are only 44 freshman veterans at the annex this semester.

The largest enrollment of veterans at A&M was in the fall of 1946 when 6,281 students were on the G. I. Bill. There has been a gradual decrease ever since that date.

The decrease in number since 1946 is due to graduation, accepted positions, financial troubles, sickness, and expiration of the G. I. Bill, the VA said.

## Directors Meet In Dallas Today

By The Co-Editors

Awarding of campus construction contracts, consideration of summer school fees at Junction, and action on a request to accept out-of-state students in the school of Veterinary Medicine were the main agenda features scheduled for what appears to be strictly a routine meeting of the A&M System board of directors in Dallas this weekend.

Contracts will be awarded for the addition to Francis Hall, which houses a majority of the school of Veterinary Medicine, for fire escapes and bowling alleys for the Memorial Student Center, and for the horse barns and dairy feeding barn in the relocated Agriculture area across from the West Gate.

Meeting time and place for the board is this afternoon and Saturday morning at 9 in Dallas, Baker Hotel, according to the college information office, which releases the agenda.

**No Student-Life Report**  
There was no mention on the agenda of any report from the board's Student Life Committee whose studies on the campus have

**Budget Considerations**  
Budgets for the 1950 summer school will also be considered, along with a request for authority to allow cost of living adjustment on salaries of employees on modified service for the fiscal year 1949-50.

Aside from these items directly concerning A&M, the usual system business, similar problems from the other system schools, and hearing previously scheduled reports and accepting gifts and awards will take up the remainder of the board's business periods.

Attending the board meeting from the campus will be Chancellor Gibb Gilchrist, President Frank Bolton, President-elect Tom Harrington, Dean of Engineering H. W. Barlow, Vice-Chancellor for Agriculture D. W. Williams, director of physical plants Reese Spence, Director of Information Henderson Shuffler, assistant to the chancellor E. L. Angel, Controller F. Z. Holmann, R. E. Lewis of the Extension Service, and one of the co-editors of The Battalion.

## Kline Slated To Address 'Great Issues' at Guion

President of the Farm Bureau Federation Allen Kline will be on the campus April 3 and 4 to address students in the department of Agriculture and to talk to the Great Issues Class, according to Charles N. Shepardson, dean of the School of Agriculture.

Kline will speak to students in the School of Agriculture at 11 a. m. April 3 and to the Great Issues class at 8 p. m. Both talks will be Guion Hall.

He has recently engaged in public debate with secretary of Agriculture Brannan on farm problems.

His topic for the talk to agriculture students will be "Agriculture and Our Future" and he will speak to the Great Issues Class on "What Are Americans After." He will hold a question and answer session the morning of April 4 with members of the Great Issues Class.

Kline is a graduate of Iowa State College, and at present is a farmer and swine breeder of Benton County, Iowa. He is president of the Iowa Life Insurance Company, the Iowa Farm Mutual Insurance Company, and the Iowa Farm Bureau Company.

"Kline is one of the outstanding farm leaders in the United States and one of the best farm speakers I have ever heard," Dean Shepardson said.

## SMU Alumni Will Organize Friday

An informal meeting of the SMU Alumni Association will be held in the lounge of the A&M Methodist Church Friday night, March 24 at 7:30, according to Robert C. Sneed, temporary chairman of the group.

The purpose of the meeting will be to organize a permanent Alumni Association for the Bryan-College Station area. All former students of SMU are urged to attend, Sneed said.

## Take a Break

Hart Hall athletes rose up in arms yesterday. The blood of battle darkened every well-trained eye. All able bodied residents were called to the colors for an enraged skunk had been located under the dorm.

The alarm went out. Athletes tumbled out of the dorm. Those who didn't hear the cry for help knew instinctively by an air about the place that all was not well.

Every tactic was tried to pry the skunk from the pipe. They used smoke. It didn't work. They tried rocks. No luck. Then a BCU can full of water was rolled into position and its contents cast into the pipe.

Out came the skunk. Flushed. He was wet. He was mad. But a barrage of rocks from athletic arms met him at the opening.

The issue was never in doubt. Bull Lawson, club in hand, advanced on the stunned stranger and with a sweeping lunge administered the death blow.

Funeral services were moving. The body, attended by Lawson and John Parnell, was gently lowered into a simple casket. A late model funeral car from the BCU department carried the deceased to its final resting place.

Only memories—and a helluva smell—remain.

**Joyce Kittinger**  
Miss Kittinger will represent the Industrial Education Club as duchess in the Cotton Pageant and Ball. She is an art major at Texas Southmost College Brownsville. Her escort will be John B. Neely.

been the basis for extreme rumors among the student body and factions of the Bryan press.

Two of the most significant items on the agenda from the student's viewpoint appeared to be the Junction fee consideration, indicating the summer school adjunct to be near readiness, and the consideration of out-of-state students for the previously jam-crowded Vet school, indicating some relaxation in the overloaded conditions of that school.

Another interesting item on the agenda is "invitation to President Truman to visit during 75th anniversary year," although no further information is given as to when and how the invitation is to be, or has been, proffered.

Final contractual subject on the agenda is that of farm and water sewer lines and golf course water lines, which contracts are to be awarded at the meeting.

Two other items, not under the awards list, are "temporary water contract with city of Bryan" and "electric contract with city of Bryan to serve water works."

**Budget Considerations**  
Budgets for the 1950 summer school will also be considered, along with a request for authority to allow cost of living adjustment on salaries of employees on modified service for the fiscal year 1949-50.

Aside from these items directly concerning A&M, the usual system business, similar problems from the other system schools, and hearing previously scheduled reports and accepting gifts and awards will take up the remainder of the board's business periods.

Attending the board meeting from the campus will be Chancellor Gibb Gilchrist, President Frank Bolton, President-elect Tom Harrington, Dean of Engineering H. W. Barlow, Vice-Chancellor for Agriculture D. W. Williams, director of physical plants Reese Spence, Director of Information Henderson Shuffler, assistant to the chancellor E. L. Angel, Controller F. Z. Holmann, R. E. Lewis of the Extension Service, and one of the co-editors of The Battalion.

## Elsie Dvorak

Miss Dvorak will represent the Arts and Science Council as their duchess in the 1950 Cotton Pageant and Ball. She will be escorted by George Kadera, senior physical education major. Both are from Houston.
