Senate Delays Price Support Final Action

Washington, March 24.—(AP)—The Senate delayed final action on a compromise farm price support bill yesterday after first voting to approve the controversial measure.

The surprising reversal came after the lawmakers by a 37 to 33 roll call vote had stamped their approval on the measure designed, in part, to prevent surplus potato production which has cost the government \$500,000,000 in recent years.

The bill also would ease proposed curbs on plantings of cotton and peanuts.

The House shouted its approval without a record vote after it had defeated 179 to 77 a motion by Rep. Gamble (R-NY) to cut the increase to \$1,000,000,000.

The \$2,000,000,000 would boost CCC borrowing power from \$4,750,000,000 to \$6,750,000,000.

Complicated

The Senate sparring over the potato-cotton-peanuts bill was complicated.

After the Senate approved the measure, its backers made a customary move to elicit the vote and prevent later reconsideration. This procedure (1) a motion to reconsider and (2) a move to lay that motion on the table.

Surplus Crops to ECA Pushed by Legislators

Washington, March 24.—(AP)—Two farm state legislators yesterday advanced a new version of the plan for putting \$1,000,000,000 worth of crop surpluses into the Marshall Plan. House debate opens tomorrow on the foreign aid bill.

Chairman Cooley (D-NC) of the House Agriculture Committee sponsored the bill jointly with Rep. Poage (D-Tex.).

Cooley said the new plan would earmark the sum for the economic cooperation administration to buy on the open market crops declared surplus by the agriculture department.

Cooley wants to substitute it for a section of the bill which calls for chopping \$1,000,000,000 out of the ECA fund and substituting the same amount of U. S. farm surpluses which the government has taken over under the price support program. Farm organizations assailed this idea as a confused mixing of price support and ECA programs.

The Cooley-Poage plan would leave the \$1,000,000,000 cash in the bill but require that ECA use this money only for American farm surpluses.

First reaction among farm state members was that this would avoid disruption of farm prices while getting rid of some excess products.

Administration leaders did not indicate their attitude at once. The original administration bill hasn't said anything about required use of surpluses. This proposal was written in by the Foreign Affairs committee over objections of ECA Administration Paul Hoffman who said it was like a straightjacket for ECA.

ECA buys much more than \$1,000,000,000 worth of food, but had not been restricted in it.

Similar Plan defeated

The Senate last year wrangled long and bitterly before defeating a plan to earmark \$1,500,000,000 of ECA funds for U. S. crop surpluses.

The bill before the House tomorrow carries \$3,272,450,000 for the fiscal year beginning July 1. It is an authorization. Appropriations must be made separately.

Of the total \$3,950,000,000 (including the \$1,000,000,000 crop surplus) would go to ECA for the Marshall Plan countries of Western Europe; \$150,000,000 would be added to this from funds carried over from this year; \$27,450,000 would aid Arab refugees from the Holy Land; \$100,000,000 would go for Korean economic assistance, and \$27,450,000 would be used for point four planning in underdeveloped areas.

The House Rules Committee cleared the bill for six hours of debate.

Although Democratic Leader McCormack (D-Mass) told newsmen he hoped to see discussion finished tomorrow, a number of points were expected to get a thorough going-over.
