

The City of College Station is here shown in animation as originally conceived and sketched by the fourth-grade art students of A&M Consolidated School. The map was drawn by the class instructed by Mrs. J. V. Perry. Included in the picture is major landmarks of the college and of the city. In the upper left can be seen the city hall, the PMA building, and the Campus theater. The single church at the North Gate represents the church district. Below the North Gate Prexy's

Fountain is drawn plus the water tower, and lower still is shown the Academic Building with the American flag. Four A&M Cadets are depicted drilling on the main drill field. In the lower left is Kyle Field and in the lower right is pictured the Consolidated school. Also, at the East Gate, the map is complete, showing an Aggie hitchhiking. The map has recently been put on exhibit at the College Station State Bank.

5,500 Strong . . .

Aggies Now CS Citizens (For Census)

College Station's official population will receive about a 5,500 boost in the 1950 census. The boost will come from the A&M campus student body, a group not allowed to be counted a decade ago. Students can't vote, pay taxes, or run for office, but they now seem to be official citizens of College Station. Three students have been appointed to make the official count for the college, according to Homer B. Adams, Brazos county census captain. Bryan Field freshmen will go into the county total, since their geographical location makes it impossible for them to be included in either the College Station or Bryan count. They number about 1,100, according to college officials. The freshmen census will be conducted by a student's wife living at the Bryan Field Village.

Building Products Market Men Meet

Students taking the Building Products Marketing curriculum in the Business and Accounting Department have been asked by Ralph Hook, B & A professor to contact him if they intend to find a summer job in line with the requirements of their course. Hook will aid those who need help in securing such jobs. He would like to see all interested students, though, so he can determine how many will be taking the summer jobs.

Mom Began Skating At 3, Daughters Start Earlier

New York—(AP)—The two young daughters of Maribel Vinson have made an even earlier start in life than did their famous mother. "Both my girls took up ice skating at the age of 2," she laughed. "I was 3 myself when I began." That was 35 years ago. Her father strapped a pair of double runners to her feet, she took a few tentative steps—and was off on a career that was to make her one of the best known figures in American sports. Skating was pure joy and passion to her. Maribel won her first women's national figure skating at 16, and she captured it eight more

times before she turned professional in 1938. Only one woman consistently beat her in world competition—Sonja Henie. Today, at 38, she still spends eight to ten hours a day on the St. Moriz Club rink at Berkeley, Calif., teaching her skill to youthful enthusiasts. "I'm rather at, another crossroads in my life now," she said. "I never want to give up skating—after all my mother still skates at 70 and my father skated until he was 76—but I don't want to spend my whole time at it." Maribel feels that many skaters today spend entirely too much of their lives on the ice. "We used to skate only in the winter months. Now they skate 11 months of the year. That makes the competition more dog-eat-dog, and takes the zest out of it. "Most of this high-pressure is unnecessary. A great skater doesn't have to skate all year round to keep great—but if your competitor does it, you do it. It's just a merry-go-round." Miss Vinson has no regrets over the big role skating has played in her own life. "I don't know whether I want to take my own children through the same routine—it's a long road," she said. "But I got a tremendous amount of fun out of skating—more than I do now, I'm sure—and I saw a lot of the world I'd probably never have seen. "But I do sometimes wonder what I might have done if I hadn't turned professional."

RS Club Sponsors Opportunity Talk

Paul C. Stevens, visiting teacher for Galena Park High School, will be the Rural Sociology Club's Job Opportunity speaker Tuesday night, April 11, at 7:30 in Room 208 of the Agriculture Building. Stevens, an A&M graduate of the class of 1942, majored in rural sociology with a minor in education. In his present work he has the dual role of social worker and educator. He worked for several years with the Harris County Probation Department. Recently he has done graduate work at A&M. In addition to the duties of his present job, Stevens will outline the work and the training of a probation officer.

Senate Loses Voice, Takes Early Recess

Washington, April 6—(AP)—The Senate ran out of speeches Tuesday and had to recess about two hours before its usual quitting time. Vice President Barkley told senators "it ought to be regarded as a notable historical event that the Senate has run out of something to say." The Senate was debating a displaced persons bill on which members have agreed to vote.

Fight Cancer

Texas Cattlemen Set-Fall Meeting

The Texas and Southwestern Cattlemen's Association will hold its quarterly directors meeting at A&M Sept. 29 and 30, it was announced today to Dr. J. C. Miller, head of the Animal Husbandry Department. A part of the dedication of the new beef cattle center of the Animal Husbandry Department, Dr. Miller said. The date of the meeting and program arrangements have been confirmed by Ray Willoughby of San Angelo, new president of the organization. The Texas and Southwestern Cattlemen's Association has more than 10,000 members in Texas, Oklahoma and New Mexico. The meeting will be one of the events of the year-long observance of the 75th anniversary of A&M.
