

PH-Sponsored Course Gets Underway Here

By FRANK DAVIS
The Chicken Flock Selecting and Pullorum Testing Short Course, sponsored by the Poultry Husbandry Department at A&M, started yesterday with 62 in attendance, according to E. D. Parnell, Chairman of the Short Course.

Main purpose of the Short Course, which will last until Friday the Department said, is to enable men employed at hatcheries, feed stores, etc. and private flock owners as well, to complete their R. O. P. work under the

Donald Jarvis Married Friday To Dallas Girl

Miss Barbara Ann Sterling became the bride of Donald Edward Jarvis Friday at the Greenville Avenue Christian Church. The Rev. Dean Harrison and Dr. Cecil F. Cheverton of Fort Worth officiated.

Parents of the couple are Mr. and Mrs. Edward R. Sterling of Dallas, and Mr. and Mrs. William E. Jarvis, Fort Worth.

Honor attendants were Miss Ann Zimmerman, Cleburne, and the bridegroom's brother, Duane Jarvis, Fort Worth. Miss Ruth Knox, Arlington, and Miss Leta Erbink were bridesmaids. Martha Jamison was flower girl.

J. Fred Davis and Bill Meserole, both of Fort Worth, ushered Lynn Jarvis and Bill Evans of Fort Worth lighted candles and ushered. The wedding music was presented by Mrs. H. E. Greenell and Buddy Boyd, Fort Worth.

Mrs. Jarvis received her degree from Texas Christian University, where she was one of the ten most active students and represented her school at the SMU Cotton Bowl festivities, at Baylor and A&M.

Mrs. Jarvis was a 1950 graduate of A&M, where she was valedictorian of the senior class. She was an architecture major, president of Tau Beta Phi, a member of Phi Kappa Phi, honorary fraternity, and vice-president of the senior class. In 1949 she won a student aid trip to Europe and the Achievement Award from the School of Engineering.

Mr. Jarvis was cadet lieutenant colonel of the Corps Staff and corps adjutant in the year '48-'49. He is listed in Who's Who in American Colleges and Universities.

Directors Give Approval For 28 Promotions

Twenty-eight promotions in rank of the A&M teaching staff were approved by the Board of Directors of the A&M System Saturday, when the board met in regular session on the campus.

The promotions effective Sept. 1, were as follow:

Agriculture; Agricultural Economics and Sociology, J. G. McNewley, associate professor to professor; Animal Husbandry, R. O. Berry, associate professor to professor and J. M. Schram, instructor to assistant professor; Entomology, D. F. Martin, assistant professor to associate professor; Horticulture, A. H. Kresdorn, instructor to assistant professor; Range and Forestry, D. G. Wilson, instructor to assistant professor.

Arts—Sciences

Arts and Sciences: Biology, W. J. Dobson, assistant professor to associate professor; Business and Accounting, W. F. Farfar, associate professor to professor and S. T. Keim, assistant professor to associate professor; Chemistry, G. M. Watson, associate professor to professor; Education and Psychology, G. P. Parker, associate professor to professor; English, H. L. Kidd and C. D. Laverty, assistant professors to associate professors; Mathematics, J. L. Shaw, S. A. Sims and R. L. Nolen, instructors to assistant professors; Oceanography, D. F. Leiper, associate professor and acting head to professor and head of department; Physical Education, W. M. Dowell, associate professor to professor.

Engineering

Aeronautical Engineering, S. E. Critz, assistant professor to associate professor; Architecture, Theo R. Holleman, instructor to assistant professor; Civil Engineering, R. E. Schiller, Jr., instructor to assistant professor and J. B. Baty, associate professor to professor; Electrical Engineering, T. Prickett, Jr., assistant professor to associate professor; Engineering Drawing, S. M. Cleland, assistant professor to associate professor; Industrial Education, L. B. Harline, instructor to assistant professor; Management Engineering, A. R. Burgess, acting professor to professor and acting head; Mechanical Engineering, W. S. Guthrie and W. W. Smith, assistant professors to associate professors; R. H. Fletcher, instructor to assistant professor.

Parnell Speaks

R. D. Parnell, professor of animal husbandry at A&M, gave a talk on "Breeds of Poultry Kept by Plan Members" at 2 p. m. yesterday afternoon.

During the talk, Parnell explained how the breeds and varieties of poultry differ. The difference he listed as follows: color of plumage, shape and size of body, color of shank and skin, comb type, color of ear lobe, number of toes on each foot, and feathered or clean legged.

A number of talks will be given during the week by Sam A. Moore, from The Bureau of Animal Industries, USDA, Washington, D. C.

Moore To Talk

According to the program, Moore is scheduled to give talks on "What the National Plan is Doing for the Poultry Industry" at 8 p. m. Tuesday, and "The Hatcher's Job in Poultry Sanitation of Farm Flocks" at 1 p. m. on Wednesday.

T. A. Hemarling, executive secretary of the Texas Poultry Improvement Association at Stephenville, will give a talk on "Filling Out Reports For N. P. I. P. Co-operators" at 2 p. m. Tuesday.

Dr. John H. Quisenberry, head of the Poultry Husbandry Department, will speak on "Good Breeding Aids Poultry Improvement" at 1 p. m. Tuesday and on "Getting Good Hatchability" at 9 a. m. Friday.

This morning a demonstration and practical session was given in selecting poultry for National Plan Flocks.

Jeanne Kosarek Given Oaks Party

Miss Allie Jeanne Kosarek, bride-to-be of Joe Glas, was named the honoree Saturday morning when Miss Joyce Patraneila and Miss Lou Burgess entertained at the Oaks with a luncheon.

A wedding party of twelve little pink and white shell dolls surrounded the arrangement of pink and white alpha and omegas on the table.

Sharing in the courtesies were the honoree, Mesdames H. E. Burgess, L. M. Patraneila, Charles Kosarek, W. M. Warren, L. M. Cargill, the Misses Mary Ann Norman, Helen Ann Carroll, Nan Farrell and hostesses.

W. M. Dowell, A&M physical education instructor and tennis coach, assisted by Thomas Terrell of the C. E. department, instructs these youngsters every afternoon in the court sport. They are (standing left to right) Kiver Dahlberg, John Culpepper, Warner Dahlberg, George Litton, Dick

Hickman, and Ernest Tanzer. Sitting on the clay are Kenneth Thompson, Walter Dahlberg, Albert Stevens, Johnny Lyon, and Craig Thompson. Tennis classes are conducted at the clay courts Monday through Friday at 4 p. m.

Vance Bridal Party Named

Bridal Party of Miss Alma Jean Vance and Lt. William Frank Yeoman have been chosen, Miss Vance announced.

The maid of honor will be Miss Carol Howard of San Antonio and the best man will be Lt. John R. Shelley, Altus, Okla.

Misses Mary Lois Ward, Mary Olive Bullock, Marion Norton, Virginia Klapper of Hearne, Gwen Lohnbroeker, Brownsville, and Ann McNeil of Sibley will be bridesmaids.

Lts. John Trent, Memphis, Tenn.; Joe Loco, Phoenix, Ariz.; Bennie Davis, McAlister, Okla.; Wendell Gilham, Austin; Walter Baxter, Westlake; and Cadet Dan Foldsberg, Dallas, will attend the bridegroom. Candle lighters will be Joe Love and Dan Foldsberg.

Walter Martin and Betty Austin Wed

Miss Betty Louise Austin and Robert Walter Martin were married Friday evening at the Owen Good Methodist Church in Dallas.

Parents of the couple are Mr. and Mrs. Charles W. Austin Jr., Dallas, and Mr. Mrs. W. Carl Martin of College Station.

A. S. Ware Announces Candidacy for Judge

A. S. Ware, incumbent candidate for county judge, officially announced for the office recently. Judge Ware's announcement is reprinted below:

"To the Citizens of Brazos County

Standing firmly upon my record and upon a platform which calls for a continuation of efficiency and economy in county government, I hereby announce my candidacy for the office of County Judge of Brazos County, Texas, subject to the action of our Democratic Primary system."

"Deeply grateful for the sympathetic cooperation and assistance rendered by the people of Brazos County, I am proud of the progress which has been made in the administration of county affairs during the time I have served as County Judge."

"Our bonded indebtedness has been systematically and materially reduced and business practices and strict economy have resulted in substantial benefits which have been passed on to the taxpayers."

"Based upon performance and experience in the office, if re-elected I can assure our citizens of a continuation of these plans and policies and of the long-established practice of keeping the people fully and regularly informed as to the details of their county government."

"Thanking you very sincerely for your confidence and support in the past, and pledging my continued efforts to serve the best interests of the people of Brazos County, I am,

Very respectfully,
A. S. Ware."

Most June Grads Already Employed

Despite the dark picture which has been painted for 1950 college graduates, 75 to 80 per cent of the 1,143 June graduates of A&M already are employed, a survey indicated today.

In certain specialized fields, according to the survey, there is a demand for more college-trained men than are available.

Those fields include poultry husbandry, landscape art, horticulture, entomology and dairy husbandry. Graduates in agricultural economics and agricultural education, however, are finding an excess of trained personnel already available in those fields. Some of them plan to further their training by doing graduate study.

Of 64 graduates in the School of Veterinary Medicine, all had jobs awaiting them or were able to go into business for themselves immediately after graduation.

Engineers Representative

According to W. R. Horsley, director of the Placement Office, the School of Engineering is representative of the entire college. Some 541 students graduated in engineering in June, the largest number of any school of the college. Horsley said 75 to 80 per cent of them had jobs.

The departments in which the engineering graduates were trained included electrical, aeronautical, chemical, civil, geological, management, mechanical and petroleum engineering and architecture.

A breakdown on the School of Arts and Sciences shows that many of the graduates are going on for further study.

Of 18 graduates in biology, 12 have enrolled in Medical schools, four are taking or plan to take graduate study, and two plan to enroll in medical schools later.

All of the five chemistry graduates are taking graduate work at A&M. Three of six economics graduates have jobs and one is doing graduate work, while the status of the other two is unreported. Two of four graduates in education and psychology are doing graduate work; the other two are unreported.

Journalism Employees

Two of nine history graduates are employed, five are unreported and two are doing further study. One of four graduates in physics has a job, two have enrolled in the graduate school and one is unreported. The two journalism graduates are employed.

Nine of 17 physical education graduates have jobs and six are doing further study. The status of the other four is unknown.

According to Horsley, 75 to 80 per cent of the 117 business and accounting graduates are employed. All the graduates in accounting have jobs, he said.

Of 320 graduates in the School of Agriculture, 153 were placed in jobs, 42 returned to their home farm or ranch, 29 are starting their own business or farm and 30 tentatively are employed.

Ag Students Okay

On June 7, Dean C. N. Sheppardson of the School of Agriculture reported that 66 graduates were unplaced and that 56 jobs still were unfilled.

The shortage of graduates in some departments and the shortage of jobs in others, Dean Sheppardson pointed out, resulted in unplaced students while unfilled jobs remained.

Matching jobs for students, he added, there would have been enough jobs to place all but three per cent of the agriculture graduates within a week after a graduation; "As a whole, the demand exceeds the supply."

748 Job Calls

The records of the placement office show that during the 1949-50 school year, there were 748 job calls from concerns over the country, and 137 representatives interviewed graduating seniors for jobs that would be available.

"We do not have an accurate record, as of today, of graduates who have taken jobs," Horsley said, "but it is safe to say that 75 to 80 per cent are employed or are in business for themselves."

Patterson Gets Approval As Vice-Director

The Board of Directors of the A&M System Saturday approved the promotion of Dr. R. E. Patterson from assistant director to vice director of the Agricultural Experiment Station. The board acted upon recommendation of Dr. R. D. Lewis, station director with the approval of the chancellor of the system.

Dr. Patterson succeeds Dr. S. E. Jones who resigned April 15 to enter large-scale farming and seed production in the El Paso and Pecos river valleys.

Coming up through the ranks of the System, Patterson has served successively since 1934 as graduate assistant in genetics, research assistant for the Station, assistant in genetics, and animal husbandman for the Station. He was made assistant director and professor of animal husbandry Sept. 1, 1947.

Developed Records

Under Patterson's direction the Station developed the use of business machines for recording and analyzing the great amount of data required in many agricultural investigations.

Patterson will continue to supervise the preparation and analysis of projects, and will assume more responsibility in general administration of the Station, Lewis said.

Patterson is a native of Guedan, Louisiana. He received a bachelor in agriculture from Louisiana State University in 1934 and a master in genetics in 1936 from A&M. A doctorate in animal genetics was conferred on him in 1943 by A&M.

Always Buy CHESTERFIELD

THE CIGARETTE THAT PUTS THE PROOF OF MILDNESS SQUARELY UP TO YOU...

BE YOUR OWN CIGARETTE EXPERT

A YOU buy a pack of Chesterfields and you open it up.

B YOU smell that milder Chesterfield aroma. No other cigarette has it. Make your own comparison.

C YOU smoke Chesterfields and prove what every tobacco man knows—Tobacco that smell Milder...smoke Milder.
